Curriculum for 2-year B.Ed. Programme

Department of Education
University of Delhi, Delhi
Curriculum for 2-year B.Ed. Programme

First Year

Foundation and Pedagogic Courses
In the first year of the course, there shall be 7 courses in all, 5 of them carrying 100 marks each, and the remaining 2 carrying 50 marks. It is expected that the 100 mark courses will be taught for 3-4 hours per week, and the 50 mark courses for 1-2 hours per week on an average. Each paper carries a provision for 30 per cent internal assessment.

The following courses will carry 100 marks each:

1. Education in Contemporary India
2. Human Development, Diversity and Learning
3. Conceptual Foundations of Education
4. Pedagogy-I (introduction to the pedagogic challenges posed by the subjects comprising any one of the FIVE broad disciplinary streams)
5. Pedagogy-II (Covering the pedagogic needs of any one subject within the stream chosen under Pedagogy 1, at all stages of secondary education)

Note:
The Practicum component of Pedagogy -II will be dealt with in the 2nd year of the programme.

The following Courses will carry 50 marks each:

6. Gender, School and Society
7. Knowledge, Disciplines and School Subjects (introduction to the disciplinary basis of all subjects)

EPC Courses
The first year will also provide 2 EPC (Enhancement of Professional Capacity) courses carrying 50 marks each. These will be taught in a workshop mode and evaluation will be entirely internal. These EPCs are:

EPC 1: Art, Craft and Aesthetics (with special reference to any one of the four arts or a craft)

EPC 2: Critical Understanding of ICTs in Education
Tutorial
A tutorial carrying 50 marks will be held throughout the first year. It will focus on developing the student’s understanding of his or her own aims in relation to the various courses through interactive sessions. Reflective reviews of books and other readings selected by the tutor will form the basis of evaluation, apart from the student’s participation in the discussions.

Field Observation: (50 marks)
As per the NCTE framework, the first year of B.Ed. will provide an opportunity for field observation in school and other educational settings for a total period of 4 weeks (i.e. 20 working days, spread across the session). A reflective journal maintained by the student during field observation will be used for evaluation out of 50 marks.

Second Year

Foundation and Elective Courses
In the second year of B.Ed., there will be three Courses, two carrying 50 marks and one elective paper carrying 100 marks. The titles are as follows:

8. The Inclusive School (ref. children with special needs): 50 marks
9. Assessment for Learning: 50 marks
10. Elective course (100 marks) on any of the options available.

The following titles constitute an initial list:
Computer and Web Technologies in Education; Art Education; Human Rights and Education; Education and Technology; Peace Education; Adolescence Education; Education for Mental Health; Environment Education;

Suggested titles for expansion of the list of electives in future: Innovations in Education; Integral Education; Nai Talim; Media and Education; Childhood and Education in Literature. More titles may be added.

EPC Courses
There will be two EPC courses. The titles are as follows:

EPC 3: Understanding Communication (50 marks)
EPC 4: Yoga (module to be supplied by NCTE by July and to be further reviewed by CIE) (50 marks)

School Experience Programme under Internship (300 marks)
A 16-week internship-mode School Experience Programme (SEP) for the practice of teaching and related school experiences will be offered in the first half of the second year (i.e. from August to December). Under internship, students will teach 4 days per week in schools, and the remaining day(s) will be used for course work and consultation with subject specialists. The detailed guidelines for this programme will be prepared later on the basis of the new NCTE
course framework. It is expected that under SEP, students will participate in all aspects of school life while focusing on the teaching a subject in different classes assigned to them. An attempt will be made to create opportunities to engage with the specific challenges that teaching children with special needs involves. Students will be evaluated for SEP out of 300 marks. These marks can be distributed across different domains of school internship work to be spelt out later. Each student will regularly maintain a reflective journal consisting of observations and reflections on his/her own teaching, and observations on teaching by peers. The following pattern is recommended for evaluation:

100 marks: to be given by the subject specialist on the basis of planning, use of resources, preparation of teaching aids, etc. These marks will be given in three instalments: 25 after 4 weeks, 25 after 8 weeks, the remaining 50 at the end of the internship programme.

100 marks: to be given by the regular supervisor on the basis of classroom teaching in the same kind of instalments as are mentioned above;

50 marks: to be given by 2 rotational supervisors.

50 marks: to be given by the regular supervisor on the basis of the reflective journal maintained by the student.

Size of Sections
It is recommended that the average number of students in a section should not exceed 25 as indicated by NCTE in the context of different subjects. This will enable the aims of the new B.Ed. programme to be pursued with due regard for the expected quality of teaching and interaction as envisaged by NCFTE-2009 on which the NCTE’s guidelines are based.

Time-Table
The Courses carrying 100 marks are envisaged to be taught for approximately four hours a week, i.e. once in a two-hour period and twice in one-hour periods. The Courses carrying 50 marks will be taught for two hours per week. The numbers of hours will need to be adjusted during the weeks when students go out for field observation one day (or more, if required) per week. The same will apply to the workshops for EPCs. This average allocation implies a total of 26 hours for teaching and the remaining 14 hours in a working week for other institutional activities and self-study in the first year. The second year programme will follow a one-day time-table during internship when students go to schools for four days every working week for 16 weeks (i.e. 80 days). Hence, during internship, the teaching of courses and EPCs, and consultation with subject specialists, will be adjusted within the time available at the institute. Following the completion of internship, the normal amount of periods can be allotted to the three courses and EPCs.

Scheme of Examination
The B.Ed. programme, as outlined above, will carry 1400 marks. The first year will carry 800 marks and the second year will carry 600 marks. Internal assessment will constitute 30 marks in courses carrying 100 marks and 15 marks in courses carrying 50 marks. All EPCs will be evaluated internally.
## B. Ed. Two Year Course Outline

**Structure for the B.Ed. Student**

a. Seven Foundation Courses: 500 marks

b. Two Pedagogy Courses: 200 marks

c. One Elective Course: 100 marks

d. Four EPCs: 200 marks

e. Tutorial: 50 marks
   Field Observation: 50 marks
   School Experience Programme under Internship: 300 marks.

Please refer to B.Ed. Two Year course outline and year-wise outline for further clarity.
Foundation Courses

I\textsuperscript{st} Year

F.1 : Education in Contemporary India
F.2: Human Development, Diversity and Learning
F.3: Conceptual Foundations of Education
F.4: Gender, School and Society
F.5 : Knowledge, Disciplines and School Subjects

II\textsuperscript{nd} Year

F.6 : The Inclusive School
F.7 : Assessment for Learning
Aims and Objectives

This course aims to develop an understanding of education as an agenda for the nation state and its policy visions and efforts in evolving a national system of education. Students are expected to engage with the discourses on contemporary Indian society and education, to understand the national and local contexts in which a variety of schools function, and appreciate that a democratic society must be built on a universal, just and equitable system of education. This requires building a perspective on the processes of alienation and socio-economic deprivation of a large number of students, an analysis of the complex relationship between education and equality, and a critical appraisal of policies and recommendations of major commissions and committees.

The course will enable student-teachers to engage with studies on Indian society and education, acquire conceptual tools of critical analysis and the experience of engaging with diverse communities, children and schools. The course will include selections from theoretical readings, case studies, analyses of educational statistics and personal field engagement through focus group discussion, surveys, short term project work etc. The course consists of five units, covering policy-related issues and debates, and also their socio-economic context.

Unit I: The Constitutional Context

Education as a means of social justice in the Indian Constitution; Constitutional values and education (Preamble, Fundamental rights and duties); the Right to Free and Compulsory Education 2010 (RTE) and inclusion; Education in the concurrent list and its implications

Unit II: The Social Context of Educational Policy

Challenges posed for education by the socio-cultural and economic context: child-labour, child marriage, displacement and migration;

Composition of Indian society and its implications for education: Inequality, discrimination, exclusion and marginalization in the context of language, religion, caste, class, gender, region, and disability; Issues and challenges in the education of Dalits, OBCs, the Scheduled Tribes, girls and religious minorities; the role and agency of teachers in the education of above mentioned groups; Classroom ethos as an area of enquiry from the perspective of children from diverse socio-cultural and economic backgrounds;
Unit III: A Thematic Focus on Educational Policy

A critical review of commission reports and policy documents through a thematic focus, linking the contemporary context with salient debates since independence:

Linguistic Plurality and Language Policy: The Language Survey; debates on the ‘medium’ of learning; the ‘three-language formula’ for national and emotional integration, problems of implementation across states.

Work and Education: Zakir Hussain Committee, NayeeTaleem or Basic Education; work as a medium of learning, integrating skills with knowledge; Mudaliar Commission, multipurpose schools and citizenship education; critical analysis of the policy discourse on work, skills and vocational education;

Unit IV: Social and Educational Reform

Legacy of social reformers and their vision of education: Phule, Vidyasagar, Ambedkar, Ramabai, Gandhi and others; historical struggles for modernization of education in different regions;

Innovations and experiments: Shantiniketan, People’s Science Movement, etc.

Unit V: The System and its Structures

Schools in India: types and affiliation, schools run by autonomous institutions of the Central government (KVS, NVS, Sainik Schools, etc.); schools run by the State Governments; private schools; international schools; looking at institutional structures and stratification within the context of concerns for ‘quality’ and equity; management and public participation; role of key institutions in shaping the policy and discourse of education: NCTE, NCERT, NIOS, Boards of Education, etc; role of Directorates of Education, local bodies, e.g. Panchayati Raj institutions, municipal bodies.

Suggested Readings

GOI. (1986). *National policy of education*. GOI.

5. NCF-2005 available on [www.ncert.ac.in](http://www.ncert.ac.in)
Vision
This course will facilitate an understanding of the processes of development and learning and some of the major perspectives and theories underlying them. It will also enable conceptualization and appreciation of human diversity and the challenges emanating from it in institutions and society. The course aims at promoting an appreciation of the role of context and culture on development and learning and highlighting the holistic, yet unique nature of the growing child. The interdependence of all aspects of development – physical, cognitive, emotional, moral, and social, will be emphasized. The psychosocial difficulties, problems and challenges which children experience in their development and learning, particularly in the context of diversity, will also find articulation. Emphasis will be given to creating inter-linkages between theory, research and applications, particularly facilitating the development of insights for pedagogy and assessment. Development, diversity and learning are conceptualized as highly interrelated processes, the understanding of which gets complemented by practical experiences in real contexts and not merely theoretical abstractions. The course, thus, carries a rich practicum focus. In order that the theory-practice interface becomes more meaningful, it is proposed that the course be taught keeping in mind the basic organic unity between learning, diversity and development. The Indian socio-cultural perspective would form the context in which teaching, practicum, and course transaction are located.

Objectives
To facilitate a comprehensive understanding of the development, learning and uniqueness of the growing child in diverse socio-cultural contexts.
To foster the understanding and appreciation of inter-linkages between human development, diversity and uniqueness.
To critically examine key universal constructs in developmental psychology and educational psychology and their applications from the lens of cross-cultural frames.
To embed the classroom discussions, perspective building and practicum tasks in inclusive education.
To develop the potential for perspective building located in the Indian socio-cultural context through practicum, academic readings and classroom teaching/discussion.

Unit 1: Human Development
- Concept, Issues and Debates in Human Development.
  Growth, Maturation and Development
  Growth Curve and its implications for the Human Development Life-span
  Basic Principles of Development
  Debates: Nature v/s Nurture, Continuity v/s Discontinuity, Universal v/s Contextual

- Detailed study of the theories of Piaget, Vygotsky, Erikson, Bronfenbrenner, Kohlberg and Gilligan with special reference to Childhood and Adolescence in India.

- Educational Implications of the above theories for facilitating the development and uniqueness of Children, Adolescents and Young Adults.
Focus should be on locating the understanding of childhood and adolescence in the pluralistic nature of Indian society and in the context of poverty, globalization, and adult culture. Notions of multiple childhoods and adolescences should be emphasized.

**Unit 2: Human Diversity**
- Nature and Concept of Human Diversity: Variation, Heterogeneity and Celebrating Uniqueness; Social and Cultural Diversity
- Understanding how children differ in the following areas: Intelligence, Creativity, Self-concept and Motivation
- Understanding children and adolescents from diverse contexts: social, cultural, community, religion, caste, class, gender, linguistic and geographic location
- Role of the Teacher and strategies to deal with the differences and diversity
- Understanding diversity in the school in the context of inclusive education with special reference to children with special needs

The focus in this unit should be on developing strategies to deal with their educational, socio-emotional needs and counseling needs. This unit should be taught through a series of field engagements with a debrief on theory.

**Unit 3: Human Learning and Cognition**
- Exploring developmental and cultural differences in the way children think and learn from different perspectives: Behaviorism, Social Cognition, Cognitive Information Processing, Humanism and Personal and Social Constructivism
- Implications of the above for curriculum development, design of learning activities and classroom processes, pedagogic practices, and creating democratic learning environments that include diverse children’s knowledge and social experiences in the classroom.

It is expected that the theoretical concepts drawn from the above stated approaches will serve to understand:

Learning as a natural, biological process of adaptation; an interaction between inherent biological structures and processes and the environment, situating the discussion in the Piagetian perspective; conditioning and imitative/observational learning as explained in behaviorism and social cognitive theory of Bandura.

Learning as a personal process of meaning making; Personal/Radical Constructivism.

Learning as a social process of knowledge construction; as a process of negotiating personal knowledge, restructuring it and constructing shared understanding: Social Constructivism-Vygotsky’s approach to learning; Situated cognition.

Learning as a process of becoming; Humanistic approach focused on discovery and evolution of self: Maslow and Carl Rogers.
Suggested Framework for Practicum

Objectives
To facilitate the understanding of theoretical concepts and ideas, drawing from the personal and practical field experiences of student teachers.

To develop a contextual and critical understanding of the theories and approaches students have studied, through field engagement.

To promote self reflexivity and the capacity to appreciate the interrelatedness of the processes of development, diversity and learning, through their experiences with children, schools, and communities in real contexts.

Suggested List of Tasks
Documenting and analyzing the self-description/ narratives of children/ and adolescents of two varying developmental stages to understand the development of their self-concept and identity and the factors influencing them.

Organising classroom debates on critical contemporary concerns, such as high parental expectations from children; competitive social ethos and its impact on children; examination pressures on children’s psychological health; challenges of integrating children from diverse socio-economic and cultural contexts; peer pressures and the influence of social media. The discussion should focus on whether these are desirable or not, giving reasons in support of the position taken.

Planning a self-reflective task for student teachers which enable them to analyse how parenting practices, family culture and their experiences at school, influenced the development of their conscience.

Observing the peer associations, interactions and games which children of different age groups engage in. Analysing the effect of these on their gender identity, sexuality and societal attitudes with particular focus on diversity related to caste, disability, language and religion.

Interviewing children who are making the transition from primary to secondary and secondary to senior secondary stage to identify the challenges which they face and how they deal with them. Focus should be on connecting with stage theories of development and spelling out the role of teachers and parents in this regard.

Analysing the childhood experiences of student teachers which they believe enhanced or stifled their creativity and based on this, developing strategies for fostering the creative potential of their students.

Interviewing a few children who have recently migrated to Delhi and joined a mainstream school, with a view to identifying the challenges and difficulties that they face. Focus should be on adjustment, peer relations, and classroom dynamics. Based on this, developing a plan of action that will address their special needs.

Observing and interacting with any one class to identify the barriers to inclusive education. Developing a short action plan describing how the class could be made more inclusive. Focus
should be on the physical environment, psycho-social environment, interface with the whole school and networking with outside agencies.

Making student teachers identify, describe and write their initial perceptions of children’s thinking and learning and revisit the same based on the theories / approaches which they study and their experiences at school.

Analyzing media influences on children’s and adolescents’ behaviour, ambitions, aspirations, body image and identity.

**Note**

Each of the above tasks may be done on student teachers or on school students as the need may be. At least five tasks should be done from the above list.

**Suggested Readings**

B.Ed. Two Year Programme

F.3: Conceptual Foundations of Education

Maximum Marks: 100

The main objective of this paper are: (i) to promote reflective thinking among students; (ii) to sharpen their perception of the concepts involved in educational practice (iii) to enhance their capacity to formulate responses to the reality of education. The paper is divided into three units. All the three units are, to be covered.

**Unit A:**

i) **Basic Concepts in Philosophy of Education:** teaching, training, learning and education in the context of the child’s nature, growth and development.

ii) **Epistemological Basis of Education:** knowledge, reason and belief, rationality; experience and awareness, values and ideals with reference to school subjects

iii) **Methodological Options in Education:** Assumptions about human nature; critique of behaviorism and its three alternatives:

   A. Activity: With reference to Dewey’s ideas on learning and Gandhi’s NaïTalim

   B. Discovery: With reference to Montessori’s description of children’s intellectual growth and Dewey’s concept of inquiry

   C. Dialogue: With reference to Plato (Allegory of the Cave), the Upanishads(The Nachiketa-Yama dialogue) and Buber’s idea of a dialogue between teacher and student (‘I and Thou’) along with a discussion on the role of a teacher

**Unit B: Basic Concepts in the Sociology of Education:**

(i) Democracy and the State

(ii) **Constitutional Values:** Equality, Freedom, Social Justice, Inclusiveness and Secularism.

(iii) Socialisation, Role of family and school, Conflicts and coherence.

(iv) Knowledge and political ideology in relation to curriculum and textbooks.

(v) The role of culture, economy, and historical forces in shaping the aims of education. Dominance, conflict and resistance in the context of education.
Unit C: Introduction to the main ideas of the following thinkers concerning aims of education and pedagogic practices:

John Dewey, Gandhi, Tagore, Freire and J. Krishnamurti

Project
A detailed study of one of the thinkers mentioned in the entire syllabus

Suggested Reading List

Montessori, Maria. 1965 Spontaneous Activity in Education New York: Schocken Books
Kumar, Krishna. 1977. Raaj Samajaur Shiksha. Delhi: Rajkamal
Kumar, Krishna. 2004. What is Worth Teaching? Delhi: Orient Longman
Dhankar, Rohit(2006) Shiksha Aur Samajh Haryana: Aadhar Prakashan

B.Ed. Two Year Programme
F.4: Gender, School and Society

Maximum Marks: 50

Unit I: Key Constructs in Gender
Patriarchy, power, resources and opportunities, sex, A brief introduction to feminist theories: radical, liberal, psychoanalyst, socialist and Marxist.

Unit II: Social Construction of Gender
2.1 Socialization in the family and at school, occupation and identity (identities largely unavailable to women such as farmer, scientist etc.) stereotypes about girls and women prevalent in the society, media and literature;
2.2 Gender and its intersection with poverty, caste, class, religion, disability, and region (rural, urban and tribal areas); essentialized male and female identities and the introduction to third gender; discourse of LGBT

Unit III: Gender and School
3.1 Girls as learners, hidden curriculum(teacher attitudes, expectations and peer culture), Epistemological Issues in mathematics, social sciences and life sciences using gender as a lens, subject choice made in Grade XI and its relation with gender
3.2 Gendered representations in textbooks (illustrations and text), policy interventions in school education, construct of gender in national curriculum frameworks, teacher in India: an analysis using gender as a lens.

Suggested Projects
Analysis of films including songs, advertisements in print and electronic media.
Analysis of folk songs, literature in different languages and myths
An analytical study of textbooks published by different states, private publishers and NCERT.
A study of data about girls from scheduled castes and tribes, minorities and rural backgrounds from different sources such as, enrollment in school and university at different levels, results of Grade X and Grade XII examinations and enrollment in different programmes in higher education.
A critical study of schemes such as KGBV, NPEGEL, Ladli and so on.
A comparative study of the daily routine of a girl and boy from the same family.

Suggested Reading List

Kumar, Krishna. 2010. ‘Culture, State and Girls: An Educational Perspective’ Economic and Political Weekly Vol. XLV No. 17 April 24

Kumar, Krishna. 2013 Choodi Bazar Mein Ladki. Rajkamal: New Delhi

Patel, Tulsi. 2007.‘Female Foeticide, Family Planning and State-Society Intersection in India’ in Tulsi Patel (ed.), Sex-Selective Abortion in India Delhi: Sage Publications

This compulsory course aims to introduce all the students to the basis on which knowledge is classified into disciplines and subjects. The syllabus has the following specific aims:

1. To enable students to analyze the structure of knowledge as reflected in disciplinary streams and subjects;
2. To enable students to notice the links between disciplines and school subjects;
3. To examine the structure of the school curriculum from the primary to the secondary stages in terms of the underlying structure of knowledge;
4. To encourage students to reflect on their own education and notice how their interests and capacities have been shaped by the structure of curriculum and other external factors. This aim will be achieved with the help of a practicum.

Unit 1: Introduction
Key question: ‘Why does knowledge need to be classified?’; Introduction to epistemology; Knowledge, curiosity and inquiry; Knowledge as a system: the role played by our concept of knowledge in shaping our teaching and learning practices.

Disciplinary streams: their historical origins and evolution; the problem of classifying them; levels of classification, e.g. ‘Science’ and ‘Arts’; ‘Humanities’ and ‘Social Science’;

Unit 2: Streams and Subjects
Nature of knowledge (i.e. ways of knowing and bodies of knowledge) placed under distinct disciplinary streams: Science, Social Science, Language, Mathematics; interrelationships among streams; overlaps and gaps in different kinds of classification; the idea of ‘subjects’ to be learnt at school; their distinct pedagogical demands at different stages of school education; the school time-table as a structuring device: its treatment of the relative importance of different streams and the subjects placed under them at different stages of education; Problem of classifying and accommodating certain areas of learning, e.g. arts, crafts, work, peace, etc. Implications of curricular divisions for learner-centred pedagogy: issues and challenges.

Unit 3: Knowledge and Curriculum Policy
Study of relevant parts and recommendations of major reports that have shaped curriculum policies in India since Independence (relevant parts of the following documents to be studied in order to examine the assumptions about knowledge underlying their recommendations):
Secondary Education Commission (Mudaliar Report)
Education Commission (Kothari Report)
The Ten-Year School (Ishwar Bhai Patel Report)
Learning without Burden (Yash Pal Report)
National Curriculum Framework

Persistent debates in curriculum policy: integrated approach vs. subject-specific teaching; can values be taught?; academic vs. vocational subjects; etc.

**Unit IV: Knowledge in Syllabus and Textbooks**
Distinction and relation between ‘Curriculum’ and ‘Syllabus’
Relation between Syllabus and Textbooks; implications of ‘prescribing’ a textbook; importance of other sources and resources of knowledge; role of different agencies and their functions in shaping the syllabus: Boards of Examination, NCERT, etc; ‘examination’ as a system; impact of the examination system on socially popular concept of knowledge and the practices of teaching based on it;

**Unit V: Disciplinary Streams, Choices and Opportunities**
The idea of choice in the 10+2 system; factors affecting choice of subjects by students; Internal factors, (e.g. interest, teacher, etc.) vs. external factors (e.g. availability, family, market, etc.); interdisciplinary combinations and choices;

Social perceptions and stereotypes: why are certain subjects considered more difficult?; the impact of knowledge-related stereotypes on choices made by schools, parents and students; Knowledge and opportunities: employment and careers. Knowledge, status and power.

**Practicum:** Analysis of factors that have shaped personal trajectories of students in the context of disciplines and subject choices made in school and college, interest and capacities, leading to a reflective essay.

**Readings**

Joseph Schwab: The Structure of Knowledge and the Curriculum
Paulos, John Allen 1990 Innumeracy Mathematical Illiteracy and its Consequences
Vintage Books
This course encompasses the nature and needs of children with diverse needs in an inclusive educational set up - social, academic and emotional; and the role of teachers in addressing these needs. But, the thrust of the course is on the needs of children with disabilities as the socially, linguistically and economically marginalised children and their needs are covered in the other core papers of the programme.

**Aim of the Course**
This course is designed to enable the students to:

- demonstrate knowledge of different perspectives in the area of education of children with disabilities
- develop sensitivity and positive attitudes towards children with special needs identify the needs of children with diversities
- appreciate the significance of special schools and regular schools in the education of children with disabilities
- plan need-based programmes for all children with varied abilities in the classroom
- use human and material resources in the classroom
- use specific strategies involving skills in teaching special needs children in inclusive classrooms
- modify appropriate learner-friendly evaluation procedures
- incorporate innovative practices to respond to education of children with special needs
- critique policies and contribute to the formulation of policy
- critique implementation of policies and contribute to implementation of laws pertaining to education of children with special needs.

**UNIT I: Concept of special needs and inclusion with reference to children with disabilities**

1. Understanding diversities: concept, types (disability as a dimension of diversity)
2. Disability as a social construct, classification of disability and its educational implications:
   a. Sensory Impairment (Hearing Impairment, Visual Impairment and Deaf Blind)
   c. Physical Disabilities: (cerebral palsy and loco motor)

3. Philosophy of inclusion with special reference to children with disabilities
(Discussion on Inclusive education as the best alternative across all levels and categories of disabilities)

The significance of the positioning of special schools and inclusive schools in the education of children with disabilities

The language of inclusion- putting people first rather than the disability a person may have

4. Process of inclusion: Concerns and issues across disabilities
5. Contextualization of inclusion for diverse learners
6. Modification of curriculum including assessment
7. Universal design for teaching learning process
8. Reasonable accommodations
9. Instructional adaptations

UNIT II: Towards inclusion: Paradigm and policy perspective with reference to children with disabilities

1. Historical perspective and contemporary trends:
2. Journey from charity, medical, social towards human rights based model
3. Succession from segregation, integration and inclusion
7. National Institutes of disabilities (Indian), National Trust (1999) and NGO’s

UNIT III: Inclusive practices in classrooms: Position of teacher, support structures and networks

1. School readiness (infrastructural including technologies, pedagogical and attitudinal) for addressing the diverse needs of children with disabilities
2. Role of Teachers (both regular and special)
3. Pedagogical strategies: cooperative learning strategies in the classroom, peer tutoring, social learning, buddy system, reflective teaching, multisensory and multidisciplinary approach
4. Supportive services required for meeting special needs in school and collaboration required for meeting special needs in the classroom: general teacher, special teacher, speech therapist, occupational therapist, child and clinical psychologist and other outsourced experts, family, multi disciplinary team (along with child in the decision making process)
5. Collaboration between teacher and special educator, parents, outsourced experts, students and others as a continuous process
Practicum

- Visits to inclusive/special school with an objective of observing and understanding the transactional processes, school ethos and student-teacher relationships. Report of the visits to be submitted and presented.
- Preparation of individualised learning materials to meet the needs of a child with any of the disabilities discussed with a report on how it/they can be effectively used.
- Carry out case study of a child with any of the disabilities discussed, with a presentation in the class.
- Taking any topic of your interest from the school curriculum, chalk out the process of teaching it along with teaching aids, in an inclusive classroom. The inclusive classroom should have at least 2 students with disability.

B.Ed. Two Year Programme

F.7: Assessment for Learning

Maximum Marks: 50

Unit 1: Basic Concepts and Overview

1.1 Basic Concepts: assessment, evaluation, measurement, test, examination, formative and summative evaluation, continuous and comprehensive assessment mandated under RTE, and grading.

1.2 Purpose of assessment in different paradigms: (a) behaviourist (with its limited view on learning as behaviour), (b) constructivist paradigm and (c) socio-culturalist paradigm; distinction between 'assessment of learning' and 'assessment for learning'; assessment as a basis for taking pedagogic decisions.

Unit 2: Analysis of Existing Practices of Assessment

2.1 A critical review of current evaluation practices and their assumptions about learning and development; examination for selection or rejection; role of traditional examinations in maintaining social and cultural hierarchy; impact of examination-driven teaching on school culture and on pedagogy; content-confined testing; critique of prevailing quiz culture and popular tests such as ASSET and Olympiad; commercialization of testing.

2.2 Impact of the prevailing assessment practices on students’ learning, their motivation and identity; detrimental effects of labeling students as slow or bright or declaring them failures; perspective behind no-detention policy in elementary grades under RTE.

Unit 3: Assessment in the Classroom and Record Keeping

3.1 Expanding notions of learning in a constructivist perspective; ability to develop indicators for assessment; tasks for assessment: projects, assignments, formulating tasks and questions that engage the learner and demonstrate the process of thinking; scope for original responses, observation of learning processes by self, by peers, by teacher; organising and planning for student portfolios and developing rubrics for portfolio assessment, teachers’ diaries, group activities for assessment.

3.2 Dimensions and levels of learning, assessing conceptual development, recall of facts and concepts, application of specific skills, problem-solving; application of learning to diverse and new situations.

3.3 Assessment of meaning-making propensity, abstraction of ideas from experiences, identifying links and relationships; inference, analysis and reflection, originality and initiative, flexibility.
**Unit 4: Feedback**

4.1 Feedback as an essential component of assessment; types of teacher feedback (written and oral); feedback to students and feedback to parents; peers’ feedback, scores, grades and qualitative descriptions, developing and maintaining a comprehensive learner profile; challenges of assessment

**Suggested Reading List**

Peer feedback and evaluation in Sanctuary Schools Dr Sudha Premnath and Ranjani Ranganathan (http://www.ashanet.org/projects-new/documents/701/Peer%20feedback%20and%20evaluation%20in%20Sanctuary%20Schools.pdf)

B.Ed. Two Year Programme

P.1.1 : Language

Maximum Marks: 100

Unit 1: General Introduction on Language
What is Language? various components of language; Functions of language; How different are different languages? Critical analysis of the following terms: Dialect, Standard and Non-standard language, classical ;Characterizing mother tongue, first language, and second language, bilingual and multilinguals.

Unit 2: Language Policies and Politics
Power, identity, and politics of language; Language as a medium of instruction and debates about English as a medium of instruction; The recommendations of NCF-2005 on language education

Unit 3: Language and Literacy in the Context of School
Language environment of school and the varied nature of Indian classrooms; Language Learner’s profile: language environment at home; Characterizing bilingualism and multilingualism; Notions about interference or bridge; School’s Expectations: Views relating to child’s home language and literacy practices; What is viewed as “right” and “wrong” language in schools and the underlying assumptions; Critically understanding “errors” and the insights they provide.

Unit 4: Language Acquisition
Language learning in early childhood; Language and Cognition: Piaget, Vygotsky, And Chomsky on language acquisition and relevance of their views for the language teacher; Second language acquisition

Unit 5: Language Processes and the Classroom Context
Oral language in the classrooms; Participation in the classroom; Facilitating language interaction and independence. Creating secure classroom environment for language use; Space for “risk taking”; Reading: Engaging with books of different types; Comprehension of stories and non-fiction (content area texts) ;Response to literature: Aesthetic and emotive aspect of reading; Writing as a composing process: Problem solving, developing a sense of audience, purpose, and understanding the process of writing.
Unit 6: Examining the language curriculum
Syllabus of different languages; Review of textbooks, use of literature in language textbooks, critical analysis of exercises and; Moving beyond the textbook: Children’s literature for different age groups ;Classroom practices in India

Unit 7: Challenges in Language Learning
Issues of non-comprehension; lack of independence in language use; Examining the role of school context in creating difficulties for language learners ;Understanding language “disability” and the language teacher’s role in dealing with it.

B.Ed. Two Year Programme

P.1.2 : Science

Maximum Marks: 100

Course Objective
This course would enable the pupil teachers to understand Science as a discipline through its philosophical and epistemological perspectives. The insights into the nature of science and how children construct knowledge science would help in developing a critical understanding about the curriculum in science and how it unfolds through the transactional processes at the various levels of school education. Thus, this course aims to lead the pupil teachers from an understanding about science discipline to a holistic understanding about science-education situated in learner context and social realities.

Unit I: Nature of Science and Science Education
- The nature of science- science as a process and science as a body of knowledge, as a social enterprise; Science-Technology-Society-Environment (STSE) Interface.
- A historical perspective: the development of science as a discipline; awareness of the contributions of Popper and Kuhn.
- A critical understanding of science as a subject at the various levels of school education and thereby of the purpose of science education at the various levels of school education.
- Development of Scientific Temper, public understanding of science, ethics of science; science education in the context of a developing country.

Unit II: The learner Context
- Children’s conceptualisation of scientific phenomena- Pre-conceptions in science and their significance in knowledge constructions (with linkages to learning at the primary level); Misconceptions and ‘alternative frameworks’ in science.
- Understanding children’s fear of science addressing their inabilities to correlate the observed phenomena with micro level processes and with their symbolic/mathematical representations.
- Construction of knowledge in science: conceptual schemes, concept maps.
- Role and limitation of language: its contribution towards expression, articulation and the understanding of science.
- Addressing Learner-diversity: gender issues, special need-learners, contextual factors.

Practicum (Unit I-II): Project/assignment based on school experience- observations.

Unit III: The science curriculum
- The nature and underlying criteria for a science curriculum and content organization.
- Approaches to curriculum transaction: integrated approach and disciplinary approach; Interdisciplinarity.
A critical review of Science Curriculum at the National Level i.e. NCERT curriculum, at the State Level i.e. SCERT curriculum, Hoshangabad Science Teaching Programme (HSTP); An awareness about science curricula at international level such as Nuffield Science, Harvard Science, project 2061 etc.

Criteria for the analysis of science textbooks (including issues related to gender, the socio-cultural context, etc.)

Practicum: Critical analysis of existing science syllabi and textbooks.

Unit IV: Enrichment of Content Knowledge

- Devising content analysis and enrichment programme for selective content areas in physics, chemistry and biology (working through group/workshop/seminar modes).
- Developing representations/creative expressions of the outcomes of content enrichment.
- Taking comprehensive feedback from peers regarding the processes and outcomes of content enrichment.

Unit V: Professional Development of Science Teacher

- Need for professional development
- Professional development at the individual, organisational and governmental level.
- Teacher as a researcher: Action research by teachers in collaboration with research institutions, voluntary organizations, etc.

Practicum : Conducting Action Research in any area related to science education.

Suggested Reading List

*National Curriculum Framework*, (2005), NCERT: New Delhi

*Rashtriya Madhyamik Shiksha Abhiyan* (2005), MHRD: New Delhi

UNIT 1: Introduction to Mathematical Thinking

(i) Mathematics as study of creating, discerning and generalising patterns: Identifying and analysing abstract patterns, patterns of shapes, patterns of motion, patterns of repeating chance, numerical patterns.

(ii) Understanding Mathematics as a humanly created subject: Creating Mathematical structures: idea of axioms, postulates and proofs, what is a proof? Different methods of proofs: direct proof, indirect proof, counter examples, proof by induction.

(iii) Socio-cultural, economic and political factors in the development of mathematics. Everyday mathematics, multicultural mathematics; its use in decision making, at the workplace, etc.

(iv) Societal beliefs related to ‘knowing’ and ‘doing’ mathematics. Critically challenging the sociological beliefs related to mathematical abilities, mathematics confined to arithmetic.

Readings and resources

MESE-001(2003). Teaching and Learning Mathematics. IGNOU series

UNIT 2: Learning Mathematics

(i) Developmental progression in the learning of mathematical concepts- Piaget, Skemp, Bruner and Vygotsky; Fischbein on intuitive thinking

(ii) Processes of dealing with abstractions, particularisation and generalisation. Studying algorithms; what works and how?

(iii) Focus on mathematical processes- Problem solving, problem-posing, patterning, reasoning, abstraction and generalisation; argumentation and justification

(iv) Sociocultural perspectives in mathematics learning- Situated learning; social construction of knowledge; social interaction and community of practice

(v) Historical evolution of concepts –understanding how concepts evolved, power-play in legitimising concepts

Readings

UNIT 3: How Should we Teach Mathematics?

(i) Culture of learning- Creating dynamic classroom environments; sharing and exploring ideas, encouraging diverse and innovative procedures, using multiple ways to solve problems, making conjectures, seeking generalisations; respecting diverse capabilities; use of context; metacognition

(ii) Role of Communication in classroom- Math talk; building a community of mathematicians in classrooms; constructing mathematical ideas by providing scope for exploration, explanation and evaluation of children’s work

(iii) Use of resources, activities, story-telling and technology in initiating mathematical thinking.

(iv) Notions related to mathematical ‘ability’; promoting growth mindset, depth versus speed; math anxiety

(v) Teacher’s beliefs and knowledge about the nature of mathematics and mathematical learning, teachers’agency in school math reform.
Readings and resources

Smith & Stein (2011). Five practices for orchestrating productive mathematics discussions.

TIMSS Videos of mathematics classrooms available at:
http://www.timssvideo.com/videos/Mathematics
Deborah Ball video on eliciting student thinking, MSRI interview of 6th graders.
http://www.msri.org/workshops/696/schedules/16544

UNIT 4: Mathematics for Equity and Social Justice

(i) Why teach ‘mathematics to all’? – Concerns and challenges
(ii) Issues of gender, class and culture in mathematics learning and achievement - Expectations, attitudes and stereotypes; access to higher mathematics; interrogating the notion of ‘achievement gap’; construction of learners’ identity in a mathematics classroom
(iii) Addressing the concerns of societal as well as mathematical equity

Readings:
Rousseau, C., & Tate, W. (2003). No time like the present: Reflecting on equity in school mathematics. Theory Into Practice, 42(3).

Engagement with the Field
An understanding of the relationship between the discipline and a selection of school curriculum will be enhanced through observations and projects to address the following issues: What knowledge is valued? How is mathematics experienced in school settings and how are learner identities constructed? How do communities shape knowledge production and, there, what counts as useful mathematical knowledge? How might scholars and teachers...
work with community-based knowledge makers to develop collaborative knowledge resources?

Assignments/Projects

1. Analysis of books, folk games, and other resource materials
2. Observation of children doing everyday math, playing folk games; community numeracy practices
3. Classroom observations and analysis of mathematics classrooms
4. Use and setting up of a mathematics lab
5. Development of manipulatives, games, low-cost activity materials
B.Ed. Two Year Programme

P.1.4 : Social Science

Maximum Marks: 100

Objectives of the Course

To enable the prospective teachers to address the following questions:

- What is the nature and philosophy of Social Science?
- What is his/her reflective understanding of contemporary society and the relevance in teaching of social science in schools?
- What is the status of learning social science at secondary school level?
- What are the issues and challenges in articulating the nature of social science curriculum and its pedagogical practices?
- How does one evaluate and assess the teaching and learning processes and its valuable implications in the professional development of teachers?

Units of Study

Unit I  Evolutionary Framework of Social Science

- An Overview of the Foundations of each Discipline:
  a) History and Geography- Temporal and Spatial Dimensions.

- Specialised Knowledge versus Inter Disciplinary Knowledge
- Trajectory of Social Science Evolutionary Process: Philosophical and Theoretical discourses
- Concept of Social Science and Social Studies
- Evolution of Social Science Curriculum to the present stage in terms of various Indian educational policies.

Unit II  Social Science in Schools

- Challenges in the development of Social Science Curriculum
- General Approaches in the construction of social science curriculum: thematic organization: Interdisciplinary, multi disciplinary and fused frameworks
- Cross Cultural perspectives and issues in social science
- Teaching of Social Science:
  Development of Critical Enquiry, Critical Thinking and Problem Solving in building perspectives in Social Sciences: Social, Historical, Environmental, Economic and Constitutional perspectives
Unit III Pedagogical practices in Social Science Curriculum
- Social Science and Indian School Curricula in search of new Directions.
- Review different Commissions/Committees Reports
- Critical Review of Social Science Text books from class 6th to 10th
- Concerns in Teaching Social Science: Diversity, Gender and Special Needs

Unit IV Contexts in Social Science instruction
- Inclusive Classroom
- Democratic Spaces
- ICT in Social Sciences
- Development of Unit Plan: Thematic mapping of curricular content

Unit V Evaluation in Social Science
- Challenges in evaluation:
  Assessing learners' perspectives on various social issues ,
  Assessing learners’ action for a social change at the individual level

Unit VI Professional Development of Social Science Teacher
- Social Science Teacher as A Reflective Practitioner
- In-Service Teacher Development Programmes

Suggested Practicum
a) Collaborative projects on selected cross curricular areas taken from school syllabus: written assignments on issues, seminar presentation, action research with peers' involvement.

b) Establishment and Enrichment of Social Science Resource Centre
c) Enrichment of the subject areas like geography, history, political and social life and economics.
d) Engagement with curriculum policies/documents and curriculum frameworks.
e) Critical appraisal of existing social science curriculum and text book at school level

f) Development of Unit / Thematic Plan.
g) Organizing field trips as learning experience.
h) Collection and Maintenance of relevant instructional resources.

Suggested Readings

Edgar, B.W. & Stanely (1958), Teaching social studies in high school, Heath and company, Boston D.C.

Kumar, Sandeep (2013). Teaching of Social Science, Project Report, University of Delhi, Delhi.

Rationale
This paper is aimed at encouraging Commerce students to re-engage with their discipline and revisit prevalent conceptualizations and practices. The paper focuses on the place of commerce education in society and the potential role that it can play in developing commercially conscientious citizens.

Unit 1 Nature of Commerce
- Commerce Education: Evolution and Foundations
  - Historical and Socio-Political Context of Commerce Education
- Relationship of Commerce with business, trade, industry and economy: A Macro Perspective

Unit 2 Understanding Knowledge in Commerce
- Interrelationships within Commerce (Accountancy and Business Studies/Management)
- Commerce and Social Sciences (linkages with Economics, Sociology, Geography and Law)

Unit 3 Commerce and Society
- Understanding Ethics and Values
- Contemporary Business Environment and Commerce Education

Unit 4 Commerce as a School Subject
- Place of Commerce in School Curricula (Curriculum Frameworks/ Policy and Perspectives, National and International Position)
- Commerce Syllabus and Textbooks: Development and Organization
- Theory and Practice: Mending the Gaps in Commerce Curriculum

Unit 5 Understanding Commerce Pedagogy
- Commerce Classroom: Processes and Challenges.
  - Needs of commerce learners: Andragogy/Pedagogy.
- Understanding Pedagogy in Accountancy and Business Studies: Specifics of Classroom Transaction
Suggested Readings

B.Ed. Two Year Programme

P.2.1 : English

Maximum Marks: 100

A. Theory

Unit 1: Approaches and Methods in English Language Teaching

Various approaches, methods and techniques in use for teaching English.

- The Direct Method
- The Structural Approach
- Communicative Language Teaching
- Task-based Language Learning
- Language Learning in the Constructivist Paradigm

Unit 2: Listening and Speaking Skills

2.A Listening

a. The Concept of Listening
b. Sub-skills of Listening
c. Tasks, Materials and Resources for developing the Listening skill: story-telling, dialogues, situational conversations, role plays, simulations, speech, games and contexts, language laboratories, pictures, authentic materials and multi-media resources.
d. Assessing Listening.

2.B Speaking

a. Phonetics: the consonant and vowel system, intonation, stress, pitch.
b. Tasks, materials and resources for developing the speaking skill including story telling, dialogues, situational conversations, role plays, simulations, speech games and contexts, language laboratories, pictures, authentic materials and multi-media resources.

d. Assessing Listening.

Unit 3: The Reading Skill

a. Teaching Reading : Theories; the mechanics of Reading; the sub skills of Reading; Reading as a process. The various stages of different types of Reading: extensive and intensive reading.
b. Tasks, Materials and Resources for developing the Reading Skill through practice activities and games including skimming, scanning and comprehension.
c. Developing study skills including using a thesauruses, dictionary, encyclopedia.
d. Assessing Reading.
Unit 4: The Writing Skill

4.a Teaching Writing: The mechanics of writing including punctuation, spelling, hand-writing, indentation; writing as a process; the various stages of different types of writing.

4.b Tasks, Resources and Materials for developing the writing skills through practice activities and games for messages, reflective journals, diary writing, notices, circulars, letters, articles, reports, dialogues, speeches, advertisements; creative writing such as poetry – writing, short stories.

4.c Developing study skills: referring to dictionary, thesaurus / encyclopedia, note making, note taking, summarizing, making bibliographic entries.

4.d Assessing Writing, Giving feedback

Unit 5: Teaching Grammar and Vocabulary

5.a Concerns in teaching of Grammar and Vocabulary

5.b Teaching Grammar: Grammar components: direct / indirect speech, parts of speech, active / passive voice, modals / auxiliaries, types of sentences, semantic markers, determiners’ and so on.

5.c Teaching Vocabulary: Adhoc, Active, Passive Vocabulary, Compound Words, Root words, Base words, Content and Structure words.

5.d Tasks, Materials and Resources for teaching grammar and vocabulary

5.e Assessing Grammar and Vocabulary

Unit 6: Teaching Literature

6.a Literature in the School Curriculum: Need, Objectives and Relevance

6.b The relative importance of classics and popular literature in English

6.c Tasks and materials for developing study skills in English Literary forms including essays, short one – act play, short story, novel, long play, poetry, biography, autobiography

6.d Planning lessons in prose, poetry, drama, novel, short story at various schools levels.

Unit 7: Planning and Organisation in ELT

7.a Developing and using audio-visual aids, including CALL programmes

7.b Assessing syllabi in use in schools in India

7.c Selecting course materials for teaching English at various levels

7.d Selecting, adapting and using authentic materials for use in the English Class

7.e Using textbooks, teachers guides, supplementary readers and wider library materials effectively

7.f Organising co-curricular activities

7.g Planning tasks for remedial teaching in LSRW

7.h Avenues for professional growth and leadership
Unit 8: Evaluation in English language and Literature

8.a Formative and Summative Evaluation: Objectives and Implications

8.b Issues and concerns in the Assessment of English at various schools levels

B. Practicum

- Planning lessons based on different ELT approaches
- Development a detailed activity bank for different skill areas for learners from different types of schools
- Developing resources such as props, charts, flash cards, audio-cassettes, games and CALL programmes for teaching speaking and listening
- Developing Extensive Reading Lists an anthologies for Learners of varying linguistic ability
- A detailed analysis of the course materials in use at different class levels in different types of schools the English textbooks used during School Experience Programme
- Developing Bridge courses and Remedial Programmes
- Organization of co-curricular activities including extempore, elocution, declamation, speech, poetry recitation, debate, book discussion, poetry writing, slogan writing, poster making and so on.
- Board Work
- Developing a Question Paper
- Developing linguistic profiles of learners

Reading List

उद्देश्य :

- शिक्षा एवं विद्यालयी पाठ्यचयाँ में भाषा के महत्त्व को रेखांकित कर सकेंगे।
- हिन्दी भाषा एवं साहित्य शिक्षण के उद्देश्यों की पूर्ति के लिए प्रभावी साधनों एवं समृद्धित विधियों का प्रयोग कर सकेंगे।
- अपने विद्यार्थियों में अपेक्षित भाषा कौशलों के विकास के लिए स्वयं में ही भाषा- कौशलों के विकास के लिए सतत प्रयत्नशील रहेंगे।
- प्रथम भाषा अधिग्रहण की समस्याओं को समझकर उन्हें दूर करने का प्रयास कर सकेंगे।
- अपने विद्यार्थियों के अधिग्रहण का समृद्धित मूल्यांकन कर सकेंगे।

इकाई 1 हिन्दी भाषा- शिक्षण: सैद्धान्तिक परिप्रेक्ष्य

- भाषा: अर्थ, महत्त्व एवं प्रकार, हिन्दी भाषा की प्रकृति,
- भाषा और सम्प्रेषण, भाषा और विचार, भाषा और सृजन
- हिन्दी की व्यक्तिफलक व्यवस्था - ध्वनि विचार, वर्ण विचार, शब्द विचार, वाक्य विचार,
- हिन्दी शिक्षण के उद्देश्य- प्रथम भाषा एवं अन्य भाषा के रूप में, संपर्क भाषा एवं राजभाषा के रूप में, विद्यालयी पाठ्यचयाँ में हिन्दी का स्थान, विकिन्न शिक्षा आयोगों एवं समितियों की संस्तुतियाँ, विद्यालयों में हिन्दी की यथार्थ स्थिति

इकाई 2 भाषा कौशलों का विकास

- भाषा कौशलों से अभिलाष, भाषा शिक्षण में उनका स्थान एवं महत्त्व
- श्रवण कौशल - तात्पर्य, महत्व, उद्देश्य, प्रकार, शिक्षण विधियाँ, कौशल विकासक क्रियाएँ, मूल्यांकन
- मौखिक अभिव्यक्ति कौशल - तात्पर्य, महत्व, उद्देश्य, प्रकार, मौखिक रचना की विशेषताएँ, उच्चरण संबंधी सामान्य दोष, कारण एवं निराकरण, कौशल विकासक क्रियाएँ, मूल्यांकन
- पठन कौशल - तात्पर्य, महत्व, उद्देश्य, पठन की विशेषताएँ, उद्देश्यों के संदर्भ में पठन के प्रकार, संस्थान तथा मौलिक पठन, गहन अध्ययनलिखि पठन तथा व्यापक पठन, पठन कौशल विकासक क्रियाएँ, पठन दोषः कारण तथा निराकरण
लेखन कौशल - तात्पर्य, महत्व, शिक्षण - उद्देश्य, प्रभावी लेखन की विशेषताएं, लिखित अभिव्यक्ति के विविध रूप, लेखन कौशल विकासक क्रियाएं, लिखित कार्य का मूल्यांकन, संस्थागत कार्य, रचना शिक्षा - निर्देशित लेखन, स्वतंत्र लेखन
• उच्च स्तरीय भाषिक कौशलों का विकास

इकाई 3 हिंदी भाषा तथा साहित्य का शिक्षण
• हिंदी भाषा शिक्षण में व्याकरण का स्थान, महत्व एवं उपयोगिता, शिक्षण उद्देश्य तथा विधियाँ
• भाषा और साहित्य - अन्तःसंबंध और भिन्नता, साहित्य के सौन्दर्यबोध के तत्व
• कविता का रसास्वादन - महत्व, उद्देश्य, आस्वाद के धारात्मक, कविता - शिक्षण के पक्ष - भाव एवं कला पक्ष, शिक्षण - विधियाँ, आस्वादन में शिक्षक की भूमिका, सौन्दर्यबोध विकासक युक्तियाँ, मूल्यांकन
• गद्य शिक्षण - महत्व, उद्देश्य, गद्य विधाओं के विविध रूप (निबंध एवं पंक्तिशंक) तथा उनकी शिक्षण - विधियाँ, गद्य अद्यावधिनिष्ठ पाठ एवं विस्तृत अद्यावधिनिष्ठ पाठों की शिक्षण विधि में अंतर, मूल्यांकन
• भाषा एवं साहित्य की विभिन्न विधाओं के माध्यम से सृजनात्मकता एवं जीवन कौशलों का विकास,
• हिंदी भाषा और जनसंचार, जनसंचार के विविध रूप, जनसंचार माध्यमों की भाषा और विद्यालयों की भाषा पर उसका प्रभाव, हिंदी शिक्षण में जनसंचार माध्यमों की भूमिका

इकाई 4 हिंदी-शिक्षण : साधन और सामग्री
• हिंदी पाठ्यक्रम तथा पाठ्यपुस्तक - हिंदी पाठ्यक्रम का आलोचनात्मक अध्ययन, पाठ्यपुस्तकों तथा पुराने पुस्तकों का महत्व, उद्देश्य, विशेषताएं, निर्माण प्रक्रिया एवं मूल्यांकन, पाठ्यपुस्तक समीक्षा एवं पाठ्यपुस्तकों का समीक्षात्मक विश्लेषण
• हिंदी शिक्षण में प्रयुक्त शैक्षिक उपकरण - शैक्षिक उपकरणों का महत्व एवं उनकी उपयोगिता, उपकरणों के विविध रूप यांत्रिक एवं अयांत्रिक उपकरण, हिंदी शिक्षण में सूचना प्रौद्योगिकी का उपयोग, ई-अधिगम सामग्री, उपकरण एवं संसाधनों का प्रसारणकेंद्रीय उपयोग
• पाठ्यपुस्तक सहायक क्रियाएं - स्वरूप, प्रकार एवं भाषामित्त्वकता के विकास में उनका महत्व और योगदान
इकाई 5 मूल्यांकन

- मूल्यांकन की संकलपना, महत्व एवं विधियों, उद्देश्यनिष्ठ मूल्यांकन की आवश्यकता, सतत एवं व्यापक मूल्यांकन, मौखिक/ लिखित परीक्षण, परीक्षण प्रश्नों के प्रकार एवं उनकी निर्माण प्रक्रिया, सभी प्रकार के प्रश्नों के निर्माण का अभ्यास
- विद्यार्थियों के भाषा अधिगम में सामान्य ज्ञान, निदानात्मक एवं उपचारात्मक कार्य

प्रायोगिक पक्ष : समुन्नयन क्रियाएँ (कोई तीन)

- आस – पास के किसी क्षेत्र के किसी विशिष्ट समुदाय के लोगों की भाषा का सर्वात्मक और उनकी शब्दावली का अध्ययन - विश्लेषण
- भाषा कौशलों संबंधी भाषा खेल निर्माण
- कल्पना प्रधान एवं भावप्रधान मौद्रिक निर्बंध लेखन के लिए विषय सूची निर्माण तथा उनमें से किन्हीं दो विषयों पर निर्बंध लेखन
- पत्र- पत्रिकाओं में प्रकाशित रचनाओं, नई समकालीन साहित्यिक पुस्तकों का अध्ययन - विश्लेषण
- पाठ्य पुस्तकों में निर्धारित पाठों की अंतर्वेश्ल रचनाओं का संकलन
- पाठ्यपुस्तकों में निहित अन्तःचराओं का संकलन
- पाठ्यपुस्तकों में संकलित मुहावरों, लोकोस्त्यों का स्वतंत्र प्रयोग एवं उनके अर्थ से मिलते जुलते मुहावरों, लोकोस्त्यों का संकलन
- हिन्दी भाषा एवं साहित्य के संवर्धन एवं प्रोत्साहन के लिए दिखाई देने वाले पुस्तकार, पुरस्कृत रचनाकार एवं उनकी रचनाओं की सूची का निर्माण
- पाठ्यपुस्तकों में निर्धारित पाठों में से किसी एक के प्रतिपाद्य विषय का चयन कर परिष्कारता निर्माण

संदभा सूची:

- अग्रवाल, पुरुषोत्तम, कुमार संजय (2000), हिन्दी: नई चाल में ढली: एक पुनरीचरण, देशात्मक प्रकाशन, नई दिल्ली
- अज्ञेय, सचिवदानंद हीरानंद वात्सल्यायन (2010), वस्तुल निधि प्रकाशन माला: संविदित, सतत साहित्य मण्डल प्रकाशन, नई दिल्ली
- कुमार, कृष्ण (2004), बच्चों की भाषा और अध्यापक, राष्ट्रीय पुस्तक न्यास, नई दिल्ली कौशिक, जयनारायण (1987), हिन्दी शिक्षण, हरियाणा साहित्य अकादमी, चंडीगढ़

B.Ed. Two Year Programme
P.2.3 : Sanskrit

अधिकतम अंक : 100

उद्देश्य

• वृहत्तर शिक्षणशास्त्रीय विमर्श के मध्य संस्कृत शिक्षण के उद्देश्य एवं संस्कृत अध्यापन की समझ विकसित करने में सहयोगी होना।
• बहु-भाषिकता एवं लोकतान्त्रिक मूल्य से संस्कृत अध्ययन-अध्यापन के संबंध की समझ बनाने में मददगार होना।
• प्रतिविम्बात्मक, सर्जनात्मक, आलोचनात्मक एवं शोधार्थी, शिक्षक-प्रशिक्षक बनने में सहयोग देना।

ईकाई—1: संस्कृत—शिक्षण की अवस्थिति और उद्देश्य

1.1 भारतीय विद्यालयों में संस्कृत अध्ययन—अध्यापन की अवस्थिति एवं संभावना

क. राष्ट्रीय पाठ्यचर्या की रूपरेखा—2005, 2000, 1988
ग. भारतीय संविधान एवं त्रि-भाषा सूत्र का विमर्श — कमेटी एवं कमिशन की रपट — भारतीय संविधान की अपेक्षाएँ, विश्वविद्यालय आयोग : 1948, माध्यमिक शिक्षा आयोग : 1952—53, राष्ट्रीय शिक्षा आयोग : 1964—66, प्रबुद्ध एवं मानवीय समाज की ओर : 1990, संस्कृत आयोग का प्रतिवेदन (1956—57)

1.2 संस्कृत अध्ययन—अध्यापन के उद्देश्य

• संस्कृत—शिक्षणशास्त्र के उद्देश्यों की विविधता एवं उनका समाजो— दर्शानिक और शिक्षणशास्त्रीय आयार
• पाठ्यचर्या के शिक्षणशास्त्रीय उद्देश्य, पाठ्यक्रम एवं संस्कृत की पाठ्यपुस्तक
• संस्कृत—शिक्षण के उद्देश्य एवं पाठ्यपुस्तक निर्माण की चुनौतियाँ
ईकाई - 2: संस्कृत-शिक्षणशास्त्र का विमर्श

2.1 बहुभाषिकता एवं संस्कृत-शिक्षण-भारत की भाषाओं के साथ संस्कृत का और संस्कृत के साथ भारत की भाषाओं के का सम्पर्क-संबंध

2.2 संस्कृत भाषा का वैशिष्ट्य – संस्कृत बतौर श्रेण्य भाषा एवं संस्कृत बतौर आधुनिक भाषा

2.3 संस्कृत अध्ययन-अध्यापण की विधियाँ एवं शिक्षणशास्त्रीय विमर्श

क. बालक-माध्यमिक उपायगम
ख. निर्मितिवादी उपायगम
ग. संस्कृत-शिक्षण की विधियाँ - पाठशाला विधि, भूपंडारक विधि, पाठपुर्लक विधि, संप्रेषणात्मक विधि, प्रत्यक्ष विधि, विश्लेषणात्मक विधि, व्याख्या विधि, व्यक्तिविधि, मूल्यांकनविधि, सूक्ष्म-शिक्षण उपायगम, परियोजना कार्य, अभिव्यक्ति अनुदेश, निदानात्मक एवं उपरात्मक, आगमन एवं निगमन, समस्या-समाधान, पर्यवेक्षण, दल-शिक्षण, कम्प्यूटर आधारित शिक्षण

घ. संस्कृत साहित्य की विभिन्न-विधियाँ का शिक्षण – गद्य, पद्य, नाटक, पत्र

घ आलोचनात्मक शिक्षणशास्त्र

ईकाई - 3: संस्कृत अध्ययन-अध्यापण की कठिनाइयाँ एवं नवाचार

3.1 विद्यार्थी उन्मुखिकरण, उत्प्रेरण एवं सरास्वतन के मार्ग में आने वाली कठिनाइयाँ एवं उनका संबोधन, संस्कृत अध्ययन-अध्यापण में निहित संभावनाएँ

3.2 संस्कृत अध्ययन-अध्यापण में नवाचार – राष्ट्रीय संस्कृत संस्थान के प्रयास, श्री अरविन्द आश्रम के प्रयास, संस्कृत भारती के प्रयास

3.3 संस्कृत अध्ययन-अध्यापण का सूचना संसार मध्यम एवं तकनीकों में आ रहे बदलाव के साथ समायोजन

ईकाई - 4: संस्कृत अध्ययन-अध्यापण में मूल्यांकन की मौजूद विधियाँ और मूल्यांकन का नब-विमर्श

वर्षन्त परीक्षा एवं उसकी समीक्षा
समात्म परीक्षा एवं उसकी समीक्षा
सतत, व्यापक एवं संचयी मूल्यांकन का विमर्श एवं उसकी समीक्षा
ईकाई-5 : पाठ योजना के विभिन्न उपागम

- व्यवहारवादी उपागम
- निर्मितिवादी उपागम
- आलोचनात्मक शिक्षणशास्त्र का उपागम

परियोजना एवं प्रायोगिक पक्ष

- पाठ्यपुस्तक, पाठ्यक्रम, पाठ्यचर्या, विशेषण
- सामायिक संस्कृत लेखन एवं उसकी समीक्षा
- नवाचारी शिक्षण एवं संसाधन की समीक्षा
- वर्तमान संस्कृत शिक्षण पद्धति की समीक्षा
- संस्कृत शिक्षण के उद्देश्यों का अन्य भाषा शिक्षण उद्देश्यों से तुलना एवं समीक्षा
- वर्तमान समय में चल रहे संस्कृत शिक्षण की विभिन्न परंपराओं का दर्शावेजीकरण एवं समीक्षा
- संस्कृत शिक्षण सामग्री का निर्माण

B.Ed. Two Year Programme

P.2.4 : Urdu

Maximum Marks: 100

Unit-1: Position of Urdu in India

Evolution of Urdu as an Indian Language; Different forms of Urdu language; Status of Urdu in pre-and post-partition India; Role of Urdu language in national integration; Urdu at international level; challenges of teaching and learning Urdu

Unit-2: Urdu Language, Literature & Aesthetics

Different Creative Forms of Urdu Language: Understanding different forms of Urdu literature; Literature in the school curriculum—Needs, objectives and relevance; Role and relevance of media in school curriculum; Translation—Importance and Need; Translation as a Creative Activity—through examples of translated texts into Urdu from different languages.

Teaching of Different Forms of Urdu Literature—Poetry, Prose, Drama: Introduction of various literary forms of Urdu language; Classical Urdu literature and modern Urdu literature; Planning lessons in Urdu prose, poetry and drama at various school levels.

Unit-3: Acquisition of Language Skills in Urdu

Urdu grammar and vocabulary in context

Tasks, materials, and resources for developing the listening and speaking skills in Urdu:

Storytelling; dialogues; situational conversation; role plays; simulations; speech; games and contexts; language laboratories; pictures; authentic materials and multi-media resources

Developing the skills of Reading and Writing in Urdu: Importance of developing of reading skills; Reading aloud and reading silent; Extensive and intensive reading; Study skills including using thesauruses, dictionary, encyclopedia, etc.;

Stages of Writing; Process of writing; Formal and informal writing such as poetry, short story, letter, diary, notices, articles, reports, dialogues, speech, advertisement, etc.; reference skills; Higher order skills
Unit-4: Teaching-Learning of Urdu

Approaches/Methods of Teaching Urdu: Grammar translation method; Direct method; Structural-situational method; Audio-lingual method; Natural method; Communicative approach; Total physical response; Thematic approach (inter-disciplinary)

Use of Teaching-Learning Materials & Aids in Urdu Teaching: Print media; Other reading materials, such as learner chosen texts, magazines, news-papers, class-libraries, etc.; ICT, audio-visual aids including CAL programmes; Radio, TV, Films; Planning co-curricular activities (discussion, debates, workshops, seminar etc.); Language labs, etc.

Unit-5: Assessment in Urdu Teaching

The role and importance of assessment in Urdu language teaching; Progress and assessment of development of language; Continuous & Comprehensive Evaluation—Oral, Written, Portfolio; Close test, Self evaluation; Peer evaluation; Group evaluation.

Typology of questions; Activities and tasks (open ended questions, MCQ, true and false etc.) reflecting—Problem solving, creative and critical thinking; Enhancing imagination and environmental awareness; feedback to students, parents and teachers

B.Ed. Two Year Programme

P.2.5 : Punjabi

Maximum Marks: 100

Unit I
Position of Punjabi Language in India
The origin and development of Punjabi language.
The multilingual situation in India and the place of Punjabi language in the Indian school curriculum.
Aims and objectives of teaching Punjabi.
Study of Punjabi as mother tongue/first language and as the second/third language.
The phonetic, lexical and morphological, syntactic, semantic and written structure of Punjabi language. The relation between the standard language and its dialects.
Special problems of teaching Punjabi in different school contexts at different levels.

Unit II
Listening and Speaking
Oral language development in the classroom.
Tasks, materials and resources for developing oral language - listening and speaking, story-telling, dialogue, situational conversation, role-play, speech games and contexts.
Language laboratories, pictures, authentic material and multimedia resources.

Unit III
Developing the skills of Reading and Writing
Importance of developing reading skills - reading aloud and silent reading, reading informational texts.
Stages of writing, process of writing, formal and informal writing such as poetry, short stories, letter, diary notices, articles, reports, dialogues, advertisements etc.

Unit IV
Teaching-learning of Punjabi literature, grammar and vocabulary, using of teaching learning material
Literature in the school curriculum, Punjabi language learner and the background knowledge, role of Punjabi texts in the class room – text structure, genre and text selection.
Concerns in teaching of grammar and vocabulary - teaching grammar in context, teaching vocabulary strategies in context, task materials and resources for teaching grammar and vocabulary.
Use of teaching learning material and aids in teaching Punjabi: print media, other reading material, magazines, charts, newspapers, class libraries, audio visual aids, TV, films, radio etc.
Planning co-curricular activities – discussions, debates, recitations, story-telling workshops, seminars and symposiums etc.
Unit V
Assessment and Evaluation
Role and importance of assessment and evaluation in the teaching/learning of Punjabi language, continuous and comprehensive evaluation, oral, written and portfolios. Evaluating achievement in different language skills at different levels. Typology of questions, activities and tasks, problem solving, critical and creative thinking. Class tests, peer evaluation, group evaluation and self-evaluation. Diagnostic and remedial work.

Suggested Reading
B.Ed. Two Year Programme

P.2.6 : Physics

Maximum Marks: 100

Course Objective
This course is aimed at developing the insights, competencies and skills among the pupil-teachers to effectively transact the Physics curriculum and evolve as a reflective practitioner, capable of translating theoretical perspectives into pedagogical practices.

Unit I Pedagogical Underpinning
- Place of physics in school curriculum - Nature of physics as a science discipline and its linkages with other disciplines.
- The concept of Pedagogical Content Knowledge (PCK) and its implications for Physics teaching.
- Aims of teaching physics at the senior secondary level with linkages to upper-primary and secondary level.
- Objectives of teaching physics with special reference to the development of thinking and process skills

Unit II Classroom processes
- Pedagogical planning: considerations in relation to content (curriculum and concepts) and learners (with specific reference to socio-cultural and developmental context of the learner including special needs).
- A repertoire of teaching-learning processes: Inquiry based approach, inductive and deductive approach, experimentation, demonstration, discussion, investigatory projects, individually paced programmes, group work, peer learning, observation-based survey, problem solving, guided independent study, seminar presentation, action research
- Developing unit plans, lesson plans and Remedial/Enrichment plans using combinations of various processes.
- Planning for conduct of activities, experiments and laboratory work in Physics with a critique of the current practices

Practicum
1. Planning and discussion of lessons for the school experience programme.
2. Developing remedial or enrichment programmes.
3. Conduct of activities/Experiments.

Unit III Teaching-Learning Resources
- Criteria for selecting/designing Teaching-Learning Resources : content based, learner based and context based.
- Textbook, reference books, encyclopaedia, newspaper and alike
- Improvisations and Science Kits
- Instructional aides, computer aided instruction, multi-media packages, interactive software, websites, Open Education Resources (OER) etc.
• Planning of extended experiences, science quiz, science fair, science corner/resource room, science club, excursion and related SUPW activities.

Practicum: Developing Teaching-Learning resources

Unit IV Organization of the Physics Laboratory
• Layout and design of the physics laboratory.
• Storage of apparatus, consumable and non-consumable items/materials
• Maintenance of laboratory records.
• Making arrangements for the conduct of experiments.

Practicum: Laboratory work- management of laboratory, activities and project work.

Unit V Assessment
• Nature of learning and assessment, analysis and critique of the present pattern of examinations.
• Design and analysis of
  o Formative assessment tasks
  o Summative Assessment
• Assessment of laboratory work and project work
• Assessment through creative expression-drawing, posters, drama, poetry, etc as part of formative assessment for continuous assessment of thinking and process skills
• Developing learner profiles and portfolios; participatory and peer assessment.

Suggested Reading List

Course Objective
This course is aimed at developing the insights, competencies and skills among the pupil-teachers to effectively transact the Chemistry curriculum and evolve as a reflective practitioner, capable of translating theoretical perspectives into pedagogical practices.

Unit I Pedagogical Underpinning
- Place of Chemistry in school curriculum
- The concept of Pedagogical Content Knowledge (PCK) and its implications for Chemistry teaching.
- Aims of teaching Chemistry at the senior secondary level with linkages to upper-primary and secondary level.
- Objectives of teaching Chemistry with special reference to the development of thinking and process skills

Unit II Classroom processes
- Pedagogical planning: considerations in relation to content (curriculum and concepts) and learners (with specific reference to socio-cultural and developmental context of the learner including special needs).
- A repertoire of teaching-learning processes: Inquiry based approach, inductive and deductive approach, experimentation, demonstration, discussion, investigatory projects, individually paced programmes, group work, peer learning, observation-based survey, problem solving, guided independent study, seminar presentation, action research
- Developing unit plans, lesson plans and Remedial/Enrichment plans using combinations of various processes.
- Planning for conduct of activities, experiments and laboratory work in Chemistry with a critique of the current practices

Practicum:
1. Planning and discussion of lessons for the school experience programme.
2. Developing remedial or enrichment programmes.
3. Conduct of activities/Experiments.

Unit III Teaching-Learning Resources
- Criteria for selecting/designing Teaching-Learning Resources : content based, learner based and context based.
- Textbook, reference books, encyclopaedia, newspaper and alike
- Improvisations and Science Kits
- Instructional aides, computer aided instruction, multi-media packages, interactive software, websites, Open Education Resources (OER) etc.
- Planning of extended experiences, science quiz, science fair, science corner/resource room, science club, excursion and related SUPW activities.

Practicum: Developing Teaching-Learning resources
Unit IV  Organization of the Chemistry Laboratory
   • Layout and design of the Chemistry laboratory.
   • Storage of apparatus, consumable and non-consumable items/materials
   • Maintenance of laboratory records.
   • Making arrangements for the conduct of experiments.

**Practicum:** Laboratory work- management of laboratory, activities and project work.

Unit V  Assessment
   • Nature of learning and assessment, analysis and critique of the present pattern of examinations.
   • Design and analysis of
     o Formative assessment tasks
     o Summative Assessment
   • Assessment of laboratory work and project work
   • Assessment through creative expression-drawing, posters, drama, poetry, etc as part of formative assessment for continuous assessment of thinking and process skills
   • Developing learner profiles and portfolios; participatory and peer assessment.

**Practicum:** Preparation of a detailed Assessment Report of learners’ continuous and comprehensive assessment.
Course Objective
This course is aimed at developing the insights, competencies and skills among the pupil-teachers to effectively transact the Biology curriculum and evolve as a reflective practitioner, capable of translating theoretical perspectives into pedagogical practices.

Unit I Pedagogical Underpinning
- Place of Biology in school curriculum and its changing character
- The concept of Pedagogical Content Knowledge (PCK) and its implications for Biology teaching.
- Aims of teaching Biology at the senior secondary level with linkages to upper-primary and secondary level.
- Objectives of teaching Biology with special reference to the development of thinking and process skills

Unit II Classroom processes
- Pedagogical planning: considerations in relation to content (curriculum and concepts) and learners (with specific reference to socio-cultural and developmental context of the learner including special needs).
- A repertoire of teaching-learning processes: Inquiry based approach, inductive and deductive approach, experimentation, demonstration, discussion, investigatory projects, individually paced programmes, group work, peer learning, observation-based survey, problem solving, guided independent study, seminar presentation, action research
- Developing unit plans, lesson plans and Remedial/Enrichment plans using combinations of various processes.
- Planning for conduct of activities, experiments and laboratory work in Biology with a critique of the current practices

Practicum
1. Planning and discussion of lessons for the school experience programme.
2. Developing remedial or enrichment programmes.
3. Conduct of activities/Experiments.

Unit III Teaching- Learning Resources
- Criteria for selecting/designing Teaching-Learning Resources: content based, learner based and context based.
- Textbook, reference books, encyclopaedia, newspaper and alike
- Improvisations and Science Kits
- Instructional aides, computer aided instruction, multi-media packages, interactive software, websites, Open Education Resources(OER) etc.
- Planning of extended experiences, science quiz, science fair, science corner/resource room, science club, excursion and related SUPW activities.

Practicum: Developing Teaching-Learning resources
Unit IV Organization of the Biology Laboratory
- Layout and design of the Biology laboratory.
- Storage of apparatus, consumable and non-consumable items/materials
- Maintenance of laboratory records.
- Making arrangements for the conduct of experiments.

Practicum: Laboratory work- management of laboratory, activities and project work.

Unit V Assessment
- Nature of learning and assessment, analysis and critique of the present pattern of examinations.
- Design and analysis of
  - Formative assessment tasks
  - Summative Assessment
- Assessment of laboratory work and project work
- Assessment through creative expression-drawing, posters, drama, poetry, etc as part of formative assessment for continuous assessment of thinking and process skills
- Developing learner profiles and portfolios; participatory and peer assessment.

UNIT 1: Content Specific Pedagogy

Student-teachers shall engage with each of the content areas stated below by examining important concepts. The focus shall be on critically examining existing teaching practices, textbooks and curriculum in relation to different concepts. By drawing from an understanding of children’s reasoning patterns and misconceptions, student-teachers shall be expected to develop teaching strategies and assessment practices for engaging classroom cultures that enhance conceptual understanding of diverse learners. Student-teachers’ understanding of the concepts shall be facilitated through questions and activities that can also be suitably used with children to help them build complex mathematical understanding. Student-teachers shall be challenged to refine, review and explain their thinking without falling back on standard rules and procedures. The unit shall make use of personal reasoning and reflection as well as offer time to discuss among themselves the material and resources for teaching.

I. What is geometry? Development of Euclidean geometry, what makes it popular, origin and significance of axioms and postulates; types of proof, processes of proving: making generalisations and justifications. Development of new geometries and their historical importance.

II. Exploring different dimensions of geometry: one dimension, two dimensional and three dimensional systems and objects, representing objects in different dimensions, projective geometry, Coordinate system, change of axes: translation, rotation; idea of locus, spatial aspect of the physical world and representing nonvisual mathematical concepts and relationships. Conceptual understanding of symmetry, congruency and similarity; attributes of different geometrical shapes - surface area and volume,

III. Fundamental ideas related to trigonometry, topology, motion

IV. Use of software applications to teach and learn geometry- Examining and visualising 3D shapes and their representation in 2D

Statistics & Probability

I. Understanding different statistical concepts of data collection and representation, use and meaning of central tendencies, analyzing variations; statistical analyses of
practical examples embedded in social contexts such as studying inequities, government budgets, population growth, environmental issues etc.

II. Investigating basic concepts of probability such as nature of distributions, randomness, sample space, independent events, mutually exclusive and exhaustive events; law of large numbers, law of small numbers; relationship between statistics and probability

III. Understanding subjective probability and discerning classical and experimental approaches of probability, Intuitive sources of probabilistic thinking in children; children’s informal notions about chance and randomness; conducting probability experiments using standard and non-standard randomisers; making subjective judgments in probabilistic situations and revising one’s estimates in the light of subsequent data/information

Number systems and Number Theory

I. Use of numbers and integers, and quantitative methods as a means of communicating, processing and interpreting information.

II. Exploring properties associated with numbers including their geometric representations, exploring fundamental theorems of arithmetic, sequences and series including arithmetic and geometric progressions

III. Different interpretations of rational numbers –fractions as a part-whole relationship, rational number as the result of division of two numbers, as a ratio etc.; proportional relationship; and real life context for teaching rational numbers

IV. Children’s reasoning in relation to integers and rational numbers, role of ‘number talks’ in promoting number sense

Patterns, Functions and Algebra

I. Relationship between arithmetic and algebra

II. Big ideas in algebraic reasoning such as finding, describing and using patterns, idea of functions, using functions to make predictions, understanding linearity and proportional reasoning, understanding non-linear functions and exploring algebraic structure, equations and inequalities

III. Development of algebraic reasoning leading to more sophisticated ideas related to growth and decay, optimization, making different types of graphs (linear and non-linear) and drawing interpretations from the nature of graphs

IV. Elementary calculus: graphs and functions; rate of change; limits, continuity and discontinuity.
**Readings**

AMT-01 Block 3 Unit-9: Negative Numbers (These are part of the IGNOU materials)
AMT-01 Block 3, Unit-10: Generalizing Arithmetic to Algebra

LMT-01. IGNOU Series

MESE-001 (2003). Teaching and Learning Mathematics. IGNOU series

---

**UNIT 2: Designing and Planning a Unit and Lessons**
I. Engagement with the National curriculum, syllabus and textbooks. Critical study of all three in light of the conceptual understanding of concepts dealt in Unit 1

II. Studying the curriculum: relating to what is worth knowing and experiencing in mathematics, understanding the nuances between intended curriculum and implemented curriculum.

III. Developing unit plans and concept maps: understanding children”s cultural knowledge and misconceptions; designing constructive lesson plans, understanding the role of communication, mathematical community and group dynamics in classrooms

IV. Critical engagement with ICT, mathematics laboratory, simulations and mathematical modelling in promoting mathematical thinking

Readings
NCERT.(2006). Syllabus for classes at the elementary level (Vol. 1). New Delhi: NCERT.
LMT-01 Block 2, Unit-05: Building a Constructive Classroom (classroom organization, material and assessment)
Boaler, J. (2013). Ability and Mathematics: The mindset revolution that is reshaping education. FORUM, 55, 1, 143-152.

UNIT 3: Assessment and Evaluation
I. Critical role of assessment in enhancing learning-Explore diverse methods and tools of assessing an array of learning/performance outcomes of diverse learners, relationship of assessment with self-esteem, motivation, and identity as learners, assessment for learning and role of feedback

II. Traditional assessment vs. assessment within a constructivist paradigm. Engaging critically with the existing system of assessment, analysing its shortcomings. Understanding and suggesting ways for creating a continuum between assessment and learning.

III. Assessing reasoning, argumentation and logical thinking in mathematics - Performance based assessment

Readings

Assignments/Projects/Practicum

- Textbook analysis
- Activity analysis
- Analysing student’s oral and written responses
- Undertaking performance based assessment in a classroom
- Small action research on children’s conceptions related to a mathematical concept
- Designing field based projects for middle or secondary school children
- Designing mathematical games and puzzles
- Mathematical modelling
- Investigation of proofs without words
- Using historical anecdotes as means for promoting mathematical communities in classrooms
- ICT-based projects for linking higher mathematics
- Analyzing ‘math-talks’
- Creating documentaries of students’ mathematical work
Objectives of the Course

To enable the prospective teachers to:

- Appreciate the need for teaching-learning of History in secondary classes.
- Develop a systematic and critical understanding of History in a democratic and secular country with a diverse socio-cultural milieu and relevance in the contemporary context of a globalised world.
- Promote critical perspectives on the nature and philosophy of History and methods of enquiry.
- Comprehend, analyse, evaluate and integrate source material critically as historical evidence.
- Understand the organisation of History curriculum and its pedagogical concerns.
- Engage with the classroom processes in History and its transactional implications.
- Critique and develop suitable evaluation mechanisms in History.
- Nurture the ability to organize curricular activities and community resources for promoting History learning.
- Become a reflective practitioner capable of translating theoretical perspectives into innovative pedagogical practices.
- Acquaint with the need and processes of continuous professional development.

Units of Study

Unit I: Evolution and Development of History
- Emergence of History as a discipline and a school subject to the present stage
- Philosophical bases of History
- Construction of knowledge and process of knowledge generation in History.
- Perspectives on thinking historically
- History and Social Science/ Natural Science.
- Cross Cultural perspectives on the meaning of history; the post-modernist challenge.

Unit II: History Curriculum: Principles and Practices
- General Principles and Approaches for the construction and thematic organization of history curriculum at different stages
- Aims and Objectives of teaching-learning History in a democratic, secular country with plural societies
- Place of History at different stages of secondary school curriculum and linkages between different stages
- Analysis of Curriculum, Syllabus and Text books

Unit III: Issues and Challenges in Teaching-Learning of History
- Pre-conceptions and misconceptions in History
- Dates and periodization; cultivating sense of time and space
- Scientific Orientation to Historical facts; Objectivity in History
- Gender in History
- Subaltern perspectives and issues of inclusion
- Controversial issues in History

Unit IV: Pedagogy and Processes in History
- Purpose and Approaches of teaching History:
  Inductive, Deductive, Inter-disciplinary and Constructivist approaches in the teaching of History; Critical pedagogy in History
- Methods and Techniques:

  Textbook, dialogue, debate, discussion, narratives, observation and interpretation, decoding/deconstruction strategies and analysis of historical sources, personal/family history, case study, reflective enquiry and report writing, project, problem solving, dramatization, current events analysis, comparative analysis, reviewing audio-visual resources, Activities around local history-critical engagements with museum and archives, heritage walk and field trips as learning experiences, interpretation of historical maps and construction of timelines, other class room based activities.

  - Theoretical basis: concept mapping and development of Unit Plan
  - Dynamics of lesson planning: teaching strategies and organisation of learning experiences in different contexts
  - Material Sources, curriculum sites and learning resources, ICT in History Classroom
  - Teaching of History and the differently abled learners

Unit V: Conceptual Renewals and Contemporary Trends
- Trends in Indian Historiography
- History and international understanding, Peace & conflict resolution
- Global challenges related to marginalisation
- Local History
- History teacher as a reflective practitioner
- History Resource Centre

Unit VI: Evaluation in History
- Evaluation and Assessment in History- Formative, Summative, Continuous and Comprehensive, Assessment at different stages; issues in assessment
- Innovations in Assessment: Self-assessment, Peer assessment, Learners’ profile, Open Text Book Assessment, etc.
- Preparation of a Question Paper and Analysis.

Suggested Practicum
A) Organization of a Subject Forum (History Society):
  Visit to Museum/Archives/Local Monument; Historical excursions and evaluating learning processes; Films and theatre; Talks and discussions, etc.
B) **Term Paper and Seminar Presentation**

Critical appraisal of curriculum policies/documents and curriculum frameworks, existing curriculum of History and text books at school level.

Development of Unit Plan
Development of Lesson Plan, Critical Lesson.

C) **Research Project/Action Research around select theme:**

Evolution of History as a discipline; Perspectives in Indian Historiography; History as a scientific enquiry; Construction of historical facts by school children; Place of History in school curriculum; History in global context; Peace and conflict resolution; Educational technology and History; Chronology and problems of periodization; Controversial issues in History; Oral history; Feminist perspectives in History; Place of subaltern history; Indigenous histories; local history; Comparative perspectives on history of different countries; etc.

Objectives of the Course
To enable the prospective teachers to:

- Understand the need for teaching-learning of Political Science in secondary classes.
- Develop a critical understanding about the aims and objectives of Political Science in a Democratic and Secular country.
- Develop a critical understanding about the nature and philosophy of Political Science and its interface with society.
- Understand the nature of Political Science curriculum and its pedagogical issues.
- Engage with the classroom processes in Political Science and its transactional implications.
- Critique and develop suitable evaluation mechanisms in Political Science.
- Develop the ability to organize co-curricular activities and community resources for promoting Political Science learning.
- Become a reflective practitioner capable of translating theoretical perspectives into pedagogical practices through processes of innovative action.
- Acquaint with need and processes for professional development

Unit I Aims and Objectives of teaching Political Science
- Political Science in a democratic secular country; transition from ‘civics’ to political science
- Place of Political Science in secondary and senior secondary school curriculum; linkages between different stages; relations between Political Science and Social Science, Natural Science.
- Syllabi and Text books at different stages.

Unit II Issues and Challenges in Teaching-Learning of Political Science
- Pre-conceptions and misconceptions in Political Science
- Inclusive and Democratic Classroom for Political Science

Unit III Political Science Pedagogy
- Purpose, Approaches and Methods of teaching- learning of Political Science
- Inductive, Deductive, Interdisciplinary and Constructivist approaches in teaching-learning of Political Science
- Methods, Techniques and Resources:
  Traditional: lecture, question-answer, discussion, text book, storytelling.
  Modern: dialogue, problem solving, project, observation, debate, source, excursion, dramatization, current events, empirical, comparative, community resource, mass media, case study, reflective enquiry and report writing.
• Theoretical basis and Development of Lesson Plan
• Teaching Learning Material: Need, objectives and preparation
  ICT in Political Science Classroom, Using PowerPoint, Excel, YouTube, Moodle,
  Blogs, etc. in the classroom.
  Use of Encyclopedia/Newspaper/Articles/Magazines/Journals in Social Science.
  Use of Maps/Charts/Graphs/Models/Pictures/Cartoons.

Unit IV Enriching Political Science
• Evolution and Development of Political Science
  Contemporary Trends in Political Science: Political Science in global context,
  Political- Social Dimension of Caste/Class/Religion/Gender with respect to
  current syllabi and textbooks
• International Understanding and Peace & conflict resolution, Changing role of UN,
  Era of Coalition Government,
  Youth and Technology in Political affairs,
  Neo-liberalism and its implications, Role of Media and Judiciary in India
• Political Science Teacher: Personality, Outlook and Reflective Practitioner

Unit V Evaluation in Political Science
• Formative, Summative, Continuous and Comprehensive, Assessment at
  different stages.
• Assessment Modes: Self-assessment, Peer assessment, Learners’ profile, Open text
  book assessment.
• Preparation of a Question Paper and Analysis.

Suggested Practicum
  a) Organization of Subject Society
  b) Term papers on current issues: Citizenship, Gender issues in Indian Politics,
    Political Education, Political Science and scope of scientific enquiry, Exit polls
    etc.
  c) Analysis of curriculum policies/documents and curriculum frameworks.
  d) Critical appraisal of existing Political Science curriculum and text books at
    senior secondary school level
  e) Development of Lesson Plan, Critical Lesson.
  f) Visit to Parliament/Assembly in Session
  g) Preparation of a Question Paper and Analysis
  h) Action Research

Suggested Readings
Arora, P (2006). Lesson Plan: A Means or an End, MERI journal of education,
Number-I, April 2006, New Delhi.
Education. NCERT, New Delhi.
Arora, P (2014). A Democratic Classroom for Social Science, Project Report,
University of Delhi, Delhi.
Batra, P. (Ed. 2010). Social Science Learning in Schools: Perspective and

Edgar, B.W. & Stanely (1938), Teaching social studies in high school, Heath and company, Boston D.C.

Kumar, Sandeep (2013). Teaching of Social Science, Project Report, University of Delhi,

The major objectives of the course are to:

- enable the prospective teachers to understand the nature and purpose of economics courses introduced in schools for Indian children.
- develop the required competencies to present the subject matter of economics from a social science perspective.
- help the teacher to do a pedagogical analysis of the subject matter they are to teach at different levels.
- help them acquire knowledge and understanding to establish the cross curricular linkages while teaching economics.
- help the teacher identify basic economic concepts, as integral in the syllabus and plan the suitable methodology to teach.
- help them think critically on the economic issues, problems, policies and solutions from the local, national and international perspective.
- prepare teachers who can think and work innovatively, be resourceful to create a learning environment whereby the students would develop an interest and love for economics and find it relevant for their personal and professional lives.

Unit I. Perceptions, Ideologies and Approaches in Economics Education

- Nature of economics as a discipline
- Economics as a part of social science programme in Indian schools. The perspectives presented by NCF-2005
- Economics education for beginners; a rationale for when should we begin teaching economics and what should be taught at different levels?
- Diverse programmes and approaches in economics education. Study of economics as a social reality, study of economic systems, contemporary models of growth.
- Challenges in teaching of economics with regard to
  i) Understanding the learner.
  ii) Coping with the learning environment.
  iii) The economics teacher.

Unit II Elements of Knowledge, Skills and Values in School Economics

- The elements of knowledge: facts, concepts, values and generalizations
- Contribution of economics in labeling countries as developing and developed with a critical perspective
- Development of skills required in economics.

Skill categories: Basic and Complex skills
i) Mastering skills.
ii) Assessing Skills.

- Value orientations: Social and Economic values.

Unit III Selection and Organization of Instructional Components

- Setting the goals and defining objectives of teaching economics at school level.
- Approaching the content and developing strategies for a learner-centered economic education programme.
• Situating learning in the context of learner, teachers and the existing learning environment.
• Working out a comprehensive knowledge and skill development programme for the learners at the school level.
• Tapping sources, preparing materials and framing meaningful assignments for effective teaching and learning of economics.

Unit IV. Pedagogic Planning
• Preparation of unit plans and daily lesson plans along with the resources
• Class and out of class activities to establish school, family and community linkages.
• Reading beyond the textbooks: using textbook with other reference materials such as newspaper and GOI Reports
• Project based learning, problem-solving and ability to take decisions.

Unit V. Assessing for Learning
• Critical Understanding of the existing pattern of assessment
• Stages of evaluation: diagnostic, formative and summative.
• Continuous and Comprehensive Assessment
• Objective testing: construction of test items.
• Evaluation procedures for group projects and other outdoor activities in economics.

Suggested Assignments and other activities
• Reviewing a subject related book/selected articles from some economics journals/magazines; presenting it in the class.
• An in-depth study of an economics thinker with pedagogical guidelines; accompanied with classroom presentation.
• Maintenance of a resource file from the beginning of the session to the end and getting it assessed in a phased manner.
• Conducting a field study – Departmental, community or market – based. Collecting and analysing the data, preparing the report.
• Undertaking of a project or a survey individually/in a group on a topic of individual choice. To be selected after class discussion. (Planning to be done early in the first term and carried on till the third term.)
• Critical analysis of economics textbooks from different publishers

Suggested Readings

B.Ed. Two Year Programme

P.2.14 : Geography

Maximum Marks: 100

To engage the potential geography teacher with following quires

- what is the nature of Geography in terms of its evolution as a discipline?
- what are the basic ideas in geography in the context of broader educational ideologies? What are the implications in articulating the aims and objectives of Geography education?
- What goes into the making of geography curriculum?
- What are the pedagogical strategies and material base appropriate for geography teaching at Senior Secondary level?
- How does one assess the process of learning of Geography concepts?
- How does one profile a professional geography teacher?
- What are the issues and challenges faced by geography teachers?
- How does a geography teacher become a researcher?

Unit I: Evolution of Geography as a discipline

The changing nature of geography

- Nature of geographical knowledge
- Foundations of scientific geography
- Geography as a discipline of synthesis
- Paradigms of Geography: Areal differentiation, Man-Environment, Regions and Regionalization and Spatial Organization
- Geography themes: location, interaction, distance, scale, and change

Unit II: Basic ideas, Aims and Objectives of Teaching of Geography

- Epistemological basis of geographical knowledge
- Psychological basis of geography teaching-learning process
- Sociological perspectives in of geography teaching-learning process
- Aims and Objectives of Teaching of Geography informed by above three

Unit III: Geography Curriculum: Theory into Practice

Theoretical understanding of Geography Curriculum

- General Curriculum model
- Objectives model – behaviorist pedagogy
- Process model – constructivist pedagogy
- Organization of Curriculum: Spiral sequencing, Regional approach, Thematic arrangement
Analysis of Geography Curriculum in India
Comparative Analysis of Curriculum in various countries

Unit IV: Pedagogical Strategies in teaching of Geography

Approaches, Strategies and Resources in teaching of Geography

- Approaches to teaching: Inductive-deductive, inter-disciplinary and constructivist approaches
- Strategies: Observation, Project, Regional, Comparative, Problem-solving, Laboratory/ scientific experimental, Narrative,
- Resources for teaching and learning: Maps and diagrams, GIS, Satellite images, Aerial photograph, photograph and slides, National Geography: resources from audio-video and journals, establishment and maintenance of geography room, Decision-making exercises, Printer material: textbooks, collated reading, journal & newspapers articles. Computers in geography teaching.

Field work: Organization: planning, execution, and evaluation

Planning and execution of a lesson: Curricular mapping, Concept mapping, Development of Lesson-plan,

Unit V: Assessment process in Geography Learning

- Assessment and Evaluation in Geography
- Subjective and objective tests; Unit test, Oral test etc
- Formative: Continuous and Comprehensive assessment strategies and formats
- Summative: Need and Formats

Assessment Analysis: Development of Learners’ Portfolio, Progression of conceptual learning, Misconceptions developed and remedial strategies, Statistical interpretation of the assessment, Reflections after execution of lessons and holistic appraisal of the teaching-learning process.

Unit VI: Geography Teacher

- Trainee teachers to reflective practitioner
- Professional growth
- Career entry profile
- As a researcher

Unit VII: Issues in Geography Teaching

- Geography standard
- University-School links
- Public image of geography
- Geography literacy
• Informed citizen

Unit VIII: Research fields and methods in geography education
• Case Study
• Action Research
• Textbook Content Analysis
• Field Study

Unit IX: Practicum

Assignments, and Seminar Presentation
• Criteria of selection of text books and collateral readers: private and public publishers
• Development and Analysis of Curriculum and Concept mapping : content and sequencing
• Lesson planning exercises: Development of variety of lesson plans in terms of nature of content, and pedagogical practices
• Collection and Review of ICT resources for geography education
• Analysis of Geography Standards across countries
• Annotated bibliography on any topic related to geography education
• Preparation of video and film strips
• Review of Documentary features regarding Geography content martial

Minor Research Projects
Contemporary development in Geographical Education: Seminar Presentation
• Geography, Psychology and Social Theory
• Post-modern geographies
• Feminist theory and geography of gender
• Children’s attitudes to other nationalities
B.Ed. Two Year Programme

P.2.15 : Psychology

Maximum Marks: 100

Part 1: Psychology: Evolution, Identity and Issues

Objectives

To enable the student-teachers to:

- Develop an understanding of the evolution of Psychology through a critical examination of major theoretical perspectives with reference to their philosophical and methodological orientations.
- Locate Psychology as a discipline on the Science-Social Science continuum.
- Understand and examine the contemporary concerns and challenges within and to the discipline.
- Trace the evolution of psychology as a school subject in India with specific reference to the issues and challenges resulting from it.

Unit I.1: Psychology: Evolution and Identity

I. The Historical Evolution of Psychology: A Critical Re-visit
   a) Renaissance, Enlightenment and 'Psychology as a Science'
   b) A critical appraisal of the major thought traditions in Psychology with reference to Ontological assumptions, Epistemological assumptions, and Ethical concerns
   c) Foregrounding 'The Human' : The Movement towards Social Science

II. The Nature of Psychology
   a) Nature of Science
   b) Nature of Social Science
   c) Locating Psychology on the Science-Social Science Continuum

Unit I.2: Debates and Contemporary Concerns in Psychology

I. Key Debates
   a) Human Nature
   b) Nature of Knowledge and Learning c) Methods of Inquiry

II. Contemporary Concerns and Developments
   a) Specializations and Compartmentalisation in Psychology
   b) The Politics of Knowledge Generation
   c) Some 'Alternative' Developments: Positive Psychology, Critical Psychology, Indian Psychology, etc.
Unit I.3: Psychology In Schools: The Indian School Context

I. Psychology in Schools : Understanding the Rationale and Evolution
II. Psychology as a School Subject : Issues and Challenges
   a) As a Secondary School Subject
   b) The Interface of Psychology and Other Disciplines/Subjects c) Examining Linkages with Higher Education

Part II: Psychology in Schools

Objectives

To enable the student-teachers to:

- appreciate the concerns and issues involved in teaching psychology at the senior secondary level.
- reflect on the philosophical assumptions that influence a teacher’s approach towards teaching- learning.
- develop a critical understanding of the roles of and expectations from ‘a psychology teacher’ in the school context.
- develop a nuanced understanding of the processes of teaching, learning and evaluation.

Unit II.1: Teaching Psychology at the Senior Secondary Level

I. Senior Secondary Level: Complexities and Concerns
   a) Understanding the Adolescent Learner
   b) Intensification of Subject Specialisation c) High Stakes Evaluation

II. Aims & Objectives of Teaching Psychology

Unit II.2: The Teacher of Psychology

I. The Teacher and her Philosophical Assumptions: Examining the Ontological and Epistemological Stance(s)

II. Roles and Functions of a Psychology Teacher
   a) Demystifying Psychology
   b) Engaging with the Syllabus and Textbook of Psychology c) Beyond Academics

III. Deconstructing Personal and Institutional Expectations
Unit II.3: Methodology and Evaluation in Teaching Psychology

I. Unit Plans and Lesson Plans: Meaning, Aims and Interface
II. Teaching Psychology: Methods, Techniques and Strategies
III. Development of Teaching- Learning Resources
IV. Assessment and Evaluation: Purpose, Approaches and Strategies.

Reading List: Part I (Essential)

(Advanced)

Reading List: Part II

*Suggested Practicum (indicative list): Part I*

Select any one refereed journal of psychology (national or international) and critically examine the author guidelines for preparation and submission of scholarly manuscripts. Carefully analyse the nature of published manuscripts to ascertain the selected journal’s positioning on the issue of Psychology as a Science and/or Social Science.

Initiate and record a discussion with students on 'Rethinking Classic Experiments in Psychology’ with respect to ethics in psychological research.

*Suggested Practicum (indicative list): Part II*

Conduct an interview with the teacher of Psychology in your school and identify some issues or challenges faced by him/her regarding the learners, subject-matter, or any other pertinent area of concern. Select and probe any one such issue, formulate a plan of action and try to implement it. Critically reflect and document your experience to self-assess the executed plan and make recommendations for improved future action.

Select any one commonly suggested Psychology textbook at the senior secondary level and critically appraise it by developing a suitable framework of analysis.

Select any five topics from the prescribed syllabus of Psychology for the senior secondary level and develop case-vignettes on them.

Prepare a brief synopsis of books/films/television-series that highlight the content areas in the prescribed syllabus of Psychology for the senior secondary level.
Unit I Basic Concepts
Nature and scope of sociology, emergence of sociology as an independent discipline; sociology in India; relationship of sociology with other social science disciplines, acquisition of sociological perspective to critically explore and question familiar social reality; critical enquiry of the popular perception that sociology is a non-utility subject; objectives of teaching sociology as a school subject; teaching to develop capacity for critical analysis rather than teaching definitions and concepts

Unit II Curriculum and Textbooks of Sociology
Analysis of the sociology syllabus and textbooks developed under NCF-2005 for Grades XI and XII; critical analysis of the topics, presented with a sociological perspective, in upper-primary level social science textbooks; Role of textbooks for pedagogic challenges (problem-posing education): contextualization; nature of questions; types of data utilized for grasping social reality, use of patterns in understanding society

Unit III Understanding Indian Society
Use of locally relevant content in the teaching-learning process; Resources of data to develop a sociological understanding of Indian society: Census, National Sample Surveys, National Crime Records Bureau, UNICEF and UNESCO Reports, health and education related data, and so on; Analysis of language, social customs, myths, folk lore, music and popular music as a source of data to study social institutions, relationships and division of labour and power in Indian society. family, kinship, caste; tribe; religion; language; social change; customs, rituals, beliefs; modernity and modernization; role of education;

Unit IV Assessment and Evaluation
Role of assessment in expanding the student’s learning in sociology; interest in social phenomenon; capacity for objective analysis; grasp of theory; ability to apply concepts for making sense of everyday social reality and situations; capacity to relate sociological insights with other social sciences.

Suggested Readings
Richard J. Gelles “Teaching Sociology" on Teaching Sociology Teaching Sociology Vol. 8, No. 1 (Oct., 1980), pp. 3-20
Paul J. Baker Does the Sociology of Teaching Inform ”Teaching Sociology”? Teaching Sociology Vol. 12, No. 3, Sex and Gender (Apr., 1985), pp. 361-375

--- (1953) "Obtaining a position in sociology." SOCIOLOGY & SOCIAL RESEARCH 38 (September-October): 38-45. "

Objectives of the Course

To enable the prospective teachers to:

- get an insight into the nature of social science curriculum and its pedagogical issues.
- Enquire critically the aims and objectives of social science education.
- Explore and establish the Inter-disciplinarity in social science.
- Comprehend the uniqueness of teaching-learning process of social science at secondary level.
- Engage with the classroom processes and its transactional implications in terms of different strategies and techniques.
- Develop appropriate evaluation mechanisms in social science.
- Understand the needs and processes for professional development of social science teachers as researchers.

Unit I  Aims and objectives of teaching Social Science

- Social Science Education:
  - for a democratic secular society
  - for an identity in the post-modern and globalised world in terms of historical, political, economic and environmental perspectives
  - for an informed and empowered citizen

- Organization of learning experience in Social Science Curriculum
  - its status in Secondary School Curriculum
  - its inter-disciplinary nature: Revisited
  - its presentation in the textbook

Unit II  Pedagogical Strategies in Social Science

- Purpose, Approaches and Strategies teaching-learning processes:
  - approaches: inductive, deductive, interdisciplinary and constructivist approaches
  - strategies: Narration, Dialogue & Discussion, Problem Solving, Project, Storytelling, Data collection and analysis, Field trips as learning experience, Dramatization, Archives & other historical Sources and their interpretation, reviewing Video Shows on social issues, Current event, Comparative method, Cartographic techniques, time-line construction and other activities

- Development of Thematic Lesson Plan and its execution

Unit IV Resources in Social Science

- Teaching Learning Material: Need and objectives; collection and preparation
- ICT in Social Science Classroom
- Social Science Resource room: Need, Establishment, components and management.
• Social Science Teacher: Nature: Personal ideology and Personality traits; Academic and Professional competencies; and as a Reflective Practitioner

Unit IV Evaluation and Assessment in Social Science
• Formative assessment: Strategies and tools in Continuous and Comprehensive Assessment
• Summative assessment: Objective and subjective strategies
Assessment at different stages: secondary level

Unit V Issues and Challenges in Teaching-learning of Social Science
• Pre-conceptions and misconceptions in Social Science
• Social Science as an integrated subject.
• Critical pedagogy in action.
• Teaching children with special needs
• Democratic Classroom
• Social sciences and Global challenges related to marginalization, violence, environmental problems and financial crisis

Suggested Practicum
  a) Organization of Opinion Forum
  b) Surveys on the spot.
  c) Term papers on current issues : Citizenship, Gender issues, Stock Market, Local History
  d) Enrichment of the subject areas like geography, history, political and social life and economics.
  e) Establishment and Enrichment of Social Science Resource Centre
  f) Analysis of curriculum policies/documents and curriculum frameworks.
  g) Critical appraisal of existing social science curriculum and text books at school level
  h) Critical Lessons(issue- based) Planning and Execution.
  i) Organizing field trips and evaluating learning process

Suggested Readings
• Edgar, B.W. &Stanely (1958), Teaching social studies in high school, Heath and company, Boston D.C.
• Kumar, Sandeep (2013).Teaching of Social Science, Project Report, University of Delhi, Delhi.
Rationale
This paper attempts to prepare reflective teachers who are prepared to address the needs of a Commerce classroom. They will be able to reflect on appropriate teaching needs of the commerce classroom, based on individual differences in learners and the school context. They will also develop new and use existing resources for teaching.

Unit 1 Planning for Classroom Teaching
- Developing objectives and meeting educational aims
- Enriching preparation for teaching
- Unit and lesson planning

Unit 2 Exploring Pedagogic Options
- Methods of Teaching- Lecture, Demonstration, Case Study, Interaction, Project, Discussion, Simulation and Role play, Seminar.
- Choice of an appropriate pedagogy
- Classroom management

Unit 3 Curriculum Development and Syllabus of Commerce
- Curriculum development- theories, processes and practices.
- Understanding Commerce curriculum (different national and international boards).

Unit 4 Developing Teaching Content and Resources
- What to teach: Developing teaching content
- Place of textbooks in the classroom
- Relevance and selection of resource materials
- School context and suitability of learning material
- Technology in commerce classroom (including e-Learning environments)

Unit 5 Evaluation in Accountancy and Business Studies
- Evaluation and assessment of learners in Commerce- Examining contemporary trends
- Construction of tests
- Moving towards alternative assessment modes
Unit 6 Developing a culturally responsive and inclusive classroom

- Embracing social and cultural diversity
- Building an inclusive classroom environment
- Addressing learners’ needs

Unit 7 Developing reflective practitioners

- Critical pedagogy in Accountancy and Business Studies
- Reflective teaching
- Teachers as Researchers

Practicum

- Comparative Analysis of Commerce curriculum of different national and international boards.
- Analyzing textbooks of Accountancy and business studies.
- Development of learning material and resources for commerce classroom.
- Designing an Action Research project.
- Writing reflective journals
- Designing alternate assessment models.
- Developing tests and analyzing question papers.
- Undertaking commerce based research project that may involve- field based inquiry into the commercial and personal lives of small scale entrepreneurs/ develop a biography of a local entrepreneur/ develop profile of local artisans or craftsmen/ review biography/autobiography of an entrepreneur or manager.

Suggested Readings

B.Ed. Two Year Programme

P.2.19 : Home Science

This course is to deal with the entire range of activities associated with the teaching of Home Science at the Secondary and Senior Secondary level. The emphasis has been on the knowledge, understanding and application of various approaches/methods/strategies associated with the teaching of Home Science effectively in School. The specific course objectives and unit wise content are given as below:

**Objectives:**

The student teacher will be able to:

- Enumerate on the meaning, nature, scope and objectives of teaching Home Science at Secondary and Senior Secondary level.
- State the importance of teaching Home Science in Schools.
- Apply various techniques and approaches of Teaching Home Science at secondary and senior secondary level.
- Plan instructions effectively for teaching learning process of Home Science at school level.
- Plan and modify the setup of Home Science laboratory to conduct practical’s according to the changing needs of the curriculum.
- Evaluate student performance with a holistic perspective.

**Unit I: Nature of Home Science and its role in family and community**

- The nature and scope of Home Science as a discipline in science.
- Historical perspective and major landmarks in the evolution of home science as a subject.
- The contemporary meaning of Home Science and its place in school education.
- Home Science in socio-cultural context with focus on societal issues and concerns.
- Interface between Home science and skill development.

**Unit II: Curriculum and pedagogic issues in Home Science**

- Objectives of teaching of Home Science at elementary, secondary and senior secondary level
- Unit planning
- Lesson planning
  1. Discussion Method
  2. Demonstration Method
  3. Practical Method
Unit III: Methods & Approaches in teaching Home Science

(a) Demonstration  
Discussion  
Practical  
Project  
Problem solving  
Seminar  
Experimentation  
Field trips  
ICT  
Market Survey  
Exhibition  
Displays  
peer learning  
Role play  
Brain storming

(b) Optimal utilization of community resources  
(c) Simulated teaching.

Unit IV: Audio-Visual Aids in Home Science
• Introduction  
• Needs and importance  
• Dale’s cone of Experience  
• Types of Teaching Aids  
  - On the basis of sense organs involved  
  - On the basis of size of learner group  
  - On the basis of learners control over teaching aid  
  - On the basis of experience provided by an aid  
• Effective use of teaching aid

Unit V: Curriculum in Home Science
• Introduction  
• Principles of curriculum construction  
• Curriculum organization: critical analysis  
• Correlation of Home Science with other subjects  
• Role of Home Science teacher in curriculum development and transaction  
• Home Science Text Book
Unit VI: Laboratory organization and experimentation in Home Science

- Report, records and registers:
  (i) Purchase, storage and maintenance of material and equipment
- Characteristics, organization and management of Home Science laboratory
- Layout of design:
  (i) single subject Home Science laboratory
  (ii) multipurpose home science laboratory
- Sustainability through innovative designs
- Guidelines for teachers

Unit VII: Evaluation in Home Science

- Measurement vs Assessment vs Evaluation
- Concept and Types of Evaluation
  (i) Diagnostic
  (ii) Formative
  (iii) Summative
- Evaluation as a continuous and comprehensive evaluation
- Techniques and devices of evaluation in Home Science

Practicum

- Enrichment of major concept in Home Science through peer learning
- Home Science Laboratory:
  - Critical evaluation of existing Home Science laboratory in the school and suggest modification for effective use.
  - Planning of ideal Home Science Laboratory for both single subject and Multipurpose use
- Prototype construction of Home Science laboratory
- Development of unit and lesson plan
- Construction of multimedia programmes in Home Science
- Development of curriculum

Rationale
The paper aims to enable students to understand the nature and evolution of the discipline of mental health. It focuses on developing an informed perspective on the key concepts, issues and debates in the field. The focus is on developing practitioners in education who are able to identify and address mental health concerns and issues within the personal and social realm. The paper facilitates the development of a personal reflective approach in building sensitivity towards mental health concerns within school and community settings. It also aims to build some basic guidance and counselling skills in student teachers.

UNIT-I: Mental Health: Historical and Contemporary Perspectives
- History and Evolution of Mental Health, with special reference to the three forces of psychology.
- Key Debates and Issues in Mental Health: Mental Hygiene vs. Mental Health; Universalism vs. Cultural Relativism; Nomothetic and Idiographic approach; Statistical and Ideological Perspective.
- Notions of a Healthy Personality.

UNIT-II: Mental Health: A Life Span Perspective
- Understanding issues of mental health at home, school and society, with reference to childhood, adolescence and young adulthood.
- Mental health concerns
  - Frustration, conflict, stress and anxiety: Sources and management. Conflict and Frustration: Sources and Management
  - Development of Life Skills and Building of Resilience

UNIT-III: Mental Health in Schools
- School Based Issues and Concerns: Home-school continuity – discontinuity; diverse school contexts; mental health concerns of teachers.
- Guidance and Counselling
  - Concept, need and techniques
  - Notion of teacher as a counselor
  - Designing and evaluating mental health interventions and programmes

UNIT-IV: Social Issues in Mental Health
- Media, technology and communication
- Contemporary lifestyles and related issues
- Negotiating stereotypes: Gender, caste, class, region, and religion.
- Gender roles and sexual orientations
- Religion and Morality

Suggested Practicum
Students are expected to undertake three practicum tasks which maybe as follows:
- Collect and analyse five newspaper reports or articles from magazines or research papers from journals each, on at least three different themes, such as: Violence and
aggression in schools; insensitive teacher attitudes; parental pressures and inter-generational conflicts; academic stress and competitiveness; substance abuse in school going children; peer sub cultures.

- Identify a Feature Film or Documentary film depicting one or more mental health issues and concerns. Draft an in-depth review based on your understanding of the issues in Mental Health as well as Educational Psychology.

- Choose a mental health issue and identify at least three resources that can be used to develop a deeper understanding on the concern. Present your understanding through annotations of the resources and share them in the mental health group.

- Identify mental health concerns of school going children across the different life stages. Develop a detailed report on the same based on your observations in schools.

- Identify stereotypes presented, propagated, or challenged, in popular media such as magazines, films, television, radio, etc. and analyse the same.

- Conduct a field based project on teachers’ mental health concerns through observations and interviews. Develop a report of the same and give suggestions for promotion of mental health of school teachers.

- Identify the various community based mental health services offered in your residential area. Visit any one NGO/ clinic/ hospital providing mental health services and document the experiences of practitioners in the setting, particularly those that relate to school going children.

- Develop a questionnaire and conduct a brief survey to identify and analyse social perceptions towards mental health and illness.

**Books**

Research Papers

**Documentaries and Films:**

B.Ed. Two Year Programme

E.2 : Art Education

Maximum Marks: 100

Objectives

- Develop the conceptual understanding of Art and its fundamentals.
- Sensitize/appreciate the relevance of Art in human life.
- Acquire a conceptual understanding of the key ideas in Art Education.
- Develop critical understanding of value development in Art Education.
- Develop an understanding of the implications of Art in Education.
- Sensitize towards the problems and issues in Art Education.
- Develop art appreciation.
- Develop critical understanding of different teaching strategies, evaluation techniques and curriculum problems in art education.

Theory

- **An Introduction to Art Education** – A consideration of the formal and informal theory in Art education with emphasis on building a theoretical basis for education in the arts. Lectures, reading, discussions covering the history, theory and profession, Literature of Art Education.
- **Curriculum problems in Art Education** – An examination of curricular plans as tool for transforming selected concepts in art education into teacher–student activities in the classroom.
- Interaction and motivation in art education – An examination of the meaning, different types and medium of motivation.
- **Special Problems in small / large group instruction** – An examination of problems in small/large group with reference to total programme planning, evaluation etc.

Suggested Practicum

Department of Multimedia Material for Art Education in Senior Secondary Schools.
Preparation of Instructional material for education in the arts for Secondary School.
Organising the Art Club.
Case studies of the children’s work of art and their understanding of the concept of Art.
Reading List

B.Ed. Two Year Programme

E.3 : Computer and Web Technologies in Education

Maximum Marks: 100

Aim
The course intends to develop an understanding of use of Computers and Web technologies in Educational Context. Specifically the Course will have the following aims: Become aware of fundamentals of computers and widespread use of various application software in education; become familiar with web technologies and their role in pedagogical approaches; become aware of the potential and practical issues / problems of computer and web technologies usage in their own subject area.

Unit I: Computers in Education

**Fundamentals of Computer**
- Hardware and Software
- Troubleshooting, Networking and Internet Security

*Introduction to Application Software in Education*
- Proprietary and Open Source Software
- Generic (Office, VUE etc.) and Subject specific application software
- Assistive technologies in Education

Unit II: Web Technologies in Education

- Introduction to Web technologies: Web.1.0, Web.2.0, & Web.3.0
- Web 2.0 technologies for classroom learning
- Learning Objects: concept and its applications to educational contexts
- Computer / web supported pedagogical approaches (Computer Assisted Learning (CAL), Problem Based Learning, Project Based Learning, etc.)
- Computer / Web Technologies in School Administration
- Web tools for assessment of/for learning
- Information literacy: Concept, Components, Standards, and its application to educational contexts

Unit III: Introduction to programming

- Basic, LOGO, and C

Unit IV: Issues related to Technology Integration in Education

- Practical issues in integrating computer and web technologies for classroom learning

Sessional Practical
Project Work (in small groups) on subject specific themes using application software and web technologies

E.4 : Education and Technology

Course Objectives

The paper aims to enable prospective teachers to:

- develop an understanding of the concept, nature, scope and importance of Educational Technology.
- distinguish between communication and instruction in order to design sound instructional system.
- create an awareness about models of teaching and teaching-learning aids in Educational Technology.
- obtain total perspective of the role of techniques in educational practice.
- acquaint with emerging trends in Educational Technology.
- reflect upon application of educational technology, as a whole, in the field of education.

Course Contents

UNIT- I: Understanding Educational Technology

1. Concept of Educational Technology: Types of Educational Technology, difference between hardware & software technology, their role in modern educational practice.

2. Educational Technology: Nature and assumptions, factors influencing the application of Educational Technology, development of Educational Technology.

UNIT- II: Psychological Bases of Modern Technology

1. Psychological bases of modern technologies with reference to Ausubel, Skinner and Bruner.

2. Instructional design - cybernetic psychology and system analysis.

3. Bloom’s (Revised) taxonomy of objectives, constructivism and educational technology.

UNIT – III: Communication & Interaction

1. Communication & Interaction: Theory of communication, types of communication, communication & language, communication in the classroom, barriers in communication.

2. Print & non-print media in communication, various types of print & non-print media.
3. Educational Technology as a tool for social change: Reach, mobility and accessibility.

UNIT – IV: Models of Teaching & Teaching-Learning Aids
1. Concept, meaning and characteristics of models of teaching, models of teaching strategies, assumptions and fundamental elements of teaching models.
2. Teaching aids: Edgar Dale’s cone of experience and components.

UNIT – V: Innovations in Educational Technology
1. Multimedia in Education: Computer Assisted Instruction (CAI), Tele-Conferencing, Programmed Instruction, Satellite Communication, Internet and use of multimedia presentation, web 2.0 tools, Open education resources and Information and communication technologies, ethical, social and technical issues.
2. Recent trends in Educational Technology
3. Issues in context: Differently abled learners, teacher replacing technology, learner’s interpersonal relationship and technology.

Practicum/Mini Projects (Any three of the following) –
1. Development of the Programmed Instruction – Branching, Linear.
2. Writing of a term paper on the given course contents.
3. Development of communication plan.
5. Critical review of Educational program presented through video-cassettes, TV, CDs or any other medium (any two).
6. Interface with educational technology industry (through excursion).
7. Application and use of a recent technology tool in the classroom activities.

Suggested Readings

B.Ed. Two Year Programme

E.5: Environment Education

Maximum Marks: 100

Objectives

- To make student-teachers aware of the concept of environment and development.
- To enable future teachers to understand the conflicts and inequalities that result from the complex interaction of social and environmental factors.
- To encourage inquiry into the role that teachers can play in dealing with curricular areas that focus on environment.

Unit 1: Concept of Environment

- Meaning of the term Environment and its relation to human beings;
- Critical examination of its historical and conceptual antecedents;
- Assessing the state of the environment;
- Study of environmental concerns including perspectives from both social and natural sciences;
- The emergent inter-disciplinary perspective

Unit 2: Understanding Development in the context of Environment

- Notion of Development as continued social, political and economic progress;
- Significance of ‘well-being’ of the global community
- Addressing the real and complex issues of Development; Their relationship to the natural and social systems
- Issues of sustainable development; Need for and challenges to sustainable development; Study of alternative approaches to sustainable development

Unit 3: Educational Issues and Challenges

- Study of policy documents pertaining to environment; Policy Formulation and Analysis vis-à-vis development concerns
- Significance and scope of environmental issues at the global, national & local levels in school curriculum
- Role of teachers; Development of skills and abilities to deal with curricular areas related to environment in the classroom

Practicum

- Analysis of relevant documents depicting voices of concern for environment
- Analysis of case-studies from different contexts and settings symbolising traditions and attitudes to environment.
- Project-work- Dealing with any one topic related to issues of environment in the school curriculum
List of Readings

Reports and Journals for study

- Journal “Terra Green” by TERI, India.
- Journal of Environmental Sciences, Elsevier
B.Ed. Two Year Programme

E.6: Human Rights Education

Maximum Marks: 100

Aim
This course seeks to help students:
- Develop analytical skills to question and appraise Human Rights policies and practices at national and international levels;
- Explore the substantive knowledge of policies concerning Human Rights Education, prevailing trends in the field of Human Rights Education and of the challenges and contributions of critics;
- Perceive improvements, discern ambiguities and identify contradictions in the field of Human Rights Education;
- Understand the roles of various state and non-state agencies in the promotion and enforcement for Human Rights; and
- Identify potential roles for oneself in the promotion of Human Rights Education

UNIT-1 Conceptualizing Human Rights and Human Rights Education
- Introduction to Rights, Human Rights and Human rights Education with reference to Philosophical, Psychological, Political, and Sociological perspective.
- Approaches to Human Rights: western political liberalism, socialism and social welfare principles, cross-cultural rights traditions, and the UN instrument.
- Understanding Human Rights from policy perspective

Unit-2 Emerging Concerns in Human Rights
- Debates in the Human Rights discourse: Universal versus Relativism, Legal versus Ethical demands, Rights versus Human rights, Collective versus Individual rights, West versus Rest
- Methods of Human Rights Research and Human Rights as pedagogy
- Critical review of Democracy with reference to Human rights
- Revisiting of Indian constitution with reference to Human Rights
- Critical review of Human Right in globalized world

Unit-3 School Education and Human Rights Perspective
- Human Rights perspective in curriculum
- Human Rights perspective in teaching-learning Processes
- Human Rights Perspectives in Assessment
- Human Right Perspective and school ethos and culture
- Inclusion and Exclusion
UNIT- 4 Issues, Movements and Promotion of Human Rights

- Understanding Human Rights of Children, Women, Minorities, Dalits, Differently abled and Homosexuals.

Practicum

Learner may take any two tasks from the following:

- A case involving violation of human rights
- Human rights in a socio-cultural context
- Short placements with programmes or projects dealing with Human Rights Education
- Review and Critical Analysis of National Policy Documents with reference to Human Rights Perspective
- Awareness Camp to promote Human Rights Education
- Series of Street plays (nukkadnaatak) about Human Rights Education
- Any other task after consolation with teacher

Suggested Readings

B.Ed. Two Year Programme

E.7: Peace Education

Maximum Marks: 100

Objectives
- To make future teachers aware of the scale and variety of conflicts affecting contemporary life;
- To encourage inquiry into the complex role that institutionalized education plays in the context of different types of conflicts;
- To enable students to develop personal initiative and resources for the pursuit and promotion of peace.

Unit I: Conceptual Introduction
- Role of Education in Personal, Social, National, Global and Universal spheres; coherence and contradictions among these roles; Origin of Jealousy, Hostility, and Violence; Relations between humans and nature: the question of environment.
- Self and Identity: the enabling functions of 'self' in the context of motivation, development and adjustment; Freud’s theory of the structure of the psyche.
- Individual and collective self; duality and conflict: interpersonal, communal, national.
- Understanding Conflict: The use of perspective, symbols, stereotypes, and rhetoric in analyzing communication and representation of contentious issues in television and other modern media; analysis of textbooks from the perspective of peace.
- Analysing life at school: culture of competition; corporal punishment and its consequences; role of family; gender roles and stereotypes.

Unit II: Preparation for Peace
- Introspection, Mediation, Persuasion: Cultivating the perspective and skills necessary for peace;
- Sources of stress and conflict: analysis and reflection of circumstances leading to stress and conflict.
- Dialogue: The concept and its applications in life in the family, school, and among peers;

Unit III: Philosophical Resources
Some Thinkers of Harmony: Study of relevant extracts from the writings of:
- Gandhi (‘Brute Force’ and ‘Passive Resistance’ in *Hind Swaraj*)
- Tagore (‘Civilization and Progress’ and ‘Nationalism in India’),
- Sri Aurobindi (‘The Ideal of Human Unity’),
- Krishnamurti, J. (‘Education and World Peace’),
- Montessori (‘Peace and Education’)
- Russell (‘Knowledge and Wisdom’),
- Iqbal (‘Is Religion Possible?’),
- Dalai Lama (‘Universal Responsibility’).

Other extracts from the writings of these thinkers can be added.
Unit III: Issues and Challenges
Study of ongoing conflicts in the political, economic, socio-cultural and ecological spheres;
Case studies of major conflicts between nation-states; Study of successful struggles for peace and ongoing processes of dialogue; Nationalism and its critics; war and markets;
globalization: Economy, Politics, Technology; meanings and implications;
Childhood in conflict settings: case study of areas where conflicts of different kinds have led to displacement, violence or persistent social turmoil.

Practicum
Excursion to sites or monuments symbolizing introspection; Organizing morning assembly, mediation, exhibition, etc. on peace-related themes.

End of term project: Each student will be required to submit and present in class a paper covering a short analysis of any contemporary conflict and a proposal to resolve it.

B.Ed. Two Year Programme

E.8: Adolescence Education

Maximum Marks: 100

General Aim

- To enable the student teachers to develop sensitivity, understanding and knowledge about Adolescence issues.
- To facilitate a positive attitude towards the importance of Adolescence Education Programmes at the school level.

Specific Objectives

Pupil Teachers will be enabled to:

- Develop knowledge and sensitivity on matters related to reproductive health, sex and sexuality and communicate effectively on these issues.
- Develop understanding about physical, physiological, psychological, socio-cultural and interpersonal issues related to the processes of growing up.
- Inculcate a healthy attitude towards sex and sexuality, respect for the opposite gender and an understanding of responsible sexual behavior.
- Develop an understanding about the desired life skills.
- Build a perspective on the socio-legal and cultural issues related to sex and sexuality.
- Acquire skills to use certain techniques such as question box, role play, value clarification and case studies, for enacting Adolescence Education Programmes.

UNIT 1 Adolescence Education: Introduction

- Adolescence: Understanding of physiological, socio-emotional, cognitive and cultural aspects.
- Adolescence Education: Concept, Need and Relevance.
- Issues and Challenges during Adolescence
- Role of Social Agencies in Adolescence Education.
  - School, Family, Media, Community

UNIT 2 Life Skills Education

- Understanding the need, concept, and significance of Life Skills Education
- Relationship between Life Skills and Adolescence Education
- Detailed study of Core Life Skills.

UNIT 3 Sexual and Reproductive Health

- Understanding Sexual and Reproductive Health
- Myths and Misconceptions
- STIs and HIV/AIDS: Causes, Prevention, Cure and Skills of Coping

UNIT 4 Empowering Student Teachers

- Preparation of Teachers
  Dealing with personal self constraints, Socio-cultural issues, Class room issues and challenges
**Pedagogical Approaches to Adolescence Education**
Case studies and Critical Incidents, Brainstorming, Role-playing, Buzz groups, Gaming, Value clarifications, Question Box, Discussions and Debates, Puppet shows, Role Reversal, Walkabouts, Video shows.

**Suggested Practicum**

a) Field visit/s

b) Review and analysis of the work done by Government and Non Government Organisations (NGO) at national and international level.

c) A research study or detailed case study:
   - Adolescents’ behavior in different socio-economic settings.
   - A study on child abuse victims
   - Adolescents in drug rehabilitation centers
   - Adolescents residing in the precincts of industrial areas and factory establishments
   - Adolescents in the educational regions showing either higher or lower drop-out rates.
   - Adolescents belonging to communities in which social evils affecting them are manifested like child marriages.
   - Conducting Adolescence Education sessions in School.

The EPC will offer options in different areas of arts and crafts for students, after an initial introduction to the general theme of the EPC with the help of the following topics:

Concepts in Aesthetics and their application in the different domains of art, such as visual art, music, theatre, dance, and in the sphere of India’s heritage crafts.

Introduction to crafts: material, tradition, design, technique; applying these concepts in any one craft selected by the student

Art appreciation: Developing sensibility and aesthetic appreciation in any art form selected by the student.

The following syllabus of two options has been approved. The syllabi for more options can be drawn by different institutions.

Option I: Drawing and Painting

Objectives
The EPC has been designed to giving weightage to discover for oneself new abilities, whether limited or superior, to walk in fresh paths of self-expression and to feel life is a never ending adventure. It focuses on developing understanding of art, its relation with life and its experiences. It is may give pupil teacher a brighter outlook, develop independent decision making, develop the attitude to explore and experiment; opportunity to commune with oneself, express oneself fearlessly with originality, develop stand alone spirit, experience peace and joy within self; inculcate the value of non-verbal expression and inward self sufficiency. The process also weaves in developing appreciation towards the artistic heritage and folk arts. Improvement in the direction of quality will come as a matter of experience.

Concept of art
Meaning of Art, its purpose and relation with life. Misconceptions in Art. Discussions on art through the examples of the works of arts of old masters and contemporary artists, child art, folk art and artistic heritage.

Method and material
Orientation to different methods and material. Know the different medium, their nature and characteristics.
Composition
- Compositions based on topic/theme with any material and medium and method and technique (water/poster colours/oil pastels, mixed media, pencil/charcoal/oil/acrylic or any innovative medium) on the sheet/canvas/hard board.
- Outdoor sketching - Study of textures in nature - study of variations in nature - study of light and shadow.
- Calligraphy with freehand.
- Print making with different methods and techniques including exploration and experimentation with new material/method (marble printing/usage of different easily available material for taking prints)

Mounting and Framing
Mounting the work. Display of mounted/framed work (with any material such as glass or mounting with chowksi board/pastel or Ivory sheet or any material used innovatively).

Option II Drama in Education
Transformational education involves reflection, introspection and action, with a deep relationship between the head, heart and body. The National Curricular Framework 2005 (NCF) reminds us that the school curriculum must integrate various domains of knowledge, so that the ‘curricular’ encompasses all, and is not separated from the co-curricular or extra-curricular. This has significant implications for the role of art, music and drama in education, to nurture children’s creativity and aesthetic sensibilities.

Learning is enhanced through Drama in Education (John, Yogin, & Chawla, 2007), which helps learners to extend their awareness, through multiple perspectives: to look at reality through the imaginary. The challenge is for prospective teachers to firstly, draw out and refine their own creative capacities and then, to understand drama along with its pedagogical foundations in order to draw up well-planned drama-based explorations. In planned drama, the emotions, intellect, senses and social aspects of the child are harnessed, challenged, extended and reflected upon by students, both individually and as group. It gives opportunities for learners to recognise their agency, for transformational action. Drama helps the student to:

- Experience another time and people – their everyday life, behaviour, customs and values and so discover their heritage
- Make significant connections between the subjects in the curriculum – how they intersect and interplay both conceptually and in everyday life
- Experience the relevance of taught subjects with issues connected with their own lives. For instance, what are the links between the traditions of the Indian national movement and their lived lives today?
- Prepare themselves for life now and the future in terms of facing difficult situations, weighing options, making informed decisions and taking responsibility for their repercussions.
- Cultivate an understanding, sensitivity and sensibility to others who come from varied social, cultural and economic background and see themselves as part of a
larger multi-dimenional whole. In the present context where children are growing up in starkly segregated environments, bounded by caste, class, religion or gender, drama must be used to potentially interrogate these categories - Who is the other? Why? How is the process of ‘othering’ happening in different lives?

- Explore and make choices for themselves of values as they impact on life, decisions and their repercussions.

Adopting drama as a learning-teaching methodology requires the teacher to be teacher – facilitator – artist rolled into one. Among other things, s/he needs to:

- Inculcate, extend and hone in her creative capacities and skills
- Identify themes worth exploring through drama,
- Plan and execute it,
- Take on roles herself even as she leads children into it,
- Adopt a range of drama and other strategies
- Understand and play the role of facilitator
- Help children reflect and internalize their learning

While the focus of this module is on drama in the classroom rather than history and forms of theatre, the student will also be given an understanding of specific forms like folk and street theatre that have educational value.

- Games / Play / Drama – distinctions & their role as learning methodologies
- Pioneers of drama - in - education.
- Theatre heritage
- Drama, language and Inter-connections
- Building artistic capacities: imagination, action, rhythm
  - teaching through arts: integrating image, music, word, movement
  - Teacher as facilitator of learning / teacher as artist
- Strategies of participatory learning. Role play, etc
- Ethics of drama practice in the classroom

B.Ed. Two Year Programme

EPC.2: Critical Understanding of ICTs in Education

Maximum Marks: 50

Aim
This course focuses on providing practical experience and reflective engagement on critical issues related to Information and Communication Technologies in a workshop mode through presentations and seminars around selected readings. The course intends to engage student teachers to understand the role of ICT in education in relation to various policies and curriculum frameworks on ICT and in diverse socioeconomic contexts.

The course aims to provide a rich learning experience for student teachers through various ICT tools to enable them to engage diverse classroom contexts, to critically assess the quality and efficacy of resources and tools available, to access and suitably modify open educational resources, to develop their own pedagogic materials and pursue lifelong learning to strengthen their professional capabilities.

Unit 1 ICT in Education: Critical Perspectives
- ICT in the neoliberal era
- Technological determinism and its fallacy in education
- Free and open source movement and its impact on education
- Harnessing ICT’s potential for education towards an egalitarian society
- Locating ICT in the context of National Policy on ICT in school education, national policies in education, curriculum frameworks for school and teacher education
- Legal and ethical issues of ICT use in education

Unit 2 Engaging with ICT for Teaching-Learning
- Understanding how to create and use documents, presentations, spread sheets
- Acquiring basic information literacy (web searching for discerning information sources)
- Understanding modes of web learning (virtual learning, blended learning etc.)
- Engaging in collaborative learning through synchronous and asynchronous ICT tools (email, web chat, blogging, micro blogging, wikis, and ICT technological tools)
- Understanding and using web supported pedagogical approaches (problem/project based learning, computer assisted learning etc.) through ICT tools
- ICT for assessment of/for learning
- Critical review of proprietary vs open source software use in education - open digital eco-system, open educational resources (OER), open connectivity, (free and) open source, open hardware.
- Developing functional skills to use discipline specific ICT tools (Geogebra, PhET,Stellarium, Open Street Map, Marble, Turtle Art etc.)
- Developing an understanding of assistive technologies for inclusive classrooms
- Observing Netiquette
Unit 3 Professional Development through ICT
- Setting up teacher professional networks
- Lifelong learning through OERs, MOOC and other possibilities
- ICTs for material development; TPACK framework

Practicum
The student teachers will get practical experience of the ICT tools mentioned in Unit 2, to actively engage in learning, critically review/adapt open educational resources, create digital learning resources and participate in seminars and presentations.

Assessment
a. Preparing ICT integrated lessons based on teaching a subject/ theme
b. Individual student's portfolio on tasks related to critical understanding of ICT
c. Portfolio of digital resources for teaching learning; developing subject specific resources

References
2. DSERT Karnataka (2012). Position Paper on ICT Mediation in Education. DSERT
B.Ed. Two Year Programme

EPC.3 : Understanding Communication

Maximum Marks: 50

The following topics are suggested for detailed planning of this EPC by the resource person or faculty member who conducts this course in the 2nd year of the B.Ed. programme.

Teacher as Communicator: Awareness of audience as a key factor in communication; children as learners; communication and curriculum; using knowledge about learner psychology as a factor in shaping classroom interaction; the concept of language across the curriculum;

Interpreting response in oral interaction; feedback as communication;
Reading as resource; choice of readings; analyzing a text from the perspective of students; communication through different media.

Communication as a factor in Institutional Ethos;
Improving one’s own language proficiency in oral and written modes: narrating, describing, analyzing; Communication, language and ethics.

Writing Skills for Teachers: Writing letters, applications, reports, minutes, and essays; writing about research; writing annotations, references and bibliography; writing journals and reflective diaries, etc.
B.Ed. Two Year Programme

EPC.4 : Yoga

Maximum Marks: 50

The module developed by the NCTE will be adapted and used.
Curriculum for 2-year M.Ed. Programme

### Structure for the M.Ed. Student

a. Two Research Methods Courses: 200 marks

b. Five Perspective Courses: 500 marks

c. Three Specialization Courses (two from a cluster and one from any other): 300 marks

d. Dissertation: 125 marks
   - Projects: 50 marks
   - Research Seminar: 25 marks.
M Ed Two Year Programme

R.1 : Introduction to Research Methods in Education

Maximum Marks: 100

This course is the first in a series of two compulsory courses in research approaches and methods.

Course Objectives

The overall objective of this course is to introduce students to the paradigms and processes of social research with a focus on research in education; help students identify and define an educational research problem and develop an understanding of the research process through select field engagement. At the end of the course, students will be able to:

- Develop an understanding of the philosophical and epistemological basis of educational research reflected in the different paradigms of research.
- Understand inter-disciplinarity in educational research; nature, level and scope of educational research.
- Identify the several components of research approaches that characterise quantitative and qualitative research methods; similarities and differences, and the basis of choosing each form of research.
- Identify areas of enquiry and derive relevant questions for undertaking educational research.
- Identify and select appropriate theoretical and conceptual basis for undertaking a research problem.
- Design a study to address a research problem, including methods of data collection and analysis.
- Identify and analyse ethical issues present in a research study.
- Develop tools for critiquing components of a research study: the purpose, the problem, research questions or hypotheses (as appropriate), methods of conducting research and analysis.

Units of Study

Unit 1: Paradigms of Research: questions of ontology, epistemology, nature of enquiry in historical and contemporary perspectives; positivist and post-positivist, interpretivist, critical theory and feminist research paradigms; nature and scope educational research; generalizability in educational research.

Unit 2: Introducing Research Design: understanding research design, method and process in relation to ontological and epistemological questions that create shifts in paradigms of research; relationship between theory and research, research and educational practice with specific reference to grounded theory.
**Unit 3:** Understanding Quantitative and Quantitative Research Approaches: comparison of quantitative and qualitative traditions and methods; design, methods, type of data and tools of collecting data, data analysis and interpretation; mixed method research approaches.

**Unit 4:** Qualitative Research: the foundations of qualitative research in education; the research problem, the research question, theoretical frames and basis and review of empirical studies; research design: questions, cases, and samples; access to sites and participants; field relations and ethical issues; methods of collecting data: observation, interviewing, and writing field notes; content analysis: quantitative and qualitative approaches; conceptual foundations; inferences; sampling and recording; creating a coding scheme; unitizing; identifying and limiting the data source; validity and reliability; the process of analysis and interpretation, and writing and reporting on research.

**Unit 5:** Methods and Tools of Qualitative Research: Phenomenological research, ethnographies, case study, historical and document analysis, historiography, narratives, biographies and life histories, unstructured and semi-structured interviews, open-ended observations, participant observation, focus group discussions etc.
Rationale of Course

The aim of this course is to engage students with the primacy of history and the unique potential about history’s fundamental attributes, both as a means of inquiry and a means of understanding education. It would enable students to develop perspectives in the colonial and post colonial patterns of education engaging them with historical contexts, debates and processes within which a State system of education emerged. Students will be able to explore questions related to colonial knowledge and its pedagogical agenda in diverse contexts that continue to shape education in India today. The Course would promote insights in historical inquiry where the locus of inquiry is the complex relationship between the past and the present. At the end of the course, students should be able to meet the following Objectives:

- Develop an understanding on the interpretive nature of history and historical inquiry.
- Analyse and integrate source material critically as historical evidence.
- Understand the emergence of colonial education and the nationalist counter response with its tragic failure to challenge the basic forms, content and subtexts of colonial knowledge that has a relevance today.
- Engage with critical perspectives on the educational system and patterns in a democratic and secular country with a diverse socio-cultural context and its relevance in the contemporary context of a globalised world.
- Comprehend the changing trajectories of knowledge in history of education through the lens of subaltern and feminist studies.
- Examine how education emerged as a central concern in the nationalist quest for equality and self identity.
- Nurture capacities to critically reflect on historical realities, respect for diversity and secular values and challenge the social forces that threaten these values.

Units of Study

Unit I Primacy of History

- The Centrality of Historical Insights and Dialogue through Time.
- Construction of Knowledge in History
- Periodisation; Generalisation, Objectivity and bias in History.
- Perspectives on Thinking Historically.
Unit II  Trajectory of Indian Education System
- Indigenous System of Education
- Emergence of  the State System of Education.
- Legitimate Knowledge: Conflict of Curriculum and Culture
- Nationalism, Cultural Processes and the Acculturating Role of Education
- Textbook Culture, New Knowledge and New India.

Unit III  Historical Contexts, Contestations and Challenges
- Ideology and Interpretation in colonial history
- Subaltern perspectives.
- Feminist perspectives; state embodiment of the female teacher 'trainer'.
- Decoding literature as mask for economic exploitation.
- Pursuit of equality; Alternatives to colonial education.

Unit IV Post Colonial Patterns in Indian Education System
- Towards a National system of education
- Plural societies and multiple pasts; Contemporary Eurocentric perspectives
- Engendering histories-some theoretical issues
- Education and the New Imperialism

Unit V Deconstructing Colonial and Post Colonial Histories
(Through Term Paper/Seminar Presentation)
- Understanding Partition through memories.
- Debating and Speculating Heritage.
- Politics of patronage and institutionalisation of language hierarchy.
- The quest for identity in colonial India.
- Meanings of Progress.
- Neo liberalism

- Kumar, Krishna (2001), Prejudice and Pride: School Histories of the freedom Struggle in India and Pakistan, Penguin, New Delhi (Also available in Hindi as Mera Desh Tumhara Desh published by Rajkamal in 2007).
- Kumar, Krishna (2014), Politics of Education in Colonial India, Routledge Taylor and Francis Group, New Delhi
- Seal, Anil (1968). The Emergence of Indian Nationalism. Cambridge University Press.
- Seminar (# 522, February, 2003), Rewriting History - A Symposium on ways of representing our shared past - articles by Neeladri Bhattacharya, Sumit Sarkar, C. N. Subramaniam, Rashmi Paliwal, Tanika Sarkar, Kumkum Roy, Urvashi Butalia, Krishna Kumar, Partha Chatterjee and others.
Course Vision

The purpose of this course is to help the scholars build a theoretical foundation of curriculum development. This course will orient the learners to what curriculum is and what processes are involved in curriculum development, how curriculum is understood both as explicitly planned course and as through latent or hidden experiences gained in school settings. The learners will get to understand the nuances between the curriculum that is intended (through policy frameworks), how it gets implemented (in schools) and what aspects will help in gauging its attainment.

Unit 1 Theoretical Foundations of Curriculum Development

(i) Changing concept of Curriculum and its Contextual trajectory

Major Orientations in Curriculum Study
(a) The Content of Education
   • Conceptual Structure of Discipline:
     Epistemological, Psychological, Sociological orientations (Paul Hirst's Structure and Forms of knowledge, Bruner on Knowledge construction, Schwab's Ephemeral character of knowledge)
   • Psychology of learning:
     Cognitive development and Curricular practices
   • Sociology of Knowledge
   • Politics and Sociology of Curriculum

(b) Teaching -Learning Process in Curriculum development
   • Behavioral Objectives Model and its implications
   • Process Model and the associated issues

(c) The Evaluation of Curriculum
   • Formative Evaluation: feedback and guidance for shaping the curriculum through the successive revisions at the developmental phase
   • Summative Evaluation: appraisal of the emergent curriculum
   • Models in Curriculum Evaluation
Unit 2: Research Problems in Curriculum Development

- historical development and reforms
- curriculum change
- process of decision making in curriculum
- relationship between intended, implemented and attained curriculum
- understanding hidden curriculum
- curriculum in action at the site of classroom
- critical analysis of curriculum and teaching materials

Unit 3: Trends in Curriculum Development in India

Basic education, Mudaliar and Kothari Commissions, National Curricular Framework of 1970's, 1986, NCF 2005

Research Oriented Work:

1. Identify curriculum perspectives in the literature and develop an annotated bibliography
2. Identify issues and methods in your own discipline by supporting with relevant literature review on a curriculum topic of your choice.
3. Assignment on critically reflecting on the issues discussed on the theoretical foundations of curriculum construction and commenting on the future of curriculum theory.

References:

M Ed Two Year Programme

P.5.6 : Marginalization, Schooling, and Education

Course Vision

Given the increase in India’s demographic diversity, especially in educational institutions, it is critical for an Education Programme to include an understanding of diversity and marginalization within the classroom and recognize the need to develop sensitivity towards this aspect. However, classrooms today are ill equipped to handle this need. Classroom teaching and practice operate with an assumption of homogeneity. The teacher maintains what she considers the ‘norm’. Students are encouraged to be part of the ‘mainstream’. Any deviance from the norm is disregarded and even scoffed at. Many children thus have a traumatic relationship with schooling. Schools construct their learning environments without recognizing the complexities of the lives of children, the socio cultural backgrounds from which they come and very often negate their ways of knowing, leading thereby to their marginalization. This course, thus, aims at highlighting the need to understand diversity and develop an understanding/sensitivity and appreciation of difference. There is an attempt to view schooling and education from the perspective of marginalized groups. It will help in building an understanding which will equip them to work effectively with students from diverse background including cultural, religious minorities, linguistic and different socio-economic groups.

This Course can also include a practical component.

Objective: Upon completing the Course, students should be able to do the following:

- Define and analyse the concept of diversity and marginalization in the context of education and schooling.
- Understand the need to appreciate and respond to difference and its implications for children.

I. Understanding Exclusion and Marginality.
   Social, cultural, political, and economic dynamics of Exclusion
   Language and Marginalization: Education and language, politics and language

II. The Learner’s Profile: Recognition of Diversity, appreciation of difference and differing perspectives, Examining the differences based on social, cultural, political, and economic factors.

III. Culture of Schools and Classrooms. Assumptions about students’ backgrounds. Differential participation and achievement in schools.
Theories regarding the “marginalized” groups participation and achievement in schools: Deficit model and its critique, discontinuities/mismatch and its limitations, multilevel comparisons of different groups.

IV. Understanding Diversity in the School
Discounting Diversity, transition from home to school Possibilities of Exclusion.
Construction of the ‘Other’ – Assumptions, Stereotypes, Prejudice, Humiliation
Forms of discrimination and ‘de-valuation’
Schooling and its meaning for the ‘Other’
Resistance and Counter School Culture

V. The Silenced Dialogue: Power and Pedagogy
Classroom Processes and School Texts
Schooling and the Hidden Curriculum

VI. Towards a Culturally Responsive Pedagogy - Addressing diversity in schools.
Multicultural Issues in Education – Shaping curriculum for Diversity
Communicating across cultures.
The language Issue – Lost in translations
Need for Segregated schooling – Inevitable or avoidable

- Internship in a diverse school setting – linguistic/religious/caste/rural
- Seminars - Designed to explore and reflect upon issues that arise during their internship.

M Ed Two Year Programme

S.Ma 1 (a) : Introduction to Mathematics Education

Maximum Marks: 100

Course Vision

This course has been designed for students who wish to understand the nuances of development of mathematics as a disciple. The course delineates main assumptions behind a range of theoretical perspectives on the nature of mathematics. The course engages in conceptualising and analysing the processes that promote learning of mathematics from a disciplinary perspective. Issues and related to nature of language of mathematics and how linguistics affect learning of mathematics will deal with through seminal scholarly texts and researches. Scholars will also study contemporary researches in Mathematics education and teacher development.

Unit 1: Essence of Doing Mathematics

The focus of this section will be on understanding how mathematics is a humanly created subject. The premises of promoting analytical thinking and how it leads to creating mathematical structures will be studied.

What is mathematics? Mathematics as a study of patterns; of shapes, chance, numbers, motion, variation. What does it mean to think mathematically? Building logical thinking, analytical thinking and quantitative reasoning.

What are axioms, origin and significance of axioms; Understanding how axiomatic systems form the basis of creating mathematical structures. Importance of being creating axioms, being absurd, paradoxes and intuitions.

Proof and proving: nature of proof, Methods of proofs: proving conditionals, by contradiction, proofs by induction. Methods of proving: creating conditions, using examples and non-examples, logical argumentations, conjecturing and postulates, proofs without words; how these build mathematical structures.

Unit 2: Learning Mathematics

In this section the focus will be on building a disciplinary perspective of mathematics. Significant aspects and perspectives of cultivating reasoning and communication; problem solving and problem posing, mathematical talks and evolution of concepts will be identified and critically analysed.

Perspectives on learning mathematics- Piaget, Skemp, Bruner and Vygotsky; Fischbein on intuitive thinking

Dealing with abstraction, particulisation and generalisation, Processes of proof and proving, conjecturing, arguing; use of phrases associates with proving; special case, extreme case, counter example, existence proof, abstracting, generalising Problem-solving and Problem posing, patternning, reasoning
Discourse and dialogue, Communication in mathematics classrooms, use of discourse as the basis for encouraging students' mathematical thinking in classrooms

History of Mathematics, historical development of major ideas in mathematics, evolution of concepts, contributions of noteworthy mathematicians, analysis of classics in mathematics

Mathematical modelling

Unit 3: Mathematics, Language and linguistics

Issues and related to nature of language of mathematics and how linguistics affect learning of mathematics will dealt in this section.

Mathematical notations, Nature of Mathematical language: precision; graphical and symbolic logic and expressions; underpinnings of language of mathematics: as qualifiers, implication, equivalence, quantifiers.

Nature of mathematical discourse: including specialist syntax; use of mathematical symbols; specialised ways of talking including written and spoken forms of mathematical explanation; word problems

Social dimensions: particular ways in which students and teachers talk in mathematics classes that are not specifically mathematical, but that are associated with mathematics.

Issues with bilingual and multilingual mathematics learners.

Unit 4: Research in Mathematics Education

This section will introduce key areas that are being researched in Mathematics education.

Purpose and scope of research in mathematics education in India. Contemporary and emergent issues in mathematics education.

History, issues and current trends pertaining to design and methodologies that have contributed in this area.

Research in policy making, teaching, student-learning in mathematics.

Unit 5: Teachers’ Preparation in Mathematics

Teacher’s knowledge and beliefs have a significant role in developing mathematical thinking in students. This section of the course is devoted to studying teachers’ understanding of the subject, association of teacher’s beliefs and knowledge and children’s leaning and reforms and challenges in teacher’s professional development.

Teachers’ knowledge and belief about the discipline of mathematics and its influence

Teacher’s subject knowledge and its effect on her pedagogical decisions, with respect to promoting mathematical thinking in classroom, reflective teaching practices in mathematics

M Ed Two Year Programme

S.Ma 2 (a) : Mathematics Curriculum : Development and Analysis

Maximum Marks: 100

Course Vision
The course delineates main assumptions behind a range of theoretical frameworks for conceptualising and analysing learning and teaching of mathematics at the developmental stages of a child and how they contribute towards an intended curriculum. This course is designed for analytic considerations related to the content, organization, presentation and evaluation of school mathematics curricula. Develop a critical perspective towards knowledge that is embedded in and anticipated to be attained in the mathematics curriculum in schools.

Unit 1: Philosophical Considerations of Learning Mathematics
Focus will also be given to the philosophical considerations of learning mathematics through the perspectives of:
- Cognitive- constructivist theories
- Interactionist theory
- Socio-cultural perspective of understanding mathematics, development of thinking and knowledge in and out of school settings
- Mathematics for social justice and citizenry

Unit 2: Mathematics Curriculum at School Level: Issues and Emerging Trends
Issues in curriculum making, power and politics of knowledge, critical view of curriculum at school level, reviewing the position of mathematics in national education policies and documents of India, compare and contrast mathematics curriculum across the world, critically analyse the perspectives and rationale adopted in other countries on goals of teaching mathematics, textbook and content analysis of different countries.

Unit 3: Contemporary Research in Construction and Development of Core Topics
In this section evaluation and critical analysis of research done in the development of core topics in elementary/ secondary school mathematics curriculum will be done. Students will choose area/s of their choice and will focus on the contemporary researches being done in understanding pedagogical concerns, approaches that promote students’ conceptual understanding and address anticipated learning difficulties; and teaching methods that provoke critical thought and foster inquiry-based learning in that area. Emphasis will on analyzing ways in which students make multiple representations, develop generalizations and give justification while developing understanding of these areas:

- Geometry
- Number sense and number theory
- Algebra
- Statistics
- Probability theory
- Elementary calculus
- Kinematics
- Language issues in mathematics
Unit 4: Assessment in Mathematics:
Perspectives related to assessment and learning mathematics will be studied as part of this section. Changing role of assessment, can assessment be seen as continuum to learning? Research related to contemporary issues related to assessing mathematical thinking. Assessment methods for linguistically, culturally and mathematically diverse students.

Critical analysis and comparison of large-scale mathematics tests such as TIMSS, PISA, Olympiads

Unit 5: Meeting Diverse Needs in a Mathematics Classroom
This section will discuss the theories and researches that ensure success of each child in an elementary mathematics classroom: Gender, socioeconomics, language, learning differences. Role of differentiated assessment, differentiated instruction and adapting curriculum to meet diverse learners will be considered.

M Ed Two Year Programme

S.Et. 1 (b): Basic Educational Technology

Maximum Marks: 100

Rationale
In the ongoing era, an expert in the field of education can’t be a real expert without having knowledge of educational technology. For having an in-depth knowledge and understanding of the subfield of educational technology, one needs to develop critical understanding of the concept and applications of communication, instructional theories, and procedures, models of teaching and recent trends in this field. As a whole, it has become almost essential to learn about educational technology to survive currently in the field of education.

This course is aimed at creating basic understanding of educational technology among beginners in this field in order to be better teacher educator in this technology-packed demanding era of teacher education. The set of experiences is visualized to develop not only theoretical understanding but also to exercise it having hands-on experience by the teacher educators. It is intended to enable teacher educators to recognize, understand and appreciate ET as an effective learning-teaching tool for teachers and an enormous functional support to teacher educators.

This course should be dealt with essentially as a competence development component with conceptual understanding of the technology dimensions and their educational utility. It is best conducted in the blended mode, with plenty of practicums.

A significant point is that the teacher educators have different levels of familiarity with ET, ICT and use of other technologies, and students can be made to work in cooperative and collaborative groups.

Objectives
• To explore and revisit the relevant syllabi at B.Ed. level in order to develop basic understanding of concept of educational technology
• To evolve learning tasks involving communication and instructions
• To explore models available for teaching
• To develop the critical understanding about appropriate instructional and learning material for teachers
• To exercise ET based learning experiences with face to face classroom interactions
• To hold group discussions on recent trends in ET and ICT

Unit 1. Evolution of Educational Technology: Continuum from audio-visual, educational technology to information and communication technologies
Practicum: Revisiting the B.Ed. syllabi related to ET and ICT

Unit 2. Classroom and Ubiquitous Communication: Continuum from teaching to learning in the light of face to face and virtual communication
Practicum: Studying elements of classroom communication with reference to models of communication
**Unit 3.** Instructional Theories and Procedures: Theories and procedures with special reference to Bruner and Ausubel  
Practicum: Preparation of instructional material for teaching of concepts

**Unit 4.** Models of Teaching: Conceptual understanding of models with special reference to Bruner and Ausubel  
Practicum: Development of teaching material based on models given by Bruner and Ausubel

**Unit 5.** Recent Trends in Educational Technology and Information and Communication Technologies: Researches and priority areas  
Practicum: Paper/article writing based on recent trends viz. open educational resources, web 2.0, social networking, cyber-bullying, etc.

**Suggestive Readings**

M Ed Two Year Programme

S.Et. 2 (b): Advanced Educational Technology

Maximum Marks: 100

Rationale
In the ongoing era, an expert in the field of education can’t be a real expert without having adequate knowledge of advanced educational technology. For having an in-depth knowledge and understanding of the subfield of educational technology, one needs to develop critical understanding of the concept and applications of instruction, communication, media, instructional designs, teacher behavior modification and recent trends in learning systems, policies and priority areas in this field. As a whole, it has become almost essential to learn about advanced educational technology to excel currently in the field of education.

This set of experiences is visualized with an assumption that many student teachers will have a basic familiarity with computers, even if they do not have much hands-on experience. It is intended to enable student-teachers to recognize, understand and appreciate ICT as an effective learning tool for learners and an enormous functional support to teachers.

This course should be dealt with essentially as a competence development component with conceptual understanding of the technology dimensions and their educational usability. It is best conducted in a blended mode, with plenty of practical assignments.

A significant point is that the student teachers have different levels of familiarity with ICT and use of technologies, and students can be made to work in supportive groups.

Objectives
• To explore and revisit the relevant syllabi at B.Ed. level in order to develop basic understanding of concept of educational technology
• To evolve learning tasks involving instruction, communication and media
• To explore instructional designs available for teaching
• To develop the critical understanding about appropriate instructional designs for teachers
• To exercise studying teacher behaviour modification based on experiences of face to face classroom interactions
• To hold group discussions and write articles on recent trends in learning systems, policies and priority areas

Unit 1. Basics of Educational Technology: Concept and evolution of educational technology and information and communication technologies
Practicum: Revisiting syllabi of Basic Educational Technology and ICT

Unit 2. Instruction, Communication and Media: Changing trends from face to face to virtual/online interaction, significance of virtual and mass media
Practicum: Paper/article writing on media and instruction

Unit 3. Instructional Designs: Programmed instruction, Keller’s plan, mastery learning, collaborative instruction, cooperative instruction, large group instructions
Practicum: Developing instructions for a course using any one design
Unit 4. Studying Teacher Behaviour Modification: Continuum from microteaching, interaction analysis to competence based teacher education
Practicum: Analysis of classroom interaction using Flander’s interaction analysis category system

Unit 5. Recent Trends in Learning Systems: Policies and priority areas
Practicum: Paper/article writing based on contemporary policies and priority areas

Suggestive Readings

M Ed Two Year Programme

S.Ss. 1 (e) : Epistemological and Conceptual Framework of Social Science Education

Maximum Marks: 100

Course Objectives

The aim of this course is to engage students with historical contexts and debates within which the social sciences emerged under the shadow of ‘methods of science’; how this shaped the nature of early social science; evolving perspectives and contemporary debates. It would also engage students with the epistemological basis of the disciplines of social science and how these were constructed as school subjects. Students will explore questions related to social science knowledge in diverse socio-political and economic contexts; methods of social science enquiry and inter-disciplinary perspectives. At the end of the course, students should be able to:

- Develop a perspective on the nature of social science and methods of enquiry
- Develop a rational understanding of the epistemological basis of social sciences and distinguish it from the natural sciences
- Analyse the changing trajectories of social science knowledge through the lens of subaltern and feminist studies
- Understand the evolution of social science knowledge as school subjects and their relevance in the contemporary context of a globalised world
- Identify key social sciences researches that can form an interdisciplinary frame to develop an approach to the teaching of social science in schools

Units of Study

Unit 1: Emergence of modern science and its influence on the development of social science knowledge, disciplines and method of enquiry; nature of social science and scientific inquiry in social sciences; social science as a body of knowledge and method of generating knowledge; distinction and dichotomies between natural sciences and social sciences.

Unit 2: Epistemological bases of social science: intuition, reason, observation and interpretation; debates on: subjectivity and objectivity - empiricism, rationality, individual opinion and social facts; influence and role of context; theory building in social science.

Unit 3: Emergence of social sciences and the history of social science education in schools: the need to study societies; individual-social interface; social science education in the context of developing nation-states, differing political and economic systems, and the historical and contemporary context of a globalised world; historical development of the various disciplines of school social science; linkage of history and civics to the development of the nation-state; geography in relation to exploration-discovery, colonialism and imperialism; social science and citizenship.
Unit 4: Diverse societies and the changing trajectories of social science: Eurocentric, orientalists, subaltern and gender perspectives and constructs; role of social sciences towards understanding and engaging with plural societies and social institutions.

Unit 5: Research in social science education: study of key researches undertaken in India and other countries; possible areas of research in social science education; inter-disciplinary nature of social science research.
M Ed Two Year Programme

S.Ss. 2 (c) : Social Science Learning in Elementary School

Maximum Marks: 100

Course Objectives

The overall objective of this course is to enable students to understand the contents of social science as school subjects in terms of their nature and purposes. It aims to examine the different visions and understanding of school subjects as reflected in school curriculum, syllabi and textbooks; how social sciences can provide a critical perspective of society and social reality with reference to the past, space and power structures and institutions, and processes of social relationships. At the end of the course students should be able to:

- Develop knowledge and the capacity to critically analyse the society we live in and the individual-society interface by drawing upon the disciplines of sociology, history, geography, political science and economics
- Build skills and capacities to gather, analyse and interpret data
- Critically analyse school social science curriculum, syllabus and textbooks
- Draw upon and evolve appropriate pedagogies to transact the curriculum in a manner that enhances curiosity of students to enquire about social phenomenon; develop their capacities to critically reflect on social realities, its institutions and practices
- Develop capacities to uphold human and constitutional values of freedom, equality, justice and respect for difference and diversity and challenge the social forces that threaten these values

Units of Study

Unit 1: Aims of teaching social science at different levels of school education: Positioning the role of social science education in the larger context of the Indian nation and Indian society - Constitutional values and commitment to equality, social justice, common good, plurality, liberty, fraternity and citizenship; the role of social science in enhancing children’s understanding of their immediate social context and larger social realities, in building an analytical perspective of society, appreciation and expression of social change and social justice.

Unit 2: Children’s understanding of social reality: concept formation in relation to age, socio-cultural-political-economic settings; empirical studies of children’s understanding of social phenomena and concepts; relationship of everyday concepts with abstractions characteristic of social sciences; importance of understanding children’s conceptualisation and cognitive processes for social science pedagogy and curriculum.

Unit 3: Social science curriculum at the elementary level: issues of curriculum selection and design; examining the relationship between knowledge, ideology, state power, politics of knowledge production, patriarchy, diversity and curriculum; critical review of the curriculum of social sciences in schools - curriculum frameworks of 1975, 1988, 2000 and 2005, including appropriate position papers; critical review of national policy and commission documents with regard to social science curriculum and educational practice; a detailed historical and contemporary study of EVS as a primary school social science; and any one
domain knowledge within middle school social science – history, political science (social and political life), geography.

Unit 4: Pedagogical concerns and contexts for the teaching of social science at the elementary level: classroom processes and teaching-learning resources; comparative study of different approaches to social science curriculum for different age groups of children; analysis of social science textbooks used in different schools, taking samples from across the world – for example examining the rationale for presenting differing perspectives of a common past: comparing school histories of India, Pakistan (post-1947), Bangladesh (post-1971); understanding how texts are transacted in the classroom.

Unit 5: National and international discourse on school social science: curricular innovations in social science education; critical review of national policy and commission documents: Mudaliar Commission, Kothari Commission, 1968, 1986 policy, with regard to social science curriculum and educational practice; a detailed study of any one social science curriculum across the world.
Course Objectives

This course focuses on the aims of teaching social sciences in secondary and senior secondary schools by engaging students with Constitutional provisions and values and its interface with the realities of Indian society. It would assist students in understanding how young people evolve their understanding of society from their immediate to the national context. It would provide them hands-on engagement with school curriculum and pedagogic approaches. It would enable a deep engagement with knowledge of different disciplinary domains with a view to derive pedagogical principles of teaching social sciences in secondary and senior secondary school. At the end of the course students should be able to:

- Develop capacities to draw upon social science knowledge to help school students develop an analytic perspective of society and the disposition towards social justice.
- Develop a critical understanding of school social science curriculum and pedagogy and the debates around it.
- Develop an in-depth analytical understanding of specific social science disciplinary knowledge and the need for developing an interdisciplinary lens to examine social realities.
- Engage in the design of curriculum and text materials for teaching specific social science concepts – disciplinary as well as interdisciplinary.
- Develop capacity to identify critical questions for enquiry in school social science.

Unit 1: A. Nature of Social Sciences:
   a) Dimensions of Spatial, Temporal and Political Economy
   b) Recent Debates in Social Sciences

B. Aims of Teaching Social Science at Different Levels of School Education: Positioning the role of social science education in the larger context of the Indian nation and Indian society - Constitutional values and commitment to equality, social justice, common good, plurality, liberty, fraternity and citizenship; the role of social science in enhancing student’s understanding of their immediate social context and larger social realities, in building an analytical perspective of society, appreciation and expression of social change and social justice.

Unit 2: Young People’s Understanding of Social Reality: concept formation in relation to age, socio-cultural-political-economic settings; empirical studies of how young people understand social phenomena and concepts; relationship of everyday concepts with abstractions characteristic of social sciences; importance of understanding learners’ conceptualisation and cognitive processes for social science pedagogy and curriculum.
**Unit 3: Social Science Curriculum at the Secondary and Senior Secondary Level:** issues of curriculum selection and design; examining the relationship between knowledge, ideology, state power, politics of knowledge production, patriarchy, diversity and curriculum; critical review of the curriculum of social sciences in schools - curriculum frameworks of 1975, 1988, 2000 and 2005, including appropriate position papers; critical review of national policy and commission documents with regard to social science curriculum and educational practice; a detailed historical and contemporary study of any one domain knowledge within secondary and senior secondary school social science – history, political science, geography, economics, sociology.

**Unit 4: Pedagogical Concerns and Contexts for the Teaching of Social Science at the Secondary and Senior Secondary level:** comparative study of different approaches to social science curriculum for different age groups; analysis of social science textbooks used in different schools, taking samples from across the world – for example examining the rationale for presenting different perspectives of a common past: comparing school histories of India, Pakistan (post-1947), Bangladesh (post-1971); Germany and Poland (Period of Nazi Germany); understanding how texts are transacted in the classroom.

**Unit 5: The Role of Various Social Science Disciplines in Constructing Secondary and Senior Secondary School Curricula:** the notion of citizenship and the needs of nation-states that defined the scope of civics in the 19th and 20th centuries, the evolution in the citizen-state dynamics in contemporary times, the interface of civics with other disciplines in social science; broadening of the scope of civics to include sociological, political and economic perspectives and constructs; interface between civic life, state institutions and institutions outside the state such as in the sphere of economic production, circulation and exchange as well as interdependence of people in various processes and social relationships.

**Unit 6: Survey of recent Researches and Investigating Practices in Social Sciences** at Secondary and Senior Secondary Level, detailed study of any one domain knowledge within the Social Sciences: History, Political Science, Sociology, Geography, Economics with specific reference to national and international discourse and curricular innovations in social science education across the world.

M Ed Two Year Programme

R.2.1: Quantitative Methods in Educational Research

Maximum Marks: 100

This course is the second in a series of two compulsory courses in research approaches and methods.

Course Objectives

The aim of this course is to focus on the foundations of positivist research approach and method in the light of the paradigms and processes of educational research engaged with in the first course on ‘Approaches to Research in Education’. At the end of the course, students will be able to:

- Develop an understanding of the philosophical and epistemological basis of educational research as derived from positivist traditions.
- Identify the several components of research approaches that characterise quantitative research methods and the basis of choosing this form of research.
- Identify areas of enquiry and derive relevant questions for undertaking quantitative educational research.
- Identify and select appropriate theoretical and conceptual basis for undertaking a research problem.
- Design a study to address a research problem, including methods of data collection and analysis.
- Identify and analyse ethical issues present in a quantitative research study.
- Develop tools for critiquing components of a research study: the purpose, the problem, research questions or hypotheses, methods of conducting research and analysis.
- Engage with basic concepts necessary for understanding descriptive and inferential (parametric) statistics, including the assumptions behind parametric and non-parametric statistics
- Develop an understanding of techniques of data analysis in order to derive meaning from quantitative research studies and for conducting quantitative research
- Learn to apply statistical techniques to a body of data in an appropriate manner and interpret quantitative data subject to statistical analysis
- Review the statistical techniques used to analyse data in published researches

Units of Study
Unit 1: Quantitative Research: The foundations of quantitative research in education; Positivistic and post positivistic paradigms; the research problem, the research question, theoretical frames and basis and review of empirical studies.

Unit 2: Experimental Research Design: hypothesis, variables that influence research and that are the object of study; sampling; measurement, testing, and observation; causation, validity, and experimentation; types of experimental approaches – inductive and deductive approaches, true experiment and quasi-experimental designs and their appropriateness for research problems in education; ex-post-facto research, co-relational studies, evaluation and impact studies.

Unit 3: Data Sources and Tools of Data Collection: sources of large sets of data, such as census data, school-based data (eg. DISE) and survey data; critical understanding of tools for collecting quantitative data: questionnaires, structured interview and observation schedules, Test instruments; examining the appropriateness of tool/(s) for the research purpose; concerns in data collection, analysis and interpretation; ethics in educational research.

Unit 4: Inferential and Descriptive Statistics: Hypothesis testing and sampling distributions; assumptions behind the model of descriptive and inferential statistics and their application in educational research; frequency distribution tables and graphs, measures of central tendency: mean, median, and mode, measures of variability: range, variance, and standard deviation, z-scores and the normal curve.

Unit 5: Measures of Inferential Statistics: Correlation and other measures of association; Regression analysis; Standard errors of measurement - Type I and II errors; t tests and the critical ratio; One-way Analysis of Variance (ANOVA) and Analysis of Co-variance (ANCOVA) and their applications.

Unit 6: Nonparametric Statistics: Assumptions behind models of non-parametric measures; appropriateness in terms of data types such as ratings, rankings and scores based on categorised data; Mann-Whitney and Chi-square tests and their applications; visual representation of continuous and discontinuous data: histograms, bar diagrams, pie-charts, line graphs.
M Ed Two Year Programme

S.I.I. 1 (d) : Language Education

Maximum Marks: 100

Unit I - Language and Linguistics
- Nature and functions
- Applied linguistics, psycholinguistics, sociolinguistics and their relevance in and contribution to Language teaching and learning
- Principles of Language and Language Learning
  The Indian tradition: Yask, Panini, Patanjali, Bhartrihari
  The western tradition: the behavioristic and the cognitivist

Unit II : Language Learning and Language Acquisition
- The first language, the second language and the other languages acquisition. Factors effecting teaching and learning of languages
- Pedagogy of Language Teaching- Learning: Grammar translation, structural, various audio-lingual, communicative innovative techniques
- Evaluation of language learning : discrete vs holistic approach, innovative techniques
- Language and Literature, nature, interrelationship, differences, techniques, evaluation, creativity

Unit III : Language Learning: Multilingual Context
- Understanding language diversity : issues, problems and challenges related to dialects, standard language, regional languages
- Developing sensitivity to language diversity
- Provisions in the Indian Constitution
- Policy formulation and Language Education: National level, status and need survey, trend analysis, three language formula lessons from other multilingual countries viz. Switzerland, Israel, Canada etc.

Unit IV: Language Education Programmes, Curriculum Development and Research
- Preparation of language teachers-Pre-service, In service programmes, Distance education programmes – Rationale, Pedagogical content, instructional materials, Problems and alternative course designs
- Curriculum development: factors that influence the curriculum, dimensions, objectives, selection of content, transaction and evaluation, development of instructional material and evaluation
- Research in language education: trends, gaps, priorities

M Ed Two Year Programme

S.Ll. 2 (d) : Foundations of Reading and Writing

Maximum Marks: 100

Rationale
Even though the census figures show a steady rise in literacy rates the actual situation of literacy is very dismal in India. Many people who qualify as literate cannot read and write with fluency, understand what they read, and use literacy in their daily lives. Literacy is a critical factor to survive in the schools and poor literacy contributes to poor performance in schools and contributes to dropout. Given its importance, it is necessary to understand the nature of literacy. In this course we will look at the nature of reading and writing from multiple perspectives. We will try to understand how we engage with literacy ourselves, for example, how do we understand an informational text, how do we emotionally engage with a story, or how do we engage in decision making and problem solving as a writer. We will also understand the socio-cultural aspects of literacy and the Indian context. Reading in a second language is also featured.

Unit I : Reading: Processes and Purposes
Changing definitions of reading
Purposes and processes of reading (examining reading process with the help of miscue analysis)
New Literacy

Unit II : Engaging with Reading: Reading Comprehension
Definition of reading comprehension
Examining the complex and dynamic processes of reading comprehension: Cognitive theories about how readers construct meaning; strategic reading.
Socio-cultural influences on reading comprehension
Debates related to comprehension instruction
Reading in the content area: text structure and reading strategies
Vocabulary
Reading comprehension in India

Unit III : Engaging with Reading: Response to Literature
Transactional theory of reading
Reading for different purposes: Efferent and aesthetic reading
Socio-cultural aspects of response to literature
Children’s response to literature
Response-based curriculum
Literature instruction in Indian schools

Unit IV : Engaging with Writing
Cognitive process of writing: The view of writing as a problem solving and decision making process.
Planning, transcribing/drafting, and , reviewing/revising; recursive nature of writing
Social aspect of writing: Role of context in writing; purpose, audience, and instructional influence; role and responsibilities of the writing teacher.
Reading writing connections: Similarities between them (composing processes); interactive processes; literature as a source for integrating reading and writing; reading like a writer and writing like a reader
Review of writing instruction in India
Unit V: Reading in the Second Language
Comparing first and second language reading
Biliteracy
Examining second language reading in India

Unit VI: Literacy Assessment
Purposes and processes of literacy assessment
Alternative assessment
Review of current literacy assessment practices in India

M Ed Two Year Programme

S.Sc. 1 (e) : Introduction to Science Studies

Maximum Marks: 100

This course aims to develop an understanding of the processes of science and technology and their relationship with society and the environment. It exposes students to a selection of writings (and films/videos) by historians, sociologists and scientists, to see how ideas have developed, through contestations or collaborations, shaped by social, historical, political and cultural influences. It also looks at the emergence of modern science in India, influenced by colonialism and the national struggle for independence; the role of citizen science and people’s science movements for social transformation. The course addresses issues of equity and diversity, through feminist and multicultural perspectives that allow a relook at the discipline as well as its reflection in the school curriculum.

This course can be of interest to any M.Ed. I year student (having a basic background in school science) wishing to understand the field from a historical, sociological, cross-cultural, and inter-disciplinary perspective; it will, however, be essential for all those who wish to specialise in Science Education in the second year.

Unit 1 The Process of Science

- What is the process of science? Is there a ‘scientific method’? Reflecting on one’s own initiation into science; auto/biographical writings of scientists doing science;
- Some histories of science that shaped ideas about humans – the mesmerizing journey of the ‘unconscious’ (Miller); the ‘mismeasure’ of intelligence, and ‘imageries of evolution’(Gould); neurons and empathy, and the riddle of autism (Ramachandran);
- How have social, historical, political and cultural influences shaped scientists’ work? What is technology? How did technicians and crafts persons shape modern science?
- Major debates and paradigm shifts in science – Galileo and heliocentric theory; Darwin and evolution; Wegener and continental drift; the nature of science and ‘scientific revolutions’;

Readings and Resources

  Chapters VI, VII, VIII, X, XII and the film series on DVD

  Part VI & VII [https://www.youtube.com/watch?v=zXY-EWZU5qo](https://www.youtube.com/watch?v=zXY-EWZU5qo)

**Unit 2 Development of Modern Science**

- The institutionalisation of natural philosophy; the professionalisation of science after
  the industrial revolution, distancing ‘pure, academic science’ from technology; science
  and warfare; concerns about social responsibility; dealing with socio-scientific issues
- The emergence of modern science in India; colonialism and nationalist science; review
  of the Green Revolution; everyday technology in the making of modern India;
- the role of ‘scientific temper’ and citizen science; people’s science movements in India
- academic science and ‘post-academic science’- new modes of knowledge production;
  organization and collectivization; funding; intellectual property vs knowledge commons;
Readings and Resources

Unit 3 Democratising Science and its Education

- Multicultural science as socially and culturally constructed;
- Feminist perspectives on democratising science; humanist science; respect and responsibility, role of traditional ecological knowledge (TEK) about relationships between living beings and the environment;
- Critical review of educational dichotomies and hierarchies – knowledge and skill, academic and vocational, ‘pure’ and applied; historical dominance of the ‘academic’ school curriculum over ‘science of the common things’;
- What science for all? Critical reading of international debates on the aims of school science; place-based science education, implications for equity and justice;

Readings and Resources

M Ed Two Year Programme

S.Sc. 2 (e) : Environmental Education and Biology

Maximum Marks: 100

Rationale

Environmental Education has a long history of an eternal debate on its place in education as well as a component of school curriculum. Environmental Education has been determined by various ideologies resulting from the orientations of different environmentalisms that further influence the curricular approaches within. Therefore, a critical examination of various ideologies and their implications for the field of education would contribute in comprehending the issues related to implementation of environmental education at various levels of education, including the school curriculum. The understanding of interdisciplinary and trans disciplinary nature of environmental education that offers several interlinkages to curricular frameworks of different subject areas vis-à-vis its implications would help in envisioning various potential spaces for environmental education in school curriculum. Biology has an intricate relationship with environmental education in terms of contributing to the conceptual understanding of various environmental issues, response of biology education to environmental issues and the influence of paradigm shifts in biology on environmental education. The course thus also provides a focused exploration of the possibilities of this interrelationship and the challenges within, specifically for candidates interested in biology education too.

Objectives of the Course:

1) To acquire a theoretical understanding of the concept of Environmental Education.
2) To develop abilities to establish relevant curricular links to Environmental Education.
3) To develop abilities to examine the intrinsic relationship between biological sciences and Environmental Education vis-à-vis the possibilities and challenges within.
4) To facilitate an in-depth understanding of various issues related to implementation of Environmental Education in schools.
5) To help them acquire a critical understanding of effective teacher education program w.r.t. Environmental Education.
6) To provide them an overview of National and Global trends with regard to various researches and initiatives taken in Environmental Education.

Unit 1: Understanding Environmental Education: Review and Prospects

1. History and Development of the concept
2. Paradigms, Philosophies, and Ideologies linked to Environmental Education
3. Education for Sustainable Development
4. Environmental Education Principles, aims and Objectives
Unit 2: Converging Environmental Education with Biology Education: Possibilities & Challenges

1. Frameworks for knowledge building in biology for sustainable development
2. Approaches/ strategies in Biology Education contributing to Environmental Education
3. The Gaia’s Hypothesis: Debates and Implications

Unit 3: Environmental Education in Schools: Theory to Practice

1. Approaches in Environmental Education: Interdisciplinary or Multidisciplinary
2. Development of Environmental Education Curriculum for various levels of School Education
3. Analysis of Existing Environmental Education Curriculum & Curricular Materials
4. Pedagogical Approaches/ Strategies in Environmental Education
5. Community Resources: Beyond Classrooms
6. Assessment Concerns in Environmental Education

Unit 4: Teacher Preparation: Trends & Issues

1. Pre-service Teacher Preparation in Environmental Education
2. Status of Teacher Preparation in Environmental Education in India
3. Review of International Teacher Preparation Programmes in Environmental Education
4. Possibilities of Professional Development of in-service teachers in Environmental Education

Unit 5: Perspectives and Research in Environmental Education: National & Global Scenario

1. Policy Perspective in Environmental Education
2. Place in various Education Commissions
3. Initiatives at National & International Environmental Education Programmes
4. Trends in Environmental Education Research

References

M Ed Two Year Programme

S.Inc. 1 (f) : Inclusion, School, and Pedagogy

Maximum Marks: 100

Concept Note

The education system in our country is now focusing upon developing inclusive set-up across all levels of education in general and more specifically at school level. In specific context of school this means acknowledging that the students have wide range of individual learning needs and are members of diverse communities. Consequently, the pedagogical designs and planning require due focus on addressing diversity arising from ability, family background, social class, gender, language, class, cultural origin and similar others.

Objective:
The primary objective of this course is to facilitate the course candidates develop a pedagogical thought built upon acknowledging, accepting and valuing diversity, for facilitating inclusion with its true spirit of enabling each child optimize her/his potential despite variations among them and through a common curriculum.

Unit I : Inclusion: Homogeneity or Diversity
- A brief history of Discrimination and Exclusion
- The Philosophical, Sociological Historical and Political foundations of Inclusion
- Conceptualizing Curriculum: Role of national curriculum framework
- Significance of creating Inclusiveness in school: locating and responding to concerns and dilemmas

Unit II: School: Changing Perspectives
- Inclusion or Invasion: Negotiating Attitudes, Dispelling biases, Challenging Stereotypes
- Intersecting Inequalities: Developing a context for collective action and individual mobility
- Challenges of intergroup contact in school

Unit III : Pedagogy: Implicit and Dynamic Processes
- Ability/inability Paradox: Repositioning the Question of Competence
- Emerging schemas for addressing diversity in inclusive schools like Diversity Pedagogy Theory, Evidence-Based Practices in Education and Universal Design for Learning
- Collaborations as a key feature of inclusive set-ups, Building partnerships

Unit IV: Teacher: The Pivotal Focus
- Responses to Diversity in School: Teacher’s beliefs about educationally significant differences
- Nature and Source of Pedagogical Content Knowledge
- Curricular Adaptations, Differential planning, Multiple representations (reference teaching-learning resources) , Modified learning task, assessment procedures & materials
Continuous professional development of teachers for successful implementation and continuation of inclusive practices in schools

Unit V : Research Perspectives

- Paradigms that Shape research in Inclusion
- Methodological debates and Challenges

M Ed Two Year Programme

S.Inc. 2 (f) : Diverse Abilities: Issues and Perspectives

Maximum Marks: 100

Rationale
Inclusion requires acknowledging and theoretically understanding the diversity amongst learners and their needs. This entails a critical analysis of various discourses with respect to children with diverse abilities from a socio-cultural perspective and accordingly creating spaces for them in educational institutions specifically in a school set up. As a result, this would require developing pedagogical insights, specific interventions and other educational provisions for addressing the diverse yet unique individual needs of learners in inclusive settings.

Objectives of the Course:
1. To develop theoretical understanding related to diversity amongst learners and their needs.
2. To develop abilities to critically examine various discourses on ‘disability’.
3. To facilitate them to acquire a comprehensive understanding of children and their diverse needs through various discourses.
4. To help them acquire an understanding of the educational provisions for children with diverse needs in an inclusive set up.
5. To help them acquire a critical understanding of an effective teacher preparation programme.

Unit 1: Theoretical Underpinnings
   a. Historical Perspective
   b. The Politics of Special Educational Needs and Disability
   c. Contemporary Trends

Unit 2: Discourses on ‘Disability’- A Critical Overview
   a. Evolving Concepts of Disability
   b. Socio-cultural Perspectives of Disability
   c. Deconstructing Disability

Unit 3: Understanding Children with Diverse Needs- Multiple Discourses
   a. Educational Needs: Special or Diverse
   b. Children with Specific learning Disabilities
   c. Children with Low Incidence Disabilities
   d. Children with Sensory Impairments
   e. High ability learners and Creative learners

Unit 4: Educational Provisions- In an Inclusive set up
   a. Teaching children with Diverse needs in an Elementary School
   b. Teaching children with Diverse needs in a Secondary School
   c. Role of Community Involvement and parental participation
Unit 5: Teacher Preparation, Policy Perspective and Research trends
   a. Teacher Preparation: Critical Discourses on teacher education programmes
   b. Policy perspective: Role of various governmental and non governmental organizations
   c. Research trends in this area

S.St. 1 (g) : Social Theory of Education: Conceptual Issues And Debates

Maximum Marks: 100

The course will provide opportunities to:

Explore and develop a comprehensive and critical understanding about the relationship among individual, school, society and state.

Elaborate and conceptualize the process of knowledge construction with reference to emerging trends is social theory

Understand and evaluate the role of culture, ethos and education in re-contextualizing the prevailed perspectives, knowledge and practices

Engage with the concept and process of educational opportunities with reference to Individual, liberty and equality

Explore and understand the emerging issues and concerns in industrial world with reference to education, development and Social movement.

Unit---I

Understanding and Conceptualizing Social Theory with Reference to School, State, Society and Individual:

Unit –II

Construction and Development of Knowledge and Social Reality:

Sociology of Knowledge, The role of Ideology and Media in knowledge construction, Indigenous system of knowledge, Liberalization and globalization, National system of education, Cultural Relativism
Unit –III

_Culture, Ethos and Education:_

Modernity and postmodernity, Re-contextualization of knowledge and pedagogy, Social anthropology, Cultural capital and pedagogy, Identity development and culture

Unit – IV

_Individual, Liberty and Equality:_

Concept and Processes of educational opportunities, Exploration of Hierarchy, status and power system with reference to caste system, Education and women struggle for equality, Critical reviewing School curriculum and necessary knowledge, Inclusion and exclusion in term of availability, accessibility and approachability of education for children, Individual and experience

Unit—V

_Education, Development and Social Movement:_

Understanding the impasse and third world industrialization, the role of state in the context of Welfare social change, Understanding social movements with reference human rights perspective: caste, women and child rights, Teacher and student union and organizations

S.St. 2 (g) : Social Theory of Education: Emerging Issues and Trends

Maximum Marks: 100

The course will provide opportunities to:

Develop theoretical understanding about the social theory of education systems with reference to critical reviewing of various approaches.

Explore the social solidarity and social practices with reference to diverse socio-culture context and its relation with education.

Engage critically with the discourse of right based approach with reference to feminism, gender, education and human rights.

Understand the changing forms of Democracy, Modernity, Postmodernity and Education and their interrelatedness with reference to national and internal level.

Unit1- Education and Relevant Schools of Social Theory:

Critical review of capitalism and socialism with reference to the dialogue of Weber and Marx, social and political thought and role education, problems of determination with reference to Althusser, Hermeneutics and research in social theory of education.

Unit2- Instruction, Solidarity, Social Practice and Education

Understanding ethnomethodology, rituals and solidarity in social life. institutional reflexivity and modernity, social space and symbolic power, rational choice perspective or theory.

Unit3- Critical Theory of Modernity and Education

Understanding ideology with reference to modern culture, institutions and power structure. Normative content of modernity, the role of critical theory in social life and education, critical revisiting Habermas and Lyotard with reference to knowledge and human interest.

Unit4- Education, Gender, Feminism and Subjectivity

Exploration of the feminism and the body with reference to Foucault. Habermas perspective and gender, critical revisiting feminism and modernism along with postmodernism for theorizing gender, feminism as psycho analytical theory.
Unit5- Rights Perspective, Education and Contemporary Debates

Understanding intellectual property, human rights and globalization with reference to representation of cultural variation, reviewing the consequences of a constructed universal: democracy and civil rights in modern state and its influence on education, the politics of culture and human rights, localizing human rights in Era of globalization, rethinking on the obstacles on the road to an overlapping consensus on human rights and education.

Unit6- Democracy, Postmodernity and Education

Future of democracy and how do we understand it today with reference to from city state to a cosmopolitan order, understanding modernity and ambivalence in a consumer society with reference to education, critical review of postmodern as a transparent society, modernity and the holocaust.

M Ed Two Year Programme

S.Curr. 1 (h) : Knowledge, Curriculum and Pedagogy

Maximum Marks: 100

Course Objectives

The overall aim of this course is to investigate constructs of knowledge and curriculum, using critical interdisciplinary perspectives. It also aims to examine the historical, philosophical and sociological foundations of school curriculum; undertake an in-depth analysis of conceptions of learning rooted in conventional school practices and folk pedagogy; and explore students’ understanding of natural and social phenomena. The objective is also to evolve conceptions of pedagogical knowledge as an integration of knowledge about the learner, disciplinary knowledge, knowledge of curriculum and the educational contexts and aims.

Units of Study

Unit 1: Understanding and conceptualising knowledge: Distinguishing between knowledge and information, knowledge as construction of meaning and critical thinking (drawing upon critical interdisciplinary theory). Exploring the nature of different kinds of knowledge: disciplinary and pedagogical, knowledge of educational contexts, goals and aims within historical and contemporary contexts, knowledge of learners; selection of knowledge in designing curricula – role of ideology and power; implications of different kinds of knowledge for teaching and for ways of helping all students learn.

Unit 2: Foundations of curriculum and curricula enquiry: Understanding the historical, philosophical and sociological foundations of curriculum, critically examining frameworks of school curriculum within current debates an political/cultural conflicts and the issue of curriculum change. Developing perspectives and frameworks of analysis of curriculum aims and context. Distinguishing between curriculum, syllabus and the textbook, exploring the relationship between curriculum and policy and curriculum and learning.

Unit 3: Students are expected to present a focussed project, capturing episodes(s)/unit(s) of teaching and learning; relate their project findings to one or more of the theoretical themes such as nature of knowledge and inquiry; philosophical and sociological frames of knowledge, curriculum and pedagogy.

Unit 4: Perspectives and Paradigm shifts in the conceptions of learning: Critically examining different views of the nature of learning, (drawing upon theoretical frameworks of constructivism, socio-constructivism and cross-cultural psychology). Developing an understanding of learning within the social context; an in-depth analysis of conceptions of learning rooted in conventional school practices and folk pedagogy. Evolving conceptions of pedagogical knowledge as an integration of knowledge about the learner, disciplinary
knowledge, knowledge of curriculum and the educational contexts and aims; nurturing inquiry and supporting children’s learning.

Unit 5: Pedagogy and the curriculum: Issues of teaching and learning such as medium of instruction, personalising knowledge, the process of transforming subject-matter knowledge into teaching materials and pedagogic strategies for developmentally appropriate classrooms. Exploring children's early conceptions of science and mathematics, cross curricula learning, developing understanding of alternative frameworks within which children interpret their experiences and evolving frameworks for redesigning curriculum in specific domains. Evolving relationships between teaching, learning and understanding, understanding the nature of teachers' professional knowledge and developing the practice of critical reflection.

Unit 6: Students are expected to undertake analysis of text-material and syllabi and/or case studies of children’s understanding of scientific, mathematical and social concepts and reasoning, pedagogies outside the formal system; relate their observations to theoretical frameworks and themes, such as the constructivist/alternative frameworks and the concept of critical reflective practice.
M Ed Two Year Programme

S.Art. 1 (i) : Art Education : Theoretical Construct

Maximum Marks: 100

Concept Note
It is of critical significance that those in education develop an understanding about the importance of art appreciation and get sensitized to the role Art plays in life and Education. This course is intended to develop the conceptual understanding of Art and its interface with society. It provides the space to engage in examining the interrelatedness of Art and Education. It attempts to give a comprehensive understanding of value development through Art Education. The significance of self identification through the process of art activities is also aimed in this course.

Objectives
- Acquire a conceptual understanding of Art and its role in contemporary society, Education and Art Education and their interrelatedness.
- Sensitize/appreciate the relevance of Art in human life.
- Develop an understanding of implications of Visual Arts in Education.
- Develop an understanding/analyze the relationship among different arts.
- Develop an understanding towards the significance of self identification through Arts and about the meaning of integration in Art Education.

Course -

UNIT I – Art :
Meaning, and manifold aspects of art, Understanding the creative process, Role of art in contemporary society :Social expression through art.

UNIT II - Art, Education and Art-Education :
An exploration of their through readings, writings and studio experiences of philosophers, educationists and artists; Purpose and Interrelatedness of Art and Education; Visual Arts and their implication for education and life.

UNIT III – Art Appreciation :
Significance of art appreciation and understanding the constituents and elements of pictorial art.

UNIT IV – Interrelatedness Among the Arts :
The relationship among the different arts – dance, drama, music, literature and visual arts.

UNIT V – The meaning of Integration in Art Education :
The integrated Experience, Integration of art and society, Integration and learning.

UNIT VI – Self Identification Through Arts :
Significance of self identification through Arts — self identification of the child with his art experience and with the medium; for appreciation of the subject matter and the means of expression and for self adjustment. Must a teacher produce creatively – Psychological insight in Art Instruction, Identification of teacher with child through his work, The flexibility of the teacher.

Reading List:
- Read, Herbert: *Education Through Art*. Faber and Faber, London. 1967
- Ray, Nihar: *An Approach to Indian Art*. Publication Bureau, Punjab University, Chandigarh. 1984
- Shukla, Ram Prasad: *Navin Bhartiya Chitrakala*, Kitab Mahal, Allahabad.
- Peter Abbs “Teaching Arts a Joyous Experience : Arts in Child Education.” Published in School : Journal of Education, July 1993
- Sibia, Anjum; “Aesthetics in Education : A Psychological Perspective”. Included in the Journal of Indian Education. Vol. XXV, NO.3, Nov. 1999, NCERT.
This course is intended to provide a space to engage with education through the lens of philosophy. It takes a look at the development of the concept of education and of the varied concerns of the philosopher in the discourse of Philosophy of Education. It attempts to give a comprehensive understanding of the philosophical concepts of Man, knowledge, and method of knowing, all of which are the foundations on which pedagogies are construed. Reading of classical and contemporary texts, logical and ethical analyses, and historical contextualization of ideas form the basis for teaching of this course.

I Understanding Philosophy of Education

Philosophy of Education as a discipline. Status and cultures of the prevalent discourse. Understanding theory of education, Interfaces between philosophy and theory; philosophy and practice. The idea of praxis. The Schools of thought approach & its critique.

II Understanding Man

The importance of the metaphysical in understanding education and the educand. The ethics of the common good: Authority; Autonomy; Responsibility; Authenticity; Equality & Justice; Morals, values and justification. Art as Education; creativity and imagination.

III Understanding Knowledge

Knowledge as justified true belief; Knowledge as pure reason; Knowledge as experience; Knowledge as Meaning Making; and Feminist perspective of knowledge.

IV Understanding Pedagogy: The European Enlightenment and the Formulations of Pedagogy

V Understanding Method

The Analytical Method; The Objective and the Subjective in Positivism and Phenomenology; and The Existential Critique of Method.
Readings.

Unit I

Unit II

Is Metaphysics Needed?

Unit III

Unit IV

Unit V

Readings from J.L. Austin & Nel Noddings
M Ed Two Year Programme

S.Art. 2 (i) : Art Education : Child, School and Pedagogy

Maximum Marks: 100

**Concept Note**

This course intends to develop an understanding of the contribution of Art Education in child’s growth and development and other functions in Education. It is imperative to acquire a conceptual understanding of the key ideas in Art Education. This includes developing insight to appreciate the relevance of art from the childhood to the entire life. The primary concern is to develop the understanding of the different stages of children art expression and pertinent pedagogic concerns. It also focuses on the policy perspective and the research trend in this area.

**Objectives:**

- Acquire a conceptual understanding of the key ideas in Art Education.
- Develop an understanding of the contribution of Art Education in child’s growth and development and other functions in Education.
- Get sensitized/appreciate the relevance of Art from the childhood to the entire life.
- Develop an understanding about Stages of children art expression and Pedagogical concerns.
- Develop the understanding/analyse the problems and issues in Art Education.
- Develop knowledge about the historical development of Art Education and the place of Art Education in school curriculum since independence
- Develop an overview of research trends in Art Education

**UNIT I – A perspective on Art and Art Education**

Meaning of Art, The Need for Art Education and historical concerns in Indian context, role of art activities in child’s growth and development. A rationale for teaching arts. Reading into the writings of pioneers of modern concept of Art Education.

**UNIT II - Place of Art Education**

Across the different level of school- Primary, Upper Primary, Secondary and Senior Secondary; in Higher Education and in teacher Education Programmes.

**UNIT III – Psychogenesis of Child Art**

Stages of children art expression - developmental methods, selection of content, motivation, evaluation at different stages. The teacher’s need for knowing the different stages. Meaning of creative activity in child’s work of art: self expression, self adjustment

**UNIT IV – Evaluation of the Creative Products**

Purpose and processes of Evaluation, Dilemmas in Evaluation of meaningfulness of creative product.
UNIT V- Problems and issues in Art Education
Introduction to current conception of the function of Art Education within the cultural milieu. Contemporary trends in Art Education as related to school curriculum. A critical study of the selection of content, instructional methods and evaluation system in Art in relation to the recent developments in contemporary Arts. Aesthetic basis for teaching of arts in schools.

UNIT VI - Policy Perspective and Research trend in Art Education
Historical development of Art Education and place of Art Education in the Indian school curriculum - Commissions and policies after independence. Research trend in art education

Suggested Practicum:
Case studies of the children’s’ work of art and their understanding of the concept of Art.

Reading List
- Ray, Niharranjan : *An Approach to Indian Art*. Publication Bureau, Punjab University, Chandigarh. 1984
- Read, Herbert : *Education Through Art*. Faber and Faber, London. 1967

M Ed Two Year Programme

S.CInt. 2 (j) : Issues in Comparative and International Education

Maximum Marks: 100

Rationale of Course

The aim of this course is to engage students with the field of Comparative and International Education and develop comparative perspectives on the foreign systems of education as well as on the contemporary issues and public policy around education across political borders. It shall give multi-level exposure to the students through a diversity of voices as possible, from geographic, cultural and ideological standpoints. It shall enable the student to focus upon current issues and controversies in a field that is undergoing changes as profound as the geopolitical and economic forces that are reshaping our worlds. It would provide opportunities to probe into a range of methodologies associated with comparative and international education which would be both exemplified and opened up for debate. It is intended that students specially those from settings and locations not frequently part of the "developed" contexts would be able to meet the following Objectives:

- Understand the processes through which educational changes occur.
- Compare the organisation of education at different levels across the globe and identify similarities and differences to adapt and appropriate changes in one's own educational context.
- Engage and reflect with the tools of comparison for the integration of an individual effectively into a society so that the individual can achieve self-realization, develop national consciousness, promote unity and strive for social, economic, political, scientific cultural and technological progress.
- Foster depth of reflection and equip with the skills of comparative inquiry to enable systematic exploration of key issues affecting educational policies, practices, and reforms at home and abroad.
- Widen one's conceptual lenses to see how seemingly similar issues manifest themselves in diverse settings.
- Improve understanding both of the forces which shape education systems and processes in different settings, and of the impact of education systems and processes on social and other developments.
- Understand the multi-disciplinary and applied strengths of the field; the complexities of this kind of study; the dangers of the misapplication of findings; the importance of theoretical analysis and methodological rigour; and the enduring centrality of the concepts of cultural context and educational transfer for the field as a whole.
- Evolve with a global outlook and cross-cultural sensitivities on educational concerns and nurture capacities to critically reflect on the social realities and in a study of the solutions attempted.
Unit I Globalisation and Mapping the Intellectual Discourse on Comparative Education

- Comparative Education as Foundational in Education
- Mapping the intellectual discourse-Broad Survey
- An issue-oriented Approach to Comparative Education
- Globalisation and the rescaling of Education Politics and Policy
- A survey of recent innovations and changes in education in India and across the Globe.

Unit II Comparative Perspectives on Organisation of Education

- Early Childhood Care and Education in select Indian States
- Primary School Education in India, Russia, UK and USA
- Secondary School Education in India, Russia, UK and USA
- Higher Education in India, Russia, UK and USA.

Unit III Comparing Issues in International Context: Experiences from Asia-Africa-South America

- Purposes of Schooling; Curriculum as a mechanism of social and cultural reproduction
- Inequality in Education; Educational Access and Opportunity
- Education Accountability and Authority
- Demographic Planning
- Adult and Social Education
- Teacher Education in China, India and Japan
- Blending Work with Education-Experiences from China, India and Japan.

Unit IV Comparing Status of Education through Public Reports

- Reports on status of Children and Education-UNESCO, World Bank
- Budget Provisions to Social Sector and Projections in India's Economic Survey
- Schooling in the Government (Public) schools: insights from PROBE and ASER
- Role of NGOs and Private Interventions in Education.
- Funding in Education

Unit V Interpreting Children's Experiences

- Differently abled Children in Schools
- Educating the girl child
- Children’s Attitudes to other Nationalities
- Children’s perception of histories of partition or displacement.

Term Paper and Seminar Presentations

- Comparative study of curriculum policies/documents and curriculum frameworks across Educational Boards
- New trends and issues in the Indian schools in the context of pedagogy and assessment.
- Implementation and impact of public policies-comparative insights
- Mobility, Migration and Minorities in Education
- ICT and Education
- Comparisons and the search for a "modern self"
New thinking in Comparative Education

Suggested Readings:

- Altbatch, P. G. (1998). Comparative Higher Education: Knowledge, the University and Development. Springer; Comparative Education Research Centre, University of Hongkong.
• Larsen, Marianne A. (2010). New thinking in Comparative Education—Honouring Robert Cowen. Rotterdam; Sense Publishers
Course Rationale and Objectives:
This Course aims to build a more nuanced understanding of human mind as inherently social, cognition as a situated cultural practice, learning as a cultural way of meaning-making & knowledge construction, pedagogy as a process of social collaboration in a community of learners, assessment as a dynamic process, and transformative potential of school as a way of articulating voice and raising consciousness by supporting and nurturing all children irrespective of their social origins, economic position or cultural locatedness. It entails examining the bearing of this contextualist view of mind on educational inquiry, research and discourse, specifically the curricular and assessment practices as seen in the context of cultural meanings and experiences that diverse learners bring to the classroom.

Unit I : Cultural Context of Cognition: Perspectives and Paradigm shifts in the conceptions of cognition by drawing upon critical discourse in cultural psychology, anthropology and linguistics; Critique of cognitive universalism and scientism as the 'mainstream' view; Role of culture in psychic diversity; Building a nuanced understanding of the contextualist view of mind with special reference to Vygotsky’s Sociocultural-historical framework of human development; Understanding cognition as a situated practice by drawing upon the seminal works of contemporary cultural theorists like Cole, Lave, Scribner and Rogoff; interface between socio-cultural, socio-lingual and psychological aspects of cognition; cultural-contextual perspective of cognition with particular reference to the multi-cultural and multi-lingual Indian context.

Unit II : Children’s Thinking, Learning and Schooling: Critically examining the debates and dialectics that revolve around the developmental and cultural differences in the way children think and learn; Intuitive thinking and analytical thinking; Examining specific aspects of children's thinking such as development of causality, concepts of time, space, mass and number; reasoning and problem solving; relationship between language and thought, social perception and cognition; developing understanding of alternative frameworks within which children make-sense of their early understanding of scientific and mathematical concepts; children's drawing and play — topics to be discussed with the help of relevant theoretical perspectives.
Unit III: **Critical Literacy and Pedagogy:** Examining cultural politics that undergird traditional notions of writing, reading, language experiences; Understanding critical literacy and orality as it exists in its multiple forms, as linked to the diverse cultural and linguistic identities; Indigenous Knowledge and School knowledge; Folk psychology and folk pedagogy; Visible and invisible pedagogy (deconstructing interplay of pedagogic assumptions, stereotypes and ideologies in a socially & culturally diverse classroom).

Unit IV: **Rethinking Minds, Cultures and Education:** Rethinking education as a libratory and social transformative process that empowers culturally diverse & socially marginalized children to articulate their voice, concerns, and develop critical consciousness. A re-defined view of mind, knowledge, learner and pedagogy will be discussed in the context of case studies that have inspired school practices: Hoshangabad Science Teaching Project (HSTP), the Milwaukee-based Teacher Journal Rethinking Schools; the Culturally Relevant Pedagogy as conceptualized by Lisa Delpit, Gloria Ladson-Billings and others, and the Citizen School Project in Brazil.

Unit V: Students are expected to write two positional papers on the basis of their critical understanding of a select writings of Vygotsky and contemporary cultural theorists; undertake an individually designed project that links their conceptual understanding with school practices as they get enacted and experienced by learners; and some similar applicative assignments as specified in the Course rationale.

**Suggested Basic Readings**

M Ed Two Year Programme

S.Exp.1 (l) : Educational Evaluation and Psychometry

Maximum Marks: 100

Rationale
An expert in the field of education can’t be a real expert without having knowledge of measurement and evaluation. For having an in-depth knowledge and understanding of the field of evaluation, one needs to develop critical understanding of the concept and designs of test items and test along with their applications for various purposes of evaluation. In addition to ensuring good characteristics of test items and test, it is essential to learn about statistical techniques which can take place by using these tests based upon various situations, focusing upon their specific advantages and applications.

Objectives
1. To develop critical understanding about the concept of measurement and evaluation in a broad and contemporary educational framework
2. To analyze and comprehend various types of items and their development with reference to their objective domains and applications
3. To critically look into various characteristics of test items and tests and develop procedural understanding for standardizing a test
4. To develop an in-depth understanding about higher level statistical techniques focusing upon their application in various situations based upon their advantages

Unit 1. (a) Educational Measurement & Evaluation:
Types of Evaluation, Taxonomy of Educational Objectives (with special reference to Bloom’s, NCERT and other contemporary ideas); Scales of Measurement

(b) Types of tests:
Theoretical description of tests in different domains:(i) Psychological tests, (ii) Educational tests (iii) Sociological measurements

Unit 2. Achievement Tests test items & Item Analysis:
Construction of different Objective items, Short Answer and Essay questions, Guidelines and scoring thereof Psychosocial Tests & test items: Construction of Attitude, Aptitude and Personality test items & Item Analysis thereof Other issues in Test construction: Criterion-oriented approach, Homogenous tests, Bi-polar domains of items, and tests for Special Purposes

Unit 3. Reliability & Validity:
Concepts, types and different procedures; Latent Trait Theory, ICC and ROC curves; and current developments in Measurement Norms: Concept, types (age, grade, percentile, sigma scores, T-scores, Sten scores and Stanines) and their preparation
Unit 4. **Standardization of an Achievement Test:** Concept, significance and procedure

Unit 5. **Statistical techniques:**
(a) Correlation: Concept and methods- Bi-serial, Point bi-serial, Tetrachoric, Phi coefficient, Correlation ratio, tau, partial and multiple correlation, Non-parametric Tests of Association
(b) Regression: Concept and methods: least squares, Bi-variate and Multi-variate regression analysis
(c) Factor Analysis, Discriminant Analysis, Path Analysis: Concepts and analysis data using relevant Softwares such as Excel, SPSS, STAT, R, and other available softwares
(d) Structural Equation Modelling: Concept & analysis

**Practical Work:**
1. Developing a test and developing appropriate norms
2. Interpretation of computer output pertaining to Multiple regression, Factor analysis, Discriminant analysis, Path analysis, Structural Equation Modelling

**Suggestive Readings**

Rationale
An expert in the field of education can’t be a real expert without having knowledge of experimental education. For having an in-depth knowledge and understanding of the field of experimental education, one needs to develop critical understanding of the concept and designs of experimental research. Sampling designs along with statistical techniques, parametric as well as non-parametric, are important aspects in this regard which one must learn focusing on their advantages and applications.

Objectives
1. To develop critical understanding about the concept of experimental education in a broad and contemporary framework
2. To analyze and comprehend various experimental designs with reference to their applications
3. To criticize various sampling designs and statistical techniques both parametric and non-parametric techniques in a continuum from traditional to the contemporary ideas on these
4. To develop an in-depth understanding about the needs for different analysis techniques focusing upon continuum of their advantages

Unit 1 Experimental Education:
Concept, significance and scope Experimental Method: Nature, steps in Experimental methods

Unit 2 Experimental Designs:
Pre-experimental, Quasi-experimental, True Experimental, Factorial, Latin Square designs and current developments in Experimental designs
Critique about Experimental Research in Education

Unit 3 Sampling Designs:
Traditional designs and current developments in Sampling
Statistical techniques appropriate to analyze various designs studied in Unit-2

Unit 4 Parametric Statistical techniques:
   a) ANOVA - One-way and two-way with relevant Post-hoc tests
   b) ANCOVA - One-way only and two-way with relevant Post-hoc tests
   c) Factor Analysis, Discriminant Analysis, Path Analysis: Concepts and analysis using relevant softwares such as Excel, SPSS, STAT, R, and other available softwares
Unit 5.  **Non-parametric Statistical techniques:**
Concept, significance and scope
Run test, Kolmogrov-Smirnov tests (One sample & Two samples), Sign test,
Wilcoxon-Signed Ranktest, Median test, Mann-Whitney U-test, Non-parametric
ANOVA (One-way & Two-way)

**Practical Work:**
(1)  *Locating recently published Experimental studies using different higher level designs and critique thereof*
(2)  *Designing and implementing an experimental study using higher level designs and analyzing the collected data*
(3)  *Analyzing data using SPSS/STAT/R on all above statistical methods*

**Suggestive Readings**

M Ed Two Year Programme

S.Ee.1 (n) : Equality and Education – Sociological Perspectives

Maximum Marks: 100

Rationale of Course

The concept of equality in Education is historically well established in our Educational discourse. The focus on this particular constitutional value is being increasingly felt in the contemporary times. Educational policies and reports of committees and commissions have time and again expressed their concerns on promoting equality for any progressive society. In fact, for teacher educators, public intellectuals and policy makers, it has acquired almost one of the most significant and unavoidable educational concern. The students engaging with this course, would get the opportunity and an academic space to comprehend and develop their perspectives around the idea of equality. At the end of engaging with this course, the students would have met the following **Objectives**:

- Engage with critical perspectives on the educational system and patterns in a democratic and secular country with a pluralistic social context and its relevance in the contemporary context of a globalised world.

- Examine how the quest for equality and self identity is a central concern in the processes of education.

- Nurture capacities to critically reflect on the socio-historical realities, cherish the human values of equity and tolerance and challenge the social forces that threaten these constitutional values.

- Promote democratic participation, challenge notions of patriarchy and the sociological discourse of equality in education.

- Investigate the policies of education and its praxis in the context of India and analyse the critics and alternatives generated by the exponents of equality in the Indian Society.

**Unit 1 Introduction: Sociological Perspectives**

Class, Status, Ethnicity, Sex, Caste and Religion as categories of analysis in the Sociology of Education.

**Unit 2 –Relation between Education, Mobility, Educational Opportunity and Social Change**

- "The Equality of Educational Opportunity" Debate in India with special reference to Muslims, Scheduled Castes/Tribes and Women.
- Alternatives in Education
- the De-schooling movement
Unit 3- Critical Perspectives in Education.
The issues of representation in School Education and Higher Education.
- Qualitative and Quantitative representations.
- Religion, Caste and Gender.
- Equality and Inclusive Education.

Unit 4-The New Sociology of Education.

Unit 5- Studying Dalit Literature as protest, liberating memories and assertion for Equality.
Study of Dr. Ambedkar and Phule's writings.
- Assembly Debates
- New challenges

Unit 5- Studying Educational Experiences of Marginalised Groups
- Autobiographies, novels, poetries and other forms of expression
- Documentaries and films

Term Paper and Seminar Presentations
- Critical analysis of Dalit Literature
- Treatment of Deprived classes in Print and Electronic media

Suggested Readings

M Ed Two Year Programme

S.Ee.2 (n): Gender and Education

Maximum Marks: 100

Rationale of Course:
The issues on women and the question of equality is acquiring a central focus in every sphere of life. The National policy of Education (1986), gave a good length of concern to it. In the field of teacher education as well as in other disciplines, Gender issues are increasingly procuring a long due space. India has committed itself at National and International platforms on promoting Gender Equality in the field of Education. Thus, engaging with the issues on gender is of paramount importance in educational proesses.

Course Objectives
This course is intended to engage students with the issue of patriarchy, hierarchy, power, dominance, subjugations and their relation to equality regarding Gender. The objective of this course is to facilitate students to investigate the policies of education and its praxis. It attempts to engage students with a comprehensive understanding of the fundamental criterion through which the status of Gender Equality can be examined. The students engaging with this course, would get the opportunity and an academic space to comprehend and develop their perspectives around the idea of equality of women. The students would be able to examine how the quest for equality and self identity is a central concern in the processes of girl's education. This paper shall promote democratic participation, challenge notions of patriarchy and unfold the sociological discourse of equality in education.

Units of Study

Unit 1 Gender as the Basis of Inequality in Education
Issue of patriarchy, hierarchy, power, dominance, subjugations and their relation to equality regarding Gender.

Unit 2- Identification of Structures of Domination and Control:
- Society, Family and the School in India.
- Issues in school education: Problems of access, retention, stagnation, drop-out and push out.
- Higher Education and Professional Spaces.

Unit 3- Feminist Critique of Knowledge, Method and Alternative Perspectives
Unit 4- Study of Public Policies from the Perspective of Gender  
State initiated policies and programmes in Education from the perspective of Gender Equality

Unit 5- Routes towards Change:  
- Social Movements  
- The role of Women’s Studies in Education.  
- Women’s voices and agency  
- Law and Social Justice

Unit 6- Studying Educational Experiences of Women  
- Autobiographies, novels, poetries and other forms of expression  
- b) Documentaries and films

Term Paper and Seminar Presentations  
- Critical analysis of Literature on Women  
- Treatment of women in Print and Electronic media  
- Laws on Protection of Women  
- Narratives and Personal/Family histories  
- Stereotyping and Deconstruction of myths  
- Women in Religion

Suggested Readings

- Shinde, Tarabai (1881). Stri purush tulna, Samvad
M Ed Two Year Programme

P.2 : Sociology of Education

Maximum Marks: 100

Unit 1: Questions and Tools

What does it mean to look at education from a sociological perspective? Introductory examples for discussion: Why are there different types of schools? Why do so many young people want to compete for civil service? What kinds of information do matrimonial advertisements provide for grooms and brides? (More questions can be added to initiate students into sociological reflection.)

Conceptual tools: Society, Role, Status, Institution, system.

Unit 2: Reading Classics:

Learning to situate a text in it the development of a discipline and in the historical context of its content with the help of three classical texts: ‘Education, Its Nature, and its Role’ by Durkheim; ‘The Historical Character of Educational Aims’ by Mannheim; ‘School Class as a Social System’ by Parsons; ‘Ideology and Ideological State Apparatus’ by Althusser.

Unit 3: Socialisation: Theory and Application

Durkheim’s distinction between mechanical and organic solidarity; meanings and role of education in their context; social construction of reality (Berger and Luckmann) with reference to primary and secondary socialization. Bourdieu’s concept of habitus;

Caste, Class and Gender as domains of socialization: varna and jati; gender and caste (Leela Dubey); caste and class; Educational experience of the Scheduled Castes and the Scheduled Tribes.

Unit 4: Modernity and Education

Modernization theory and its critics; modernity under colonial conditions; colonialism in a comparative context (examples may be drawn from Latin America, Africa and South-East Asia); Debates concerning indigenous systems of education; Responses to colonial education; Regional experience of colonization: Bengal, Tamil Nadu, Maharashtra and Jharkhand as examples. Opportunity, mobility and social change; Society and State: Conflict and resistance; Equity and equality: the legal framework.
Unit 5: Knowledge, Curriculum and Pedagogy

Bernstein’s codes and frames; Apple’s idea of official knowledge; Why do textbooks provide sites for controversy; How are pedagogy and performance shaped by children’s backgrounds: Rosenthal’s theory of expectations; differentiation and selection under in public examinations; Classroom anthropology; the teacher and the new technology of communication: emergence of global pedagogic markets under the new knowledge economy.

Practicum

Students will be expected to undertake a project based on a question or idea arising out of different units of the syllabus. They can do such a project either individually or jointly with other students. Project reports can be used as basis for internal assessment, in addition to tests and/or book reviews and other assignments.
Course Vision

This course aims to promote understanding of the major theoretical traditions in personality, learning and cognition, situating them in their socio-historical context. It examines the assumptions, debates, dialectics and shifting stance across these traditions. It builds a nuanced understanding of the developmental, contextual and cultural differences in the ways individuals think, learn, develop and experience the world. Finally, it provides perspective on the contributions of each tradition to educational inquiry, research and discourse building. The organic unity between personality, learning and cognition constitutes the running thread along which the course has been visualized.

Unit I: Perspectives in Personality

- The Psychoanalytic and Neo-Freudian Perspective: Sigmund Freud, Carl Jung and Alfred Adler
- The Dispositional Perspective: Hans J. Eysenck
- The Learning-Behavioral Perspective: B.F. Skinner
- The Humanistic-Existential Perspective: Abraham Maslow, Carl Rogers, Rollo May

Each perspective will be discussed with reference to the basic assumptions about human nature, methodological stance, conceptualization of personality, the processes and dynamics of personality development and the notions of a healthy personality.

Unit II: Perspectives on the Nature of Human Learning and Cognitive Development

- The Behaviourist Perspective: (Classical and Operant Conditioning)
- The Psychometric Perspective (Guilford’s Structure of Intellect Model)
- The Piagetian and Neo-Piagetian Perspective
- The Cognitive Information Processing Perspective (Sternberg’s Triarchic Theory)
- The Social-Cognitive Perspective (Albert Bandura)
- The Contextualist Perspective (Vygotsky, Bruner and Howard Gardner)

Each perspective will be critically analyzed in the context of its epistemological understanding, ways of inquiry; view of human mind, learner agency, learning; nature of knowledge and the ways in which this knowledge is transmitted, acquired or constructed; pedagogic beliefs, practices and possibilities.

Unit III: Contemporary Issues, Debates and Research Trends in Personality, Learning and Cognition

- Significant Trends in Personality and Human Development Studies
• Research Trends in Learning and Cognition
• Methods, Strategies and Tools of Research
• Importance of Culture and Context
• Ethical Issues and Concerns

Suggested Readings

M Ed Two Year Programme

P.4 : Teaching and Teacher Education: An Interdisciplinary Perspective

Rationale
The objective of the course is to enable students to develop an understanding of teacher education and the theoretical orientations and paradigms that describe it. Students are expected to engage with the discourse on teacher education, to understand the important concepts, issues and debates in teacher-education and relate these to real life settings. This requires building an inter-disciplinary perspective (based on the philosophical, sociological, psychological and historical aspects) on the processes of teacher education, including teaching, learning and learning how to teach. It will enable them to deepen their understanding of teacher education so that they can better analyse the practice, provisions and policy that are critical within the professional context. Such a study would enable the capacity of students to formulate responses to the realities of teacher education. An understanding of contemporary issues and discourses would enable students to further develop critical and evaluative skills and to explore avenues to undertake research in teacher education. Thus, teacher education, in this sense, may be understood both as a perspective as well as an area/field of inquiry.

The course will include selections from theoretical readings, analysis of data and personal field engagement through project work, survey and case study.

Objectives
To enable students

- To gain an insight and reflect on the concepts, debates, development and status of teacher education.

- To understand that there is knowledge related to Teacher–knowledge with its philosophical, sociological and psychological underpinnings.

- To understand the issues of initial teacher preparation and continued professional development of teachers.

- To critically examine the policy imperatives in teacher education and the role of agencies and regulatory bodies for quality, including the issue of governance in teacher education.
Unit I: Evolution and Development of Teacher Education

- Studying Teacher Education: its Meaning, scope and significance; Teacher education as an interdisciplinary perspective
- Theoretical perspectives and paradigms in Teacher Education; Interface between Conceptual orientations and Evolving a coherent perspective on teaching, learning and learning to teach; Directions for educating teachers; Teachers’ role, Knowledge for teaching, and learning to teach in relation to it.
- Development of Teacher Education in India: Critical understanding of the dominant frameworks of pre service and in service teacher education including institutional structures, culture and programme design in a historical & contemporary perspective; Lessons drawn from other countries.

Unit 2: Perspectives on Teachers and Teaching

- Examining the notions of a Teacher and Teaching in the ideas of thinkers/ writings of Dewey, Freire, Giroux, Hirst and Schon and Indian thinkers such as Gandhi and J. Krishnamurti,
- Teacher as Critical Pedagogue, Cultural worker, Intellectual, Reflective Practitioner
- Teachers and Knowledge: Critically examine teacher beliefs, values, assumptions about children, learners, learning, teaching and knowledge; understanding teacher knowledge in terms of subject content, pedagogical approaches, socio-cultural context of children and diversity in society and its interface with the classroom.
- Teachers and their Identity: Theoretical perspectives; Historical and contemporary perspectives; Multiple identities of teachers in India; Changing notion of teachers in India (from Guru to Professional); understanding teacher identity vis-a-vis gender, caste, class, region, community and other socio-political aspects that create the identity of a school teacher

Unit 3: Understanding Teacher Education in a Social Context

- Socio-cultural context of teachers: Status of teachers in Society; examining the position of teachers within the socio-psychological, cultural, economic and political context in a historical and contemporary perspective and its impact on teacher education
- Understanding teachers and teaching within the larger education system: the school system; social and work status; teacher professionalism; teacher control and agency; and the changing profiles of teachers’ work and working conditions.
- The contemporary social demands from a teacher; studying the changing demography of teachers including the feminisation of the teaching profession and the gendering of school teaching.
Role of socio-political-economic factors in teacher education: Teacher education in the Neo-liberal context

Unit 4: Perspectives in Teacher Preparation and Teacher Development Programmes

- Programme Structure and Curriculum Framework- Paradigms/Themes that underlie the structure of teacher education programmes; Structural and Conceptual Alternatives
- Curriculum Orientations and Models – Behaviouristic, Personalistic, Traditional-craft and Inquiry – oriented; Approaches to development of Curriculum of pre-service teacher-education –Student-teacher centered, Teaching centered / Situation based, Society – centered; Transacting the curriculum – challenges and alternatives; Inter-play between generic and subject – specific issues in curriculum; Pedagogy and Assessment; Best teaching practices
- Processes of teacher education – Training within teacher preparation; Technology and teacher education; Student- teaching, its supervision and assessment; Student – teaching-Issues of Length, Activities and Site; Patterns--Practice teaching , Intermittent Teaching, Block Teaching and Internship
- Planning and Organizing Teacher Education at different levels of school education, Role of SCERT, DIETs, BRCs & CRCs in Teacher Support (i.e. National, State and regional bodies)
- Professional Development of Teachers- Meaning, Nature and Scope; Place of professional knowledge, understanding, skills, values and attitudes, Ethics of Teaching; Transition from being a student-teacher to a beginning teacher-understanding the process by taking up case studies and teacher narratives; In-service Teacher Education – Concerns, Issues and Challenges; Shift in perspectives ,practice & approaches; Innovative programmes for practitioners

Unit 5: Policy Imperatives in Teacher Education

- Study and Analysis of documents from the post-independence and the contemporary period such as the National Policies on Education; the National Curriculum Frameworks on Teacher Education; the National Commission on Teachers; the RTE Act and the Justice Verma Commission
- How National Policies on Education have viewed teacher education : a Critique
- Quality and Regulatory Dimension – Strengthening the regulatory framework of teacher education ;Genesis of NCTE; Role and functions of NAAC as a body; Other Apex agencies
- Future Development of Teacher Education in India – Building a Vision of an Institution of Teacher Education; Policy Directions and Programmatic Thrusts
- Policy Making and Teacher Education, including issues of financing; Issues of governance and maintaining standards

Enabling students to understand the crisis in Teacher Education (TE), especially in the Indian context, and engaging with problems/critical questions would be an important part of this unit. Readings and discussions would focus on issues such as, Why did TE need a Regulator? Why does development in TE not lead to a corresponding development / reforms in school education, thereby, leaving a huge gap between the two?

**Unit 6: Research in Teacher Education**

- Integrating inter-disciplinary knowledge through researches in Teacher education
- Teacher Education as a field of inquiry; Grounding in theoretical and methodological understanding of the field of teacher education through research; Identifying Themes and Issues for research
- Philosophical and Sociological inquiry in teacher education; Historical studies of teacher education; Implications of psychological research on student learning and teaching for teacher education; Research in Curricular Areas, Areas of Inclusive Education, Gender, ICT, Art and Craft etc.
- Research to foster teachers’ knowledge, understanding and practice;
- Future research and strategic planning in Teacher Education: Profiling the Teacher: Some conceptual issues;; Studying biographies of teachers, Understanding the professional demands & personal needs of teachers, Developing the profile of a teacher to inform the design of teacher education curriculum

**Practicum**

The students undertake the following tasks- Study Biographies of Teachers and Develop Teacher Profiles within historical and contemporary perspectives, Design material for education of future teachers and research an aspect of teaching in their subject, Take up an in-depth case study of a Teacher education Institution.
LIST OF READINGS

**Articles:**
- Relationship between Teachers’ Beliefs and Teachers’ Practices-M. M. Buehl & Jori S. Beck
- Teachers’ Beliefs about Teaching (and Learning)- H. Fives, N. Lacatena & L. Gera

**Articles:**
- Teachers –made not born? –John F. Fulton
- Teaching student-teachers to reflect- K. Zeichner and D. Liston
- Teacher Professionalism in New Times- G. Whitty
- The theory-practice relationship in teacher training- Paul Hirst
- Rival conceptions of practice and teaching- David Carr
- Constructivism Examined- R. Fox
Articles:
- Philosophical Inquiry in Teacher Education - R.F. Floden & M. Buchmann
- Foundations of Education in Teacher Education - K. M. Borman
- Student-teaching and School Experiences - E. Guyton and D. J. McIntyre

Unit 1: Education as a System

Distinction between education as a concept and as a system; systemic data about education: institutions; stages, enrolment, transition; census and school surveys; Analysing these data in different states of India in a comparative perspective; Expenditure on education: Centre and States; Diversity of administrative structures in school education; Problems of collecting educational data:

Historical character of university as an institution in the Indian sub-continent; universities as examining and affiliating bodies;

Comparing institutional data in India and other countries of the SAARC region.

Unit 2: Historical Character of Present-day National Systems

Shared pasts of the SAARC region: Regional perspective; commonalities and particularities; students to choose any two SAARC countries for closer familiarity with their systems of education;

The system of education at the time of India’s independence; The state discourse of reform and expansion: Situating official reports prepared around independence in their a socio-historical setting: Sargent, Radha krishnan, Mudaliar Commisions.

The second decade: Study of Naik’s retrospective analysis in ‘Education Commission and After’; policy making in the 1980s: Chattopadhyaya’s concerns; formulation of national policy and ‘programme of action’; 1990s: impact of economic reforms.

Unit 3: Education, Culture and Social Movements

Education as a domain of social reform movements in colonial India: their socio-cultural impact in the regions where they arose; Cultural context of education: caste and gender as sites of struggle--biography as a resource: Ramabai and Ambedkar;

Social welfare, and cultural reform under the auspices of the modern state: study of child labour and child marriage as examples of state-driven reforms; Adult literacy and universal elementary education as two domains of state-driven social movements; Differential success of the state in universalization of elementary education in Nepal and Sri Lanka.

Struggles for change in education through innovation; Contextualizing innovative institutions and programmes:NaiTalim; Vishwabharati; Hoshangabad Vigyan.
Unit 4: Language, Religion and Education

Language as a site of policy debates: Constituent Assembly debate on language policy and its implications for education; history of the 3-language formula and its present status; English as a medium of education: issues, debates, inquiries;

Education and religion: issues and policies; provisions for minority communities; meaning and implications of secularism in education;

Comparing Indian policies with policies in other countries of the SAARC region.

Unit 5: Education under Globalisation

Nature and logic of new economic policies; their implications for education; the state as regulator of market: private investment in education—historical development; rise of self-financing institutions and courses; technology-driven changes in education and pedagogic practices; impact of globalization on different stages of education.

Quality debate in education; equity and equality under the emerging policy scenario.

Practicum:

Students will be expected to undertake a project comparing any two countries of the SAARC region, using ideas included in any of the above units of this course.
Aim and Rationale

The chief aim of this course is to engage students with fundamental constructs in psychological theory that educators have drawn upon to understand and anchor processes of teaching and learning. The course will focus on major shifts in the evolution of psychological thought as situated in specific social and political contexts. The course will also attempt to problematise the links between psychological theory and education; revisit and deconstruct specific constructs and perspectives embodied in theories of educational and developmental psychology with a view to re-contextualise them. It will also engage with historical and contemporary perspectives on childhood and their bearing on education.

Objectives
At the end of the course students will be able to:

- Critically examine the core principles and key constructs of psychological theory, research and practice that educators take to the field of practice
- Revisit and reconceptualise key notions and concepts, and the specific ways in which educational psychology shapes educators’ understanding of children, childhood, difference, education and disability.
- Deconstruct concepts of developmental psychology in the context of enlightenment philosophy and the liberal view of education
- Critically explore the connections between the study of individual differences – the mainstay of psychological theory - and broader socio-cultural contexts.
- Examine the theoretical and pedagogical derivatives of constructivist and socio-constructivist theories; and how these have been used to foster the individual narrative and put limits to the educational discourse
- Examine and conceptualise the contribution of socio-cultural theories in reimagining children, young people and their learning
- Investigate historical and contemporary understanding of childhood, universal and plural constructs of childhood; the impact of globalisation on childhood and children’s education.

Units of Study

Unit 1: Critical perspectives of dominant theories and constructs in educational psychology: learning processes, memory, individual differences in intelligence, cognitive development, motivation, self-regulation, and self-concept, and their role in learning; reliance on normative constructions about self, capacities and behaviours; and challenges posed by socio-cultural theorising and inclusion studies to the individual narrative, meritocratic orientation, nativist discourse of difference and essentialist ideas - including testing and measurement.
Unit 2: Deconstructing developmental psychology: developmental psychology as a modern discipline in search of objectivity, science and reason; counter narrative to behaviourists’ accounts of child learning; Piaget’s model of individual development, enlightenment philosophy and the liberal view of education; Vygotsky’s ideas on the interaction between development and learning and theorisation on teaching and instruction; constructing the narrative of child agency; child-centered education and the internal contradictions between emancipatory and normative tendencies; child-centered pedagogy and the individualised model of childhood; treating the individual as the unit of social and educational activity; ‘ideal’ childhood, pathologising the disadvantaged and education as a means of social control.

Unit 3: Child as an epistemic entity, learner and social being; Vygotsky’s view of learner embedded in socio-historical context, anti-individualism and the emergence of ‘activity theory’; moving away from static conceptions of ‘ability’ and ‘competence’; concepts of everyday cognition, cross-cultural and situated learning, distributed cognition – Rogoff, Bruner, Lave and Wenger; enquiry into the absence of these perspectives from mainstream educational discourse.

Unit 4: Dominant social imaginaries of childhood: understanding the varying notions of childhood and the child; historical and contemporary perspectives on childhood; ‘ideal’ childhood as the dominant construct of mainstream schooling; understanding children’s identities and childhood as a plural construct and the risk of marginalisation; impact of globalisation and the market on childhood, children and their learning; examining the interrelationship between local and global factors in the world of children.

Advanced Readings

Unit 2

Unit 3

**Advanced Readings**

**Unit 4**

Advanced Readings

Course Objectives

The overall aim of this course is to engage students with economic thinking and its relationship with development and education. It also aims to examine debates on the political economy of globalization, development and education and its impact on a democratic social order. The course attempts to investigate how economic discourses associated with concepts of the market and productivity, efficiency and accountability have shaped the policy and practice of education. The role of education in bringing social transformation is also addressed. At the end of the course, students will be able to:

- Engage students with debates around economic policy and its relationship with educational policy and practice.
- Introduce students to post-Independence Indian economic thought and policy, and trajectories of development that have a bearing on the nature and direction of growth of the education sector.
- Examine the complex relationship between education and development and its impact on educational policy and practice.
- Investigate how globalisation influences educational reform and how the free-market economy shapes educational institutions and processes.
- Examine the rhetoric of educational reforms and investigate the relationship between education, politics and social change.

Units of Study

**Unit 1: Understanding the Linkages between Economics and Education:** Debates and contested views on: human capital theory its critique and relevance; education as investment by individuals and society, public and private investments; education as merit and public good, education and human development.

**Unit 2: Education for Economic Development:** Debates and comparative perspectives; financing of the education sector in the federal structure of governance; allocation of resources at different levels of education, specific regions of the economy, and specific sections of society. Structural changes in the Indian economy post-1991 and its larger political and social implications; implications on allocation of resources into the sector of education; mapping shifts in educational policy.

**Unit 3: Understanding the Relationship between Education, National Economic Growth, and Development:** Education as a means of development and as an indicator of development – to be studied through cases within and outside the country; examining the narratives of policy...
and educational practice to investigate the relationship between education, poverty and inequality; poverty as capability deprivation and capabilities failure as a consequence of marginalization; examine the economic discourse of competition, efficiency and accountability and its impact on the educational discourse of policy and practice.

**Unit 4: Political Economy of Education:** Colonial and post-colonial encounters; liberalism to neoliberalism: understanding individual, state and power; economic rationality and education- examining the critical theory perspective; globalisation and educational reform; market mechanisms and education–commoditization and privatization in education- examining the case of higher education; advocacy for education as a profit-making enterprise; low budget schools and private for the poor; the political economy of teacher education.

**Unit 5: Contemporary Issues, Concerns and Debates in Education:** mobilizing resources for education: understanding the dynamics of centre-state relations, public funds and constraints, private capital and individual cost sharing, foreign aid, public-private partnership; education and GATS (General Agreement on Trade in Services); political nature of school as a social institution; ideological, socio-economic and socio-cultural forces that shape education; examining the rhetoric of educational reforms -the role of education in society; educational reform, social change and education.

</table>
Educational research tends to be primarily descriptive in nature. In India, it is really important to develop deep understanding of this type of research as often educators seek remedies of educational problems without understanding the nature of the issues and problems. Hence, quality descriptive research which contributes to knowledge building about various facets of education in India is crucial. This course will help in understanding not only the procedures of research but also issues related to its conceptualization and theory. It will critically examine the processes and contextualize it within the current discourse of educational research.

The objectives of the course are as following:

- developing understanding about research processes by engaging with fieldwork and examining existing research studies.
- learning to critically analyze not only the research process and papers but also one’s own experiences as a researcher.

Unit 1. Foundations of Educational Research: Historical background relating to the philosophies impacting the educational research and current situation. Role of theoretical perspectives on conceptualizing research and knowledge construction.

Unit 2. Research Processes and Perspectives:

a) Quantitative and qualitative perspectives

b) Special focus on survey, qualitative methods, and case studies. Comparing and contrasting to gain understanding of these methods and their strengths and limitations. Issues related to sampling, access, generalization, and subjectivity will be discussed.

c) Examining the tools of research with special focus on preparing questionnaire/interviews, and observation. Contrasting differences of approaches in the use of these tools, for example, contrasting structured and unstructured interviews, or participant observation with other kinds of observation.

d) Ensuring data quality: Examining ways of ensuring data quality depending on the type and purposes of research approach being used. Topics will include validity, reliability, triangulation, discussions on subjectivity and representativeness.

e) Analysis of data and drawing conclusions

f) Ethics of research.

Unit 3: Some Relevant Topics/issues Specific to Educational Research:

(a) Classroom-based research

(b) Research with children: Challenges and concerns.
(c) Examining concept development and pedagogy of various subject areas including Maths, language, social studies, and science.

(d) Content analysis with special reference to research in textbooks in India.

Unit 4. The process of writing research: Examining the writing process with special attention to writing as a thinking process. Examining ways of achieving coherence, and clarity in writing dissertation and research based papers. Learning how to write different chapters and to select references and cite them in the text.

**List of Reading for Research Method Class (2011-12)**

New Course
B-4 (Culture, Cognition And Pedagogy)

Prof. Bharati Baveja

This course addresses two major concerns; Cognition and Pedagogy. It seeks to explore the cognitive phenomenon from perspectives ranging from biological basis, to ontological development, to its cultural situatedness. It aims at analysing the interplay between biology and culture and its role in individual cognition. The socio-cultural approach to learning is expected to be considered at length. Further, the course delves on the relationship between cognition and pedagogy and discusses the pedagogical approaches compatible with the learning theories studied. The ultimate goal of the course is to enable learners develop a deep understanding in the field and ultimately move towards the development of a personal perspective on learning and pedagogy.

2. The Biological Bases of Learning:
   a) Ultimate causes: Evolution and Cognition
   b) Proximate causes: Neural architecture and Cognition
3. Piaget’s Theory of Cognitive Development
4. Personal\Radical Constructivism
5. Neo-Piagetian Theories of Cognitive Development
6. Socio-Cultural bases of Cognition
   a) Vygotsky’s socio-historical approach to learning and cognitive development
   b) Bruner’s ideas on learning and pedagogy
   c) Neo-Vygotskyian perspectives in learning and cognitive development
   d) Social-constructivism and Situated Cognition
7. a) Cognitive Information Processing Approach to Learning
   b) Meaningful verbal Learning and expository teaching
8. Cognition and Pedagogy
   a) Concept and approaches
   b) Paradigmatic shifts in Pedagogy –from Transmission to Constructivism.

**Suggested Reading List**

Case, R. (1992). The Role of Central Conceptual Structures In The Development Of Children’s Scientific And Mathematical Thought. In Andreas Demetriou, Michael Shayer & Anastasia Efklides (Eds.), *Neo-Piagetian Theories Of Cognitive Development: Implications And Applications For Education* (pp. 52-64). New York, USA: Routledge

**Thematic Note**

This course is designed, keeping in mind that language is a complex phenomena, a reflection-provoking tool, that facilitates collaboration and real life communicative practice. The course content has 3 major Units, which include subthemes such as language acquisition, the nature and functions of language, methods of analyzing language. It is, thus, a multi-disciplinary language course that takes into consideration the important role that language has in education.

**Unit 1: Language and Cognition.** (20 hours)

Sub themes:
- The Nature of language
- Methods of analyzing language
- Theories of Cognitive Development.
- The creative expression- oral and written.

**Unit 2: Language, Culture and Society** (15 hours)

Sub themes:
- Environmental Assistance
- Place of the mother tongue and a foreign language in education.
- The Developmental process
- Dialect differences and bilingualism.
- Language of the Social Groups in India.

**Unit 3: Language and Content** (15 hours)

Sub themes:
- Communication Styles.
- Approaches to various language syllabi.
- Strategies to aid language learning
- Material Production.

**Desirable**

M. Phil. Course

B-8: Advanced Psychometry

(Dr. P. Mohan Raju)

The first part of this course intends to develop further understanding about different test–theories; on issues related to Educational and Psychological tests; and develop ability to demonstrate the distinction among different types of tests on technical basis. The second part of the course targets to develop abilities among the scholars in taking decisions about and the application of advanced statistical tools for parametric & non-parametric data conditions.

Objectives:

(a) Develop technical understanding on test-scores under classical test theory and Item–Response theories; and test-score interpretation.

(b) Develop abilities in enhancing the quality of tests & scales used in Educational settings.

(c) Advance decision making abilities in application of higher level statistical tools in Test/scale development, in Experimental and Ex-post facto research.

(d) Further develop advanced skills (both computational and software-based) in handling the educational data under different research strategies.
The Overview

The course attempts to enable the scholar to explore the discourse on the interfacing of science and societal contexts, their changing relationships and to assess implications for science education. The interfacing encompasses various issues and dilemmas embedded in the socio-political-economical contexts with the cultural underpinnings; the understanding would be developed through evidence based analyses and research findings. The scholar would engage with the epistemological, psychological as well as sociological bearings of science vis-à-vis the changing worldview. Studying the factors influencing scientific research and technology options especially in the context of the developing countries would help in locating science and technology as dynamically functional social enterprise. The contemporary perspectives as well as debates regarding public understanding of science, women and science, people’s science movements, social accountability of science etc. bring out the ethical relations between science and social values. Understanding the role of scientists, public interest organizations and science communicators in creating public awareness for participation in decision making and generating informed debates on issues related to science and society. The reflections emerging from interactions of science, society and education would thereby enable the scholar to engage with the research inquiry into the contouring of science education for sustainable development in the existing as well as in the futuristic societal context.

UNIT I

*Introduction to the Nature of Science Discourse including issues of worldviews in sciences.*

This is an introductory unit on the nature of science that includes philosophy, history and sociology of science. In the context of this the issues that involve understanding the worldviews in sciences would also be introduced.

Views of Michael Matthews, H.G Gauch, Bertrand Russel (in History Western Philosophy : The Rise of Science),

UNIT II

*Science and Society Interface*

Taking Science to the ordinary people has been an area of deep concern for a few socially conscious scientists nationally and internationally. In India, eminent physicist, Dr.Meghnath Saha, worked in this area in the forties. This was prior to the emergence of systematic efforts in this area that started in the sixties. Since the seventies debates emerged on the method of science and the relevance of learning history and philosophy of science to understand what exactly scientists do and how do they arrive at conclusions. The social context of doing science also gained importance during this period.

In India , the emergence of people’s science movements accompanied with the evolving critique on the issues of environment, health, agriculture and wider issue of development. The unit would cover this along with an introduction to the debates on ethics and science.

Views of Anil Sadgopal, Meera Nanda, A.K. Giri, V.V. Krishna, Shiv Vishwanathan, Vandana Shiva, Sunder Sarrukai, Michael Matthews etc.
UNIT III

*Gender and Science*

There is an active debate in gender and science on the issue of marginalisation of women in sciences, especially in theoretical sciences. There are studies that highlight and empirically establish the marginalisation due to sociological reasons including deep socialisation and patriarchal norms. The proponents of this theory basically demand level playing field for women scientists and do not make any claims of distinction between gender based learning or doing of science.

However, the standpoint theory, calls modern science masculine science done by the white and western men that ignore the science done by the marginalised communities including the blacks. The proponents have developed a critique of objectivity and universalism of sciences. The claim of the theory is that different communities including women, have different ways of doing science, based on their social location and they are capable of doing better science. This critique of doing (method) and learning (cognitive) of science has actually created space for many strands that distinct from sociological basis however do not also agree with the critique of universalism. The unit aims to introduce the students to this discourse.

Views of Jayashree Subramanium, Cassandra L. Pinnick, Helen E Longino, Sandra Harding, Abha Sur

UNIT IV

*Science Education for Sustainable Development*

Intrinsic values in science. Science, values and life skills. The perspectives regarding dichotomous position of Science w.r.t. religion, faith, facts etc. Indigenous practices and science. Ethical implications of scientific research and the development of new technologies. Contemporary challenges and perspectives w.r.t societal, environmental and resource-related contexts in considering science education for sustainable development.

- Meeting Challenges to Sustainable Development through Science and Technology Education; Jack Holbrook, International Council of Association for Science Education (Science Education International Vol.20, No.1/2, December 2009, 44-59)

and Retention in Scientific Careers. Mumbai: Research Centre for Women’s Studies.

B-14 (Educational Administration, Supervision and Management)

Dr. Manju Agarwal

Concept Note

During the past forty years there have been drastic changes in the way education is managed all over the world. Beginning with the emphasis on peoples’ literacy and an organisational framework to protect peoples’ right to education, the state policies have been working to evolve a system which not only facilitate the educational processes by establishing a network of institutions, but also to create a system which ensures harmony between the social and political goals. There are debates how education can be decentralized within a national system. This course is designed to equip the scholars to critically analyse such policies from the national and international perspectives; be it at the formulation or at implementation stages. The focus is on a research based analysis of issues relating to educational policies, planning, administration and development. Further, a discussion on socio-economic, political and historical aspects of educational administration is also worth considering. As the administrative process flows down to the educational institutions, the instructional aspect has to be given priority. This calls for making the supervisory practices pro-active. The content on supervision and management intends to explore how can the conventional models of inspection be made more developmental.

Unit-1 : Organisation and Policy Studies

- Evolution of educational administration in India: Contemporary issues and trends.
- Organisational framework of public education in India and some selected countries.
- Policy studies and issues in educational administration: philosophical, ethical, moral and legal bases of policy decisions.
- The study of major theories and models of educational administration: the systems’ approach to education; administration

Unit II : Supervisory Practices

- Current practices of educational supervision.
- Supervisory practices and the organisational dynamics:
- Instructional supervision.

Unit III : Management and Planning

- Managerial processes and its importance in education.
- Quality improvement – Issues and challenges
- Institutional Planning and Management – Some case studies.

Unit IV: Designing the Research Programmes

- Exploration of research based approaches, designing implementation and evaluation of a field project.

Concept Note

Creativity is a multidimensional construct that is conceptualized focusing on an individual and its unique abilities, as a unique product or an idea including scientific discovery, technological invention, creations in art and design or social innovation or as a process involving an interaction of the individual and its social underpinnings. It needs to be understood as a state of mind that helps in self-growth and leads to self-actualization and not merely as a new product or an idea. Also, there has been a shift in the field from focusing on the personality traits to the cognitive and social processes. Thus, the paper focuses on the understanding of creativity from a developmental perspective, its role in development of an individual, solving everyday problems, addressing challenges posed by the rapid and complex changes in the contemporary society and in social advancement. The paper includes a research perspective that involves exploring the scope of action researches for studying the little ‘c’ creativity in our everyday lives and in classroom with children. It also involves a study of research areas such as evolution of the concept of creativity, how it is diminishing in recent times, towards developing an understanding of the creative curriculum for fostering creativity and other emerging issues in the field of creativity. In the light of the above, the scholars would be involved in reflecting on various theoretical approaches on creativity through discussions, term papers, seminar presentations and research paper/ article reviews. They would be also be engaged in critically analyzing the present curricular approaches vis-à-vis their effectiveness in promoting creativity amongst children and developing ideas related to classroom strategies and educational experiences for children from a global perspective.

Units and Subthemes

I. Theoretical Foundation of Creativity
   Process Approach
   Product approach
   Personality Approach with special reference to systems view of creativity

II. Issues related to assessment of Creativity
   Test and non-test approaches
   Evolving criteria for assessing cognitive styles, creative personality and creative thinking in cultural context

III. Creativity and Development
   Creativity in relation to developmental stages
   Role of home, school and community in fostering creativity
   Curriculum and classroom strategies for promoting creativity

IV. Global Education and Creativity
   Empathy, interdependence and self-actualization
   Emotional giftedness and creativity
   Developing global awareness

V. Creativity and Research Perspectives
   Theory building
   Action Researches
Alternative research paradigms

**List of Readings:**

**Essential:**

M.Phil Course  
B-17: Philosophy of Education  
Dr. Jayshree Mathur  
Sept-April (8months)

32 hours (16 meetings)

Unit-1 Philosophy and Education  
6 hours

a. Emergence and development of the discipline of Philosophy of Education

b. Schools of thought and their critique

c. The Analytical tradition and its critiques

d. The European hermeneutic tradition and its critique

b. Philosophy of education, educational theory and educational practice

Unit-2 philosophical inquiry into education: the metaphysical and the axiological  
10 hours

a. The importance of the metaphysical in understanding Education and the educand

b. The ethics of the common good/ liberal- issues of autonomy, authority, authenticity

c. The value of equality- as procedural justice, equality of treatment, outcome, and opportunity

d. The aesthete in education- creativity and imagination

Unit- 3 Education and the Epistemological  
10 hours

(e) Knowledge as justified true belief

(f) Knowledge as pure reason

(g) Knowledge as experience

(h) Does knowledge need foundations?

(i) Feminist epistemology

Unit- 4 Philosophy, Education and Research  
6 hours

a. Method in philosophy as method of research- dialectical, dialogical, deductive, inductive, descriptive, analytical, synthetic

b. The question of objectivity and subjectivity- the positivistic and the phenomenological

Descriptive Note:

This course intends to provide a space to underline the necessity, the importance and possibility which the study of Philosophy of Education has in understanding Education. It provides normative, descriptive and analytical perspectives which offer a critical mode of inquiring into educational realities. Like other forms of normative inquiry concerned with distinct domains of practice, philosophy of education in shaped not only by the philosophical problems and resources it brings to its domain but by the practical problems and perplexities intrinsic to that domain. Because educational theories are necessarily trans-disciplinary, any approximation to a systematic theory in education will outstrip the resources of any one discipline. However, philosophy seems to be better equipped than other disciplines to undertake the conceptual and synthetic work necessary to the construction of a trans-disciplinary practical understanding of the discipline of education. Philosophical argumentation and reflection are central in providing a conceptual framework for any study.

Course Overview

The overarching course objective is to understand how relations of power and inequality (social, cultural, economic), in their varied forms, combinations and complexities manifest and are challenged in the informal and formal education system.

The course will examine the ways in which schools reproduce, reinforce, and challenge prevailing social, economic, and political relationships. We will look at the structure, practices, content, and outcomes of schooling, primarily in the light of their relationships to the wider society in which schools are located. We will take into account the link between schools and societal stratification, probing how schooling contributes both to social mobility and to the reproduction of the prevailing social order. The emphasis will be to build an understanding about how the factors of class, caste, ethnicity, and gender affect the educational experiences of students within schools and within classrooms; and their role in framing students’ identity and future life options. The course will also address role of the state in the emerging Neo-liberal global order, and its bearing on educational policy and practice. The discussion will be largely located in the theoretical framework of critical educational studies for bringing out the multiple dynamics underpinning the relations of inequality, exploitation and domination in our societies; and ways of challenging epistemological and ideological assumptions for realizing social transformation and justice.

Course Requirements

Course requirements include completion of the assigned readings, active participation in classroom discussion, a presentation of monthly readings to the class, writing an argument-driven paper, summarizing and critiquing the arguments presented in the readings in this course. In addition, students will also be required to analyze and explain data collected through observation and an interview as a case example of the theories presented in this course.

Class activities will vary from week to week, ranging from lectures to discussions to student presentations. Students are expected to be lively participants in building the classroom discourse and be well prepared to critically discuss the materials assigned on that date. As active participants, students are expected to ask questions, raise issues, and contribute to substantive classroom discussion in an informed way. Discussion opportunities that reflect the readings and the topics addressed in the course will be held regularly as part of the normal class period.

Equality and Education

Social contexts and social structures: class, caste, ethnicity and gender as categories of analysis in relation to education.

The relation between education, socio-economic status, mobility, educational opportunity and social change

Social structure, exclusion and inequality in education

Critical perspectives in educational theorizing: Pierre Bourdieu, Basil Bernstein, Paulo Freire, and Michel Foucault
The equality and education debate in India with special reference to language, minorities, Scheduled Castes and Scheduled Tribes, women, rural & urban and backward & advanced regions.

Inequalities and resistances

Measures for bringing about equality- common school system, vouchers, reservations, scholarships, right to education, and alternatives in education; social and the de-schooling movements

Equality and education in diverse socio-political systems - developed, liberal democratic, socialist and developing countries

Political economy and the 'new' sociology of education with reference to the equality debate

Education, Globalization and the Nation-State

Power, Culture and Politics of Identity

Democracy, Citizenship and Education

Note: The existing course structure is augmented by including some contemporary perspectives and issues.

Course Resources: Some Suggested Core and Additional Readings

Conceptual Note

The course on teacher education and development at the M Phil level will attempt to equip students with the ability to address the challenges of teacher education and development as they affect the Indian society. Understanding teacher education as an interdisciplinary perspective drawn from the foundations provided by the disciplines of sociology, psychology and philosophy, the course will engage students with the theoretical basis of the concept of teacher education and development. It will sensitize students to the issues of teaching as a profession, reflection in teaching and a critical analysis of the various approaches to teacher education and development.

The role and status of a teacher emerging out of gender, class, a teacher’s own identity, beliefs, attitudes and personal knowledge, and the way they affect the evolution of the profession of teaching would be discussed.

A strong grounding in research in the field of teacher education would enable students to research concrete problems in the area.

Objectives

To enable the students to

a) understand the concept of Teacher Education and Development

b) delve into the issues related to the professional preparation of teachers

c) be engaged in the process of critical analysis of the various approaches to teacher education

d) understand the policy perspectives in teacher education

e) understand the role and status of a teacher emerging out of gender, class and viewing it in the context of teacher beliefs, identity, personal knowledge

f) have a strong grounding in research in this area

Course Content

Unit I 14 hours

Understanding Teacher Education and Development – Study of teacher education as an area of knowledge; locating it within the multiple disciplinary perspectives of sociology, philosophy and psychology, understanding the concept of teacher education and development by engaging with both the theory and practice of teacher education.

Unit II 16 hours

Professional Preparation of Teachers – A critical analysis of various approaches to the preparation of teachers- transpersonal, communication, task analysis, systems approach, constructivist approach, portfolio assessment and mentoring
Issues in professional preparation of teachers – patterns of student – teaching, supervision and assessment

Organisation of teacher education and its curriculum development, Continuous Professional Development (CPD) of Teachers

**Unit III**

12 hours

The Policy Perspectives in Teacher Education, Role and Status of Teachers in India, Teacher beliefs, Personal Knowledge, Attitudes, Identity and the Evolution of the Profession of Teaching

**Unit IV**

8 hours

Research in Teacher Education and Development – Researching concrete problems in the area

**Reading List:**

**Essential Readings**

**Suggested Readings**

Teacher education is the bedrock of the education system. A high quality teacher education is essential for the efficacy and relevance of education at all levels, and to the high status of the teaching profession itself. The quality and effectiveness of a teacher education program depend upon its capacity to respond to the current social, economic, cultural, civic and legal contexts of a country.

The last ten years have seen several global and national initiatives that warrant a change in the current teacher education paradigm. There has been increased awareness and advocacy about civil, political, economic rights of persons with disabilities. The UNCRPD (2006) expects India to ensure that children with disabilities are not excluded from free and compulsory primary and secondary education, on the basis of disability. The Sarva Shiksha Abhiyan (SSA) has been a vehicle for the international agenda of ‘education for all’. More recently, education has been considered as a fundamental right under the Right to Education Act (Government of India, 2009). All children, including those with disabilities, must have access to free and compulsory education.

In addition, an enhanced parental awareness about disability has seen an increment in the enrollment of special needs children in schools. More parents than ever before see the value of special education training for their children. The implementation of the Right to Education Act would create a demand for a large number of special education teachers. The teacher preparation program at all levels must address these significant social and constitutional obligations. It is in the light of the foregoing the course “Special Education - issues and Challenges” is designed to give theoretical understanding of various issues in special education to prospective teacher-educators.

**Objectives:**

On the completion of this Course, the M.Phil Scholars will be able to:

(a) Examine critically the term “Special Education” and its components, need and relevance.

(b) Develop an understanding about various disabilities.

(c) Discuss Education of Children and youth with disabilities as right-based issue.

(d) Discuss critically various national and international legal instruments.

(e) Develop an understanding about implications disabilities in planning and carrying out need-based research.

**Content**

(α) Special Education - its concept, components, need and relevance.

(β) Concept, etiology and characteristics of various disabilities included in Indian laws.

(χ) Philosophical, sociological and psychological bases of education of children with disabilities and educational implications.

(δ) Rehabilitation- Concept, need and process.
(e) National and International laws and conventions-Disabled Persons (Equalization of Opportunities, Protection of rights and Full participation) act of 1995, National Trust for Persons with Mental Retardation, Multiple Disabilities, Cerebral Palsy and Autism, UNCRPD NGO(s) and INGO(s).

(ϕ) Schemes, Concessions and facilities available to Persons with Disabilities.

(γ) Research Perspective in Special Education: Towards an Ethnical Community: Beyond the categories, Mirroring the Defaults, Methodological Debates, and Problems.

Readings:

- Smith, Deborah & Tyler, Naomi (2009). Introduction to Special Education: Making a Difference. New York: Allyn & Bacon
New Course

B-29 (Literacy: Processes and Practices)

-Dr. Shobha Sinha

Even though the census figures show steady increase in literacy percentage in India, yet the actual situation regarding literacy continues to be very dismal. Theory building and research in this field are very weak in India. This course deals with building up understanding of literacy by addressing topics/issues which are generally neglected in India. The focus will be both on early and extended literacy and will examine both the current research internationally and the Indian context.

Objectives: To gain understanding about theory and research related to literacy, specially in the school context.

To examine literacy in Indian instructional context.

Unit 2: Early Literacy Development: Emergent Literacy. Formations of concepts about print. Vygotskian perspective on learning and development.

Unit 3: Extended Reading

  b. Literature and Reader Response: Role of reader. Aesthetic and efferent reading.

Unit 4: Writing: Theories and Models of Writing. Writing process theory. Writing as a social process. Relations among oral language, reading and writing development. Writing to learn. Developing reflective writers.

Unit 5: Socio-cultural aspects of literacy. Diversity and Literacy. Literacy practices at home and school. Literacy in the classroom context. (Special attention to research and theory from a sociolinguistic and anthropological perspectives)

Unit 6: Literacy in the Indian Context: The purpose of this section is to gain understanding of literacy related issues in the Indian context and to understand the discourse related to literacy. Literacy campaigns in India. Literacy instruction in the Indian context. Paulo Friere’s perspective on literacy. The process of political literacy. Cultural action and conscientization.

L. Kamil et al. (2011). Handbook of Reading Research. Volume IV.
B-28 (Diversity, Inclusion & Pedagogy)

Dr. Vandana Saxena

Conceptual Note

Diversity is a way to look at, understand & build a meaningful perspective about differences amongst individuals and various social groups. It means more than acknowledging and appreciating variance in cognitive and physical ability, gender, age, national origin, ethnicity and religion. The power of diversity is unleashed when we respect and value differences. Teaching diverse groups and being concerned about the learning experiences of all the students is of crucial importance. Inclusion on the other hand, is a state of being valued, respected and supported. It’s about focusing on the needs of every individual and ensuring that the appropriate conditions are in place for each individual to achieve his or her full potential. Diversity of all forms in the student body is crucially important in helping all students become conscious learners, critical thinkers, and in preparing them for participation in a pluralistic, diverse, society. One needs to be constantly reminded that each student has a unique position as an individual and need not be understood as a proxy for his or her group.

The simultaneous production of knowledge and social order provides a more encompassing conceptual framework than exertion for understanding the relationship between school and society. It could be achieved by Integrating the learning experiences with student’s knowledge through pedagogical congruence which means teachers would explore the relationship between school based experiences and student’s linguistic and cultural knowledge and evolve ways to link the two. Such pedagogical approach merges discipline specific and diversity oriented approaches, recognizing both the continuity and variance between various school based experiences and student’s background.

Inclusion, thus, is to be seen as a pedagogical belief around which school practices are construed. Schools have a responsibility towards all their students to ensure that all of them have an equal opportunity to develop their ability. If instruction reflects the cultural and linguistic practices and values of only one group of students, then the other students are routinely denied an equal opportunity to learn.

The course intends to facilitate the scholars to envision multiple dimensions of inclusive pedagogy in school, consequential in creating an educational experience that is shaped for educating all students to succeed in a diverse society and equip them with comprehensive intercultural skills. The discussions would focus on developing such an inclusive pedagogy through which the student’s voices and experiences are reflected and valued.

Unit I: Diversity and Inclusion: Theoretical Premises

- Epistemological underpinnings
- Socio-political context
- Advocacy and Systemic action: A critical analysis of policies, legislations and programs

Unit II: Pedagogical and Curricular Issues

- Pedagogy of Inclusion and social change: Context, content and competence
- Understanding Stereotypes and Inequalities in Education
- Assimilation or Inclusion: Social response & responsibility
Unit III: Emerging Pedagogical Constructs

☐ History and Experiences of Diverse Groups
☐ Interrelationship among students, their families, the communities and school
☐ Repositioning Pedagogical Content Knowledge (PCK) for an inclusive setup

Readings

- Billings, G.L. (2006). It is not the Culture of Poverty, it is the Poverty of Culture: The Problem with Teacher Education. Anthropology and Education Quarterly, Vol. 37, No.2, pp104-109

Overview of the Course:

Recent surveys have shown a dismal position of mathematics teaching and learning in the schools of India. There is an earnest need to understand the issues and challenges related to mathematics curriculum in India. The main goal of this course is to help researchers develop an understanding of the school mathematics curriculum in India and at international levels.

The course describes the historical perspectives of the curriculum of mathematics, characterizes its significant periods of trends and changes and thus helps to recognize that mathematics is indeed a changing curriculum. Through this course researchers will be become familiar with the key issues faced by diverse stakeholders concerned with the school mathematics curriculum, including teachers, community, curriculum designers, researchers, assessment developers and policy makers. The course addresses how research has contributed in the development and debates over mathematics curriculum.

Syllabus

Unit I: Development of Mathematical Thinking

Construction of mathematical ideas in students

Mathematical ways of knowing in and out of school

Relationship between teacher, students and curriculum

Unit II: Perspectives, research and debates on school mathematics curricula

Historical perspectives of school mathematics curriculum in India and Internationally

Issues and forces that influence changes in mathematics curriculum

Cognitive and social dimensions in the construction of the school mathematics curriculum

Evaluation of curriculum and testing policies

Unit III: Research on the Issues and challenges at school level

In this section the researchers will study the issues and challenges specific to any one the stages of school mathematics viz the (a) primary stage, (b) elementary stage, (c) higher secondary stage.

List of Readings:

**Gutstein E., Peterson B.(2013). Rethinking Mathematics. Rethinking schools publication**

B-31(Education, Youth & Democracy)  
Dr. Pankaj Arora

Time required: 32 hours (16 meetings)

Unit-1 Democracy  
8 hours

a) Classical democracy: Schools of thought and their critique
b) Critique of Modern Democracy: Liberals, Marxist, deliberative, social and individualist democracy. The European hermeneutic tradition and its critique.

c) Prominent thinkers and their contribution: J.R. Lowell, Dicey, Seeley, Lord Bryce and Hearn Shaw.

Unit-2 Education and Democracy  
8 hours

a) History of Education in India: Special reference to Democracy.

b) Aims of Education for Democracy.

Unit-3 Youth and Democracy  
8 hours

a) Youth in different context: urban and rural, transgender, homosexuals, working children (out of school children), children of Sex workers.

b) National policies and programs related to Youth

c) Youth and Social Networking

d) Youth of Digital Era and Democracy

Unit-4 Democratic concerns and educational intervention:  
8 hours

a) Role of school in providing Democratic education: some case studies.

b) Scope of Citizenship Education.

c) Research trends.

Descriptive note about the Course:

This course intends to provide a space to underline the necessity, the importance and possibility which the study of Youth and Education has in understanding Democratic Education. Democracy is being attacked today from various angles, both by reactionaries and revolutionaries. In the modern world, Democracy is not only a form of government and type of State but it is an order of Society. A democratic Society is one, in which this spirit of equality and fraternity prevails. A democratic Society does not necessarily imply a Democratic State or a Democratic Government. The present world, as a whole, claims to be Democratic in this context. It has been argued that, while Democracy has made great stride in the Social and Political field, it has made very little place in the economic or industrial field. Whether these claims are right or not, we must admit that no Society is entirely Democratic, if it uses democratic methods in some field and autocratic methods in the others.
The Indian Constitution is committed to the goals of Liberty, Equality, Fraternity and Justice. Simultaneously, we must not forget that India is a nation of sharp contrast; the world class rich industrialist’s verses extreme poverty, the highly educated professionals verses the illiterates, the people with world class urban lifestyles verses the tribal communities. The Indian Constitution, in its spirit, gives space for development of each one. However, the varied challenges of Indian democracy continue to prevail including Terrorism, Political and Economic Corruption, Gender discrimination and Social injustice (which are the key issues faced by democratic societies). Under these circumstances, India faces a greater challenge to strengthen democracy and Education with mutual support of the youth. The climate of school life and the dynamics of human relations are potent factors in what students learn about the way of life and the values which direct their interpersonal relations, possibly even greater factors than what the school explicitly teaches about democratic human relations. Learning experiences in educational institutions make or mar the growth of democratic human relations. Since youth is the future citizens and the success of democracy depends on their ability, both youth and democracy are inter-related and inter-dependent.

M.Phil. Course

Social Theory of Education

The main objectives of this course are:

i. To enable the student to recognize the nature and problems of theorizing in education from a social perspective;

ii. To introduce the student to a selection of readings representing the theoretical insights into education derived from historiography, political philosophy, sociology, anthropology and economics. Students will be expected to locate other readings of their interest.

iii. To encourage students to engage with problems of education by using the theoretical approaches introduced in the course.

Apart from the specific readings mentioned in the outline given below, students are expected to read as many titles as they can from the list of books given at the end. The course will proceed with the help of discussion on the assigned readings. Students will be expected to develop their own additional reading lists and bring in ideas from their specific sphere of interest.

Course Outline and Readings

Unit 1: Theory and Metaphor

- 'Metaphors of Educational Discourse': William Taylor
- Allegory of the Cave: Plato
- 'Seed and Earth' (Leela Dube: Anthropological Explorations in Gender)

Unit 2: Construction of Social Reality

- 'The Social Construction of Reality' (Peter L. Berger and Thomas Luckmann)
- 'Sociology for the Educator and Sociology of Education' (Karl Mannheim)
- 'Children and the Past' (from Prejudice and Pride and Litter in Lahore' from Battle for Peace (Krishna Kumar) (Both available in Hindi)

Unit 3: Freedom, Equality and the Individual

- 'The Concept of Equality of Educational Opportunity' (Coleman)
- 'The Subjection of Women' and 'On Liberty' (John Stuart Mill) (Hindi translation by Pragati Saxena)
- 'Individuality and Experience' (John Dewey)
Unit 4: Culture and Ethos

✓ ‘Pedagogizing Knowledge: Studies in Recontextualizing’ (Basil Bernstein)
✓ ‘My Learning’ (Sonia Kadyan; Seminar, 592)

Unit 5: Economics of Modernity

Excerpts from ‘Division of Labour’ (Durkheim)
✓ ‘Post-liberal Democracy? (C.B. Macpherson, Democratic Theory)

Aims of the Course
This course will attempt to study how childhood unfolds when situated in the broader socio-political context of society. The larger aim is to relate this understanding to educational contexts, policy and practice. The notions and conceptualizations of childhood drawn from various disciplinary perspectives, particularly Sociology, Psychology and Childhood Studies will be studied in detail. Reflecting on the spectrum of childhoods that exist and diversity in the experiences of children, the course will build perspective on the universalism-contextualism debate and the singular-multiple childhoods debate that mark the understanding of childhood in India. An important aim of the course is to understand developmental aspects related to childhood and study the implications for early childhood education that stem from them. Understanding the basis of early childhood education and examining curriculum and best practices are also important aims of the course.

Course Objectives:

- Build understanding about the concept and debates related to childhood.
- Examine childhood in the matrix of social structures, processes and relationships, and as a developmental and social construct.
- Build perspective emerging from discourses on childhood, the experiences of children and practices in Early Childhood Education.
- Critically understand, appreciate, situate and plan professional work/research involving children and issues related to early childhood education.

Course Contents
Unit 1: The Institution of Childhood: Historical and Contemporary Constructions
- Perceptions and Definitions:
Perceptions about children and childhood
Socio-cultural and age-stage debates in defining childhood
- Children in History, Literature, Psychology, Philosophy, Anthropology: A Survey through selected excerpts
- The varying concept of childhood: Socio-historical evolution and socio-demographic factors
- Examining developmental processes and trends that mark childhood

Unit 2: Adults, Society and Childhood: Institutional Spaces
- Family, work and productivity
- Educating and schooling children: Socialization, cultural reproduction, Learning, and resistance
- Media, market and global culture: Cultural politics of childhood

Unit 3: Experiences and Life worlds of Children:
- Exploring children’s socio-cultural and emotional worlds
- Interacting with and listening to children
- Representations of Childhood in media and literature

Unit 4: Policy and Practices in Early Childhood Education:
- Child rights and Human Rights
- Policy perspectives, challenges and problems
- Critical Study of select ECCE Programmes

Reading List and Resource Material:

— Reports and Policy Related Documents:
  o FOCUS Report (2006),
  o Learning without burden report (1993),
  o National Curriculum Framework (2005),
  o Probe Revisited
  o UNICEF Reports,
  o ECCE Policy 2013
  o RtE Act 2009, Child Labour Act 1986 and Juvinile Justice Act
CURRICULUM, IDEOLOGY AND AGENCY

Objectives:

The school as an institution is a place of control and domination and also of resistance. This course is specially designed to explore this tension as it plays out in school and to understand the nuanced relationship between curriculum, ideology and agency.

This course tries to cover different arenas like critical pedagogy, ideology, agency and resistance, which directly or indirectly affect the school system. This course explores how the school system acts as a vehicle for reproduction of particularistic ideology (religion, gender, caste etc.). “In schools, dominant classes exercise their power symbolically in the sense that the cultural capital of the dominant classes are reproduced in language, curriculum and pedagogy.” (Scrase T. 1993 pg. - 98). However, there are many spaces within the school system which provide room for teachers and students to exercise their agency. Critical pedagogy is a potent way to apprehend this concept of agency and resistance, as teachers try to problematize the overall nexus of power and hegemony and also include the voices of the marginalized groups in the classroom discourse. This also helps in creating consciousness among the students about their identity and place in society and enables them to question the dominations prevalent in society. Apart from this, students also create “counter school cultures” (Willis, 1977) to exercise their agency. Student’s attitude within and outside the class, their group dynamics, responses to and participation in creative interventions of transformative action where the opportunities arise, give them the agency to counter or resist the dominant ideology of the school.

This course along with field observations would provide an insight into the relation between dominant ideology (caste, class, gender, religion etc.) and the school system and how critical pedagogy could help understand the processes of resistance within a counter school culture.
Readings

Gender Perspective and education: Challenges and Major concerns

Course Work

This course has been designed to enable to study gender issues in education and its relationship with India’s society. Conceptual inquiry is an essential feature of the course. The course attempts to make deep understanding and examine the present status of educational problems, challenges and issues related to transgender people to get education because of their gender identity and the role of society in their poor socio economic and in educational backwardness. This course also give special attention to transgender in gender perspective. The Transgender community is one among the most marginalised and vulnerable communities in India. They face high levels of stigma in almost every sphere of their life such as health, schools/colleges, employment, social schemes and entitlement. Extreme social exclusion diminishes self-esteem and sense of social responsibility. The community needs to be included in the mainstream development program of the country and be protected from all forms of abuse and exploitation.

This course also attempt to examine transgender as marginalized group and to study special major and initiative made by various organization like government bodies, educational institution etc. to give them equal educational opportunity and social status. The readings include all major reports which takes some important decision to make them free and equals to human being without any discrimination.

COURSE CONTENT

Unit I: Key Constructs in Gender
Patriarchy, power, resources and opportunities, sex,
A brief introduction to feminist theories: radical, liberal, psychoanalyst, socialist and Marxist.

Unit II: Social Construction of Gender
Socialization in the family and at school, Occupation and identity (identities largely unavailable to women such as farmer, scientist etc.) stereotypes about girls and women prevalent in the society, media and literature.

Gender and its intersection with poverty, caste, class, religion, disability, and region (rural, urban and tribal areas); essentialized male and female identities and the introduction to third gender.

Unit III: Social psychology of gender roles

• Gender as a social category
• Gender differences and socialisation
• Changing roles and socialisation
• Media and society images of women and transgender
Unit IV: Transgender and gender
- Gender identity: Biology or environment
- Historical roots of transgender in India
- Contexts of transgender—Concepts and theories related to transgender
- Where is Transgender theory stands? Gender or Sexuality

Unit V: Transgender and society
- Analyze Socio-economic status of transgender in Indian society: Their Image in society, Rejection by family, types work doing by them, presence of transgender in public life.
- Transgender and social exclusion
- Transgender and other two genders
- Transgender as marginalized group

Unit VI: Education and transgender
- Transgender educational status
- Major issues and challenges in accessing education
- Problems faced by transgender student in educational institutions
- Transgender issues in higher education

Unit VII: Policy frameworks for gender concerns in education and deprived gender empowerment – A critical perspective
- Concepts, Dimensions and Parameters
- National policies and approach to Five Year Plans
- Different committees and commissions in education set up by the GOI in the post independence period
- Projects, programmes and schemes to bridge gender gaps in education and empowerment

Unit VIII: Gender issues in education and empowerment: PROBLEMS and CHALLENGES
- Socio – cultural perspectives in education with a view to identify issues and concerns in education
- Analytical analysis of gender issues in girls and transgender education across states
- Interventions – both government and non – government organizations to address gender based disparities in education and empowerment - A critical review

Unit IX: Empowerment of Women and transgender through Legal Awareness
- International Conventions
- Laws for work and employment
- Laws for violence against women and transgender

Ph.D. Course
Linguistic diversity, conflicts and marginalization

This doctoral course is designed for the doctoral students who are willing to work in the area of linguistic complexities and marginalization in education.

In India, colonial past ensured that the new nation state inherits domination of English language in all spheres of life be it the administration, academics or professional arena. Electoral politics is, however, an exception where India’s multi lingualism still thrives/dominates. The history of language policy formulation in India, in education and administration, is replete with conflicting opinions/world views, power politics, instrumental policy recommendations and its failures. The linguists, socio linguists in particular, confess that Indian linguistic diversity is simultaneously a huge challenge and an opportunity. The language and identity issues open up another arena of challenge, conflict and contestation. So does the debate on the hierarchy of languages, commonly known as the dialect and the language divide. Generally, there is little or wrong understanding of the evolution of ‘standard languages’ and their organic and historical links with the people’s living languages.

How does education deal with these complexities or it doesn’t do that at all and allow the situation to remain fluid? The elementary level education mandates teaching in mother tongue or regional languages as it is in the national policy based on sound evidence. However, parents and politicians are opposed to this fearing marginalization of their children and loosing voters respectively and emphasize the need for learning English. For higher level liberal and professional education, English is an unstated pre requisite. Given the fact that English proficiency is unequally distributed amongst various states, the states with less person power proficient in English face discrimination leading to marginalization in the professional fields. Also, the rich knowledge that exists and continuously being created in other languages remains marginalized in higher education. The purpose of this course is to build understanding of the language issues in India, language policies in education and as a consequence marginalization of people and their knowledge specifically in higher education due to dominance of English.

The specific objectives of the course are:

- Understanding the linguistic diversity in India including erstwhile languages of knowledge production;
- Language policy and related debates during the pre and post-independence period including the conflicts that ensued with the imposition of the idea of ‘a national’ language;

- Engaging with the discourse on the history, politics and economics of language hierarchy thus understanding the process of marginalization, de legitimization and impoverishment of people’s rich linguistic resources and knowledge;

- Understanding the formal education – school and higher level— policy discourse in India ---its critique and consequences.
- Understanding the equality and inequality debate in education in India to locate this in the context of linguistic hierarchies.

Readings
Agnihotri, Rama and Khanna. ( ). Multilingual Classrooms

August and September.

MATHEMATICS LEARNING, ACHIEVEMENT AND EQUITY
A CRITICAL PERSPECTIVE

Ph.D Course designed for Anchal Arora;  Supervisor: Prof. Anita Rampal

Objectives

In the traditional educational paradigm, knowledge is dominantly viewed as static and absolute in nature and learning as a passive exercise. Given this the curriculum tends to be designed as a collection of ‘facts’ and ‘truths’ and assessment as a means to measure how well these facts are memorized and reproduced. But perspectives that focus on the social, cultural and political dimensions of knowledge and conceptualize learning as a constructive process embedded in the socio-cultural milieu of the learner, contest these absolute notions of “knowledge”, “learning” and “achievement”. In consonance, the assessment process is also located within the socio-cultural context, emphasizing the diversified needs and ways of knowing and learning and a ‘fair’ opportunity to all to express their learning.

This course intends to develop a deeper understanding of the socio-cultural and the socio-political perspectives on mathematics learning, especially to focus on changing notions of achievement and ability, which significantly impact curriculum policies. The course is structured in two parts. The first part aims at understanding the socio-cultural perspectives in mathematics education, with a focus on issues of conflict, power, hierarchy, hegemony and alienation.

The second part of the course aims at critically analysing the dominant notions of mathematical ability and achievement and the contestations put forth by the theoretical frameworks that offer socio-cultural and socio-political perspectives. It will also aim to explore how these notions of ability and achievement need to be re-conceptualized to address concerns like mathematics for all, equity, social justice and fair opportunities to learn and succeed.

List of Essential Readings

Part I - Socio-cultural and Socio-political Perspectives in School Math

Part II - Ability, Achievement and Equity in Mathematics

Supervisor: Anita Rampal
Modernity, Childhood and Education

Course Overview

Conceptions of modernity is deeply implicated in the way we look at childhood and education. The role assigned to schools and teachers in modern societies is intricately linked to the perceptions of childhood, on one hand, and to the role of the state, on the other. Debates on what modernity constitutes, particularly on its universalistic applicability, are relevant to examining the aims to which systems of education are oriented. Of particular importance in this respect is the contrast between the universality associated with reason and the specificity of cultures. The course will initiate students into historical exploration of concepts associated with modernity. The political and cultural underpinnings of these concepts will be explored with the help of appropriate texts. The transition from pre-modern to modern education will be examined in the specific context of South Asia.

Requisite Skills

Successful completion of this course depends on the capacity to engage with texts, hence reading and successive summarizing are essential skills the course demands. Students will be asked to summarise and review all texts they read. Locating embedded references, locating the sources referred to, and reading some of them are important habits the course aims to establish. Students will also be asked to develop good record-keeping habits in the context of what they read and their reflections on it.

Course Outline

Unit 1. Modern discourses of education, teaching and learning

In this first unit, students will engage with certain conceptual issues embedded in modern conceptions of teaching. The first of the three texts they will be required to study justifies the cultivation of rational thinking as a prime aim of education. The second reading surveys several major conceptions of teaching and learning in order
to place Montessori’s thought among them. The third reading attempts to situate teaching in the conflictual setting of the classroom.

1. Dewey ‘Why Reflective Thinking is an Essential Aim of Education’;
2. Krishna Kumar: ‘Relevance of Montessori in the early 21st century’

Unit 2. Modernity in politics and culture:

This unit attempts to locate modernity in a political and cultural context. The readings required in this unit broaden the context in which teaching, childhood and other relevant concepts can be placed for a deeper engagement. Students will study Charles Taylor’s analysis of individualism, instrumental reasoning and the politics associated with these before studying McPherson and Touraine whose analysis of modernity is within specific disciplinary borders.

3. Alain Touraine: ‘Modernity and Cultural Specificities’

Unit 3. Childhood and culture:

This unit directly addresses childhood and the required readings focus on the study of childhood in a broad cultural setting. The first reading has to do with the problems involved in the study of childhood as an academic discipline. The second reading involves the psychoanalytic study of childhood. The third and the fourth readings are attempts to develop innovative approaches to look at childhood in a historical context.

1. Elisabeth M.R. Lomas et al: Science and Patterns of Child Care (entire book)

2. Sudhir Kakar: The Inner World (entire book)
3. Krishna Kumar: *Children and Adults: Reading an Autobiography*

Unit 4. *From Indigenous to modern schools:*

In this unit, students will acquire knowledge about the advent of modernity in education under colonial conditions. The first two readings present studies of teaching and knowledge in the colonial context. The third reading analyses the tension between curriculum and teaching, on one hand, and cultural practices and beliefs, on the other. The last reading focuses on teachers and their role in the context of modernization.

Coursework for Ms. Priyanka Agarwal, Ph.D. scholar at the Dept. of Education, University of Delhi.

Area of Work: Understanding No Detention System in Indian Context.

Theme I: Policy Framework

- Policy Studies and issues in educational administration: Philosophical, ethical, moral and legal basis of policy decisions.
- An in-depth study of various Ordinances related to the universalization of elementary education in India.
- Right to Education Act: A critical analysis of pre & post implementation.

Theme II: Conceptual Framework

- Organisational framework of public education in India and some selected countries.
- The systems approach to educational administration and the study of major theories of educational administration.
Theme III: International Context

- Contemporary issues and trends in educational administration with special reference to the data analysis on malware, stagnation & dropouts.

- Policies related to EFA and non-detention system in schools. Pre & post implementation in Sri Lanka, China, Thailand, and a few others. (Case Studies)

Indigenous Culture and Knowledge: Issues and Challenges
(special reference to tribal education)

This course will enable the scholar to reflect on the important theoretical debates around key concepts like power, state, development, identity, indigenous worldview, scientific worldview etc. It also intends to engage the scholar to link between identity and empowerment (Cummins, 1996) and identity negotiation process (May, 1999). The scholar will be introduced to specific research methods and tools.

**Indigenous cultures:**

- Tribal society: identity and ethnicity, conflict and dissension, integration issues
- Tribal culture: their worldview, beliefs and values, ascribed needs

**Indigenous knowledge:**

- Analysis of system of human knowledge and its repercussion for education – possibilities for resistance and struggle.
- Analysis of disciplinary knowledge and power (Foucault)
- Paulo Freire: concept of dialogue

**Indigenous pedagogy:**

- Ethnopedagogy and liberative pedagogy
- Community knowledge and critical pedagogy
- Approaches to indigenous knowledge and alternative models; local views vs global views; world views of indigenous people.
- Cultural learning and identity formation in tribal children

**Specific research methods:**

- Narrative inquiry (counter-storytelling by tribes), ethnography, qualitative research methods, discourse analysis, case study methods.

Research Coursework

**Geo-literacy: conception, components and challenges**

The scholar will examine the foundation of scientific geography, its paradigms and revolution. This coursework intends to examine the emergence of the conceptual understanding of geo-literacy, and its components in terms of philosophical, sociological, and psychological perspectives. This exercise will help the scholar to build a concrete research framework. The last part of the course will throw light on the specific research tool to conduct this research.

**Geographical knowledge:**

- Historical evolution of geographic knowledge,
- Contemporary conceptualization,
- Perspectives in geography

**Conceptual framework:**

- Graphicacy, spatial literacy, geo-literacy,
- Geographical illiteracy, literacy debates.

**Components of geo-literacy:**

- Reasoning: reason or rationality
- Philosophical orientation: Kant-practical reasoning to Habermas-procedural reasoning
- Psychological orientation: neo-piagetian theories of cognitive development,
- Sociological Orientation: Social construction of geographical knowledge,
- Geographical Reasoning: Spatial thinking and reasoning; thinking *in* space, *about* space and *with* space.
Geographic understanding of Human and natural system:

- Geography of differences
- Geographical Synthesis

Systematic decision making:

- Models of decision making.
- Development of choices in the Social context.

Fostering geoliteracy:

- Role of school and specific skill development.

Specific Research tools and methods:

- Appropriate quantitative and qualitative methods.
- Text analysis techniques of inventory development etc.

Course Work (Ph.D., 2012-13)

For: Garima Aggarwal, Research Scholar
Supervisor: Prof. Poonam Batra

Topic: Discursive co-construction of knowledge and identity

Aim: To develop theoretical insights for the topic and related areas of study.

Rationale

The research envisioned, is an attempt to understand and study conversations in an educative experience be it written, spoken or hidden and see how they impact the identities of students coming from various socio-cultural backgrounds. The course work designed and presented here endeavors to enhance the conceptual and theoretical understanding of the field and related areas. A sound theoretical understanding before going to the field would help not only to decide where, why and how to collect data but also to create meaningful connections between them. The course work presented here has been divided into three units. Each unit deals with one specific area of the topic.

Unit 1: Classroom interaction and its social constructivist nature: The unit explores how dialogue is the key to understand the process of learning. The attempt is to understand how and in what manner a learner and an educator both refer to their previous communicative or non-communicative constructions while interacting. This will further help to understand historicity of language as well as its connections to societal patterns. The list of the concepts and issues to be explored and studied under this unit would include the following: Social construction of reality and Social constructivist nature of learning; situated learning; cognitive development in social context, apprenticeship in thinking; role of talk in learning; development of shared understanding amongst learners; reading Bakhtin; understanding concepts of ‘dialogism, heteroglossia,
polyglossia, and speech genres’ and how they further develop the theory of Vygotsky talking about social constructivist nature of learning; mapping the social world of children’s’ learning.

Unit 2: Studying the ‘discursive construction’ of these interactions and mapping their effects on social change: Discourse as a methodology as well as a theoretical framework will be studied with the help of some core theorists such as Fairclough, Foucault, Teun A. Van Dijk and Ruth Wodak. A critical analysis will be done for the same. This will help the researcher to map out the research design. The latter part of this unit explores the link between discursive constructions inside a classroom and its effect on social change. The key concepts and theories are given here: Understanding the relation between language, power and politics; reading Pierre Bourdieu to understand how language is both constructive and constitutive in nature, production and reproduction of legitimacy through language; understanding the difference between the terms ‘discourse analysis’ and ‘discourse studies’, studying ‘discourse’ as a construct; mapping the historical development of the concept of discourse and understanding its inter-disciplinary nature (from the field of anthropology, linguistics, pragmatics, semiotics and ethnomethodology); exploring the concept of critical discourse analysis, and its major approaches: Norman Fairclough: Discourse as social practice; Teun A. Van Dijk: A socio cognitive model; Ruth Wodak: Sociological and historical approach to critical discourse analysis.

Unit 3: construction of socio-cultural identity of students: The unit will explore how students construct and re-construct their socio-cultural identities during interactions. The attempts will also be to study the struggle in construction of this identity in terms of ‘recognition’ inside the classroom. Recognition, at its simplistic level, is the act of acknowledging others, and coming to be acknowledged by others. The premise here is that how others understand us is central to construction of our identity. It is therefore important to understand how students negotiate these
socio-cultural constructions during interactions. The key constructs to be explored in this unit are: Construction and re-construction of the socio-cultural identity of students; recognition and struggle of their socio-cultural identity; reading Charles Taylor to understand concepts of ‘modern notion of dignity, concept of authenticity of identity, its dialogical nature, and the politics of difference’; contextualizing these concepts in education and understanding how different processes in schools actually affirm this politics of difference, further impacting adversely on students’ construction of identity: reading Charles Bingham, Sonia Nieto, Andrew Pollard and Jenlick and Townes.

Ph.D Course-work
Scholar : Shailendra Kumar (Provisionally admitted in August 2013)

Science Education: Theoretical and Research Perspectives

Course Objectives
• The course would facilitate the scholar in developing an indepth understanding about the nature of science and thereby the philosophical, psychological and sociological perspectives and how they influence the learning contexts in science education.
• The course would provide inputs for sensitization towards the socio-cultural, ethical, gender and inclusion related issues in science education.
• The course would help the scholar in getting oriented towards the reflective and research perspectives in science education.

Unit One: Nature of Science and Contexts in Science Education

Unit Two: Research Perspectives in Science Education

COURSE WORK

Name of the candidate: Vipin Solanki
Date of Registration: 01.10.2013
Supervisor: Dr. Manju Agarwal

Course work approved in DRC/BRC (Ed.) meetings held on ______/_______

Title: "विधेयक, विश्वास एवं नियमितीयता (सामाजिक) के लिए विद्याई और एकता आदि का प्रयोग"

1. A-3 (Descriptive Research)

2.

- The Equality: Socio-economic dimensions of equality. The contemporary debate.
  
  Study of social structures: Indian context

- The Marginalized Sections of population: SC, ST, OBC and other marginalized groups. Their demographic and socio-economic status.

- Reservation: The educational discourse. Role and functions of education. The quality concerns.
  
  The genesis of the policy and its evolution.

- The Constitutional basis/Context of reservation. The philosophy and the spirit of the constitution.

  The articles related to reservation. The inherent conflict and the debate. Explanations, Interpretations and Amendments.

  More areas related to the study are likely to be added as the study proceeds.

PROFORMA FOR COURSE WORK

Name of the candidate : Sh. Saija, Cheures

Date of Registration : 04-June-2013

Supervisor : Dr. C.K. Solaj

Course work approved in DRC/BRS (Edu.) meetings held on ____________

अध्ययन के अधिकार का उद्देश्य (1906-2014)

Course Work Detail

- सामाजिक, आर्थिक, राजनीतिक परिस्थितियों में
- विशेष (Legal) परिस्थिति, विशेष आधारित सामग्री
- अध्ययन के रूप में

- विषयों के अनुसार
- विषयों के अनुसार
- विषयों के अनुसार

- भारतीय संविधान में पूर्व, स्वर्ग : आधी-अधीन और सेक्साइज़ी
- शीर्ष में विभिन्न विचार अध्यापित : अध्ययन सामग्री, लाइटरेशीं, संदर्भ में
- अध्ययन का उद्देश्य
- क्या है तो?
1. Descriptive Research (A-3)

2. Customised Course Designed: Art Education

-The role of art in education and theories underlying this role.
- The function of art as educative experience.
- The unique contribution art makes to education.
- Concepts of what art is or should be.

-Significance of self identification through art.
- Self identification of the teacher with the needs of the child.
- Self identification of child with his art experience, art medium and subject matter.
- Self identification of child with work of art for appreciation.

- Developmental stages in children's art.

-Problems and issues in Art Education since 1990 in schools in India.

Reading List
- Keiller, "The Art In Teaching Art" University of Nebraska Press, Lincoln, 1951.

Specially Designed Pre-Ph.D. Course

Sexuality, Society and School

Objectives:
The need to educate young people on the theme of ‘Sexuality’ is felt world over. With a view to exploring the dimensions of various national and international debates, this course is specially designed to equip the researcher with the detailed understanding of the corpus of work available in the area of study, so that the interrelationships between Sexuality, Society and School can be established ‘critically’ and methodologically.

The course covers a wide range of debates around the areas of societal dynamics, patriarchy, identity, sexuality, dialogue, speech and silence, critical pedagogy, etc. It explores how relations of power (class, gender, language, sexual orientation, age) and inequality (social, cultural and economic) are structured in education, where the operational hierarchal forces silence the voices of the weak, limit the agency of the subaltern, and promote strong hegemonic control (Apple, Au and Gandin, 2009). Anything which is ‘non-threatening’ to this established system of power and hegemony is considered to be ‘normal’ and thus, permitted. By itself, sexuality is a rocky terrain to traverse, but in the complex Indian social and cultural milieu, it is ‘abnormal’ to be speaking about it given people’s sensitivities, stigmatisation associated with the topic, dearth of availability of suitable educational material, patriarchal displeasure, etc. When sexuality is viewed in such moralistic binary terms of right and wrong or comes veiled behind euphemistic terms like ‘Life skills’, or the ‘official discourses’ on the topic are limited to instrumentalist dealings in biology and anatomy, it becomes a challenge to engage in a ‘dialogue’ around one’s sexual fears, pleasures and desires, which are essential to personal development and by implication, societal (Trimble, 2009; Das, 2014). So the idea of having a healthy sexual identity, emotions and subjectivity becomes suspect. There is a global demand for an inclusive, non-judgemental and holistic approach to sexuality in education, working towards the ‘empowerment’ of youth. So, within the Indian socio-political-cultural climate, one needs to ‘unlearn’, question and challenge one’s own assumptions of who our youth are and what they need in this time and age, while challenging the strongholds of hegemony and power.

At the heart of the course also lie discussions on the indifference to women, a question deeply rooted in the debates on ‘gender’ and its societal ‘cultural interpretation’ (Butler, 2006). There is a control over the woman’s body and sexuality, which instead of celebrating her as an equal, thinking and feeling being, outside the frame of the biological make up that has historically been defining her through cycles of ‘subversive repetitions’, builds a ‘compelling illusion’ of her identity of convenience, mostly for the purpose of extending the tentacles of patriarchy.
The course offers insights into societal, classed, raced, gendered and sexed practices and the cultural struggles against dominations, those for identity and autonomy, to transform the researcher’s understanding of what counts as ‘official’ or legitimate knowledge and who holds it, only to superimpose it in the Indian context, specifically in the area of School and Sexuality (Apple, Au, Gandin, 2009).

List of Readings:

Introduction:

This course work is planned for the Ph.D. scholars Ms. Reetu Yadav and Mr. Vishwas. Planned in two sections, the course aims at elaborate, student participatory discussions on the following themes.

A reading list has been proposed to initiate the process of deliberations.

Inclusion: Pedagogic Opportunities and Challenges

Section I: Developing a Theoretical Overview

~ Understanding Stereotypes and Inequalities in Education
~ Assimilation or Inclusion: Social response & responsibility
~ Advocacy and Systemic action: A critical analysis of educational policies
~ Examining the curricular framework/s: How Inclusive are they?

Section III: Teaching to Teach: Call for Revamping Teacher Education Programs

~ Reinventing Pedagogical Content Knowledge (PCK) for an inclusive setup
~ Teacher Preparation Programs: What exactly do they need to do?

Understanding Modernity: Historical and Contemporary Perspectives

Aim

To understand the idea of modernity as a construct and as inter-disciplinary study.
To understand modernity in the Indian historical and contemporary context.
To examine the relationship between modernity and education.

Units of Study

Unit 1: Modernity in the historical frame of colonial experiences; modernity as a sociological and cultural construct and as situated in India’s plural context.

Unit 2: Empirical understanding of modernity across diverse cultures: modernity as a rural and urban phenomenon.

Unit 3: Understanding modernity in contemporary Indian society; modernity and education; modernity and culture.

Reading English in the Secondary School

Rationale: This independent course is planned for doctoral students who are working on reading in English at the Secondary level. One of the reasons why children aspire to learn English in India (apart from the definite prestige associated with it) is that it is considered to be a language of access to various forms of knowledge, e.g., in science. However, there is a large variability in their competence of English. Children go to different medium schools (English and other Indian languages) and that too impacts their exposure and competence in English. Added to this is the issue of reading higher level texts and its comprehension in India. This course focuses on both the processes of reading extended texts in multiple subjects including literature and issues related to reading in the first and second language; and bilingualism in India.

Section One: Extending literacy in Secondary School

1. Comprehension in the Content Area
   Comprehension theories: Schema-theoretic view in Reading Comprehension.
   Implications for instruction
   Metacognition and strategic reading: Purpose for reading, strategies for reading, monitoring comprehension. Study skills.
   Vocabulary and comprehension
   Instructional and research implications
   Text Structure: analyzing text structures and effect of text structure on comprehension.

11. Response to Literature:
   Transactional theory
   Aesthetic and efferent reading.
   Factors affecting response to literature
   Assessing response to literature

III. Writing
   Writing across the curriculum
   Writing Process Approach
   Writing as reflection.
   Reading Writing Connections

Section Two: Reading English in India
I. Reading in the Second Language (English)
Communicative approaches to Second Language Acquisition and Extending
Communicative approaches into literacy
Reading and the Bilingual student
Reading Experiences in multilingual classrooms
Content Instruction for English Language learners

2. English in the Indian Context:
   Historical Background of English in Indian education
   English in different types of schools
   Indian English

Towards Interpretation of Adolescent Hindi Literature

Unit 1- Reading and Responding to literature

- Literary theory and Adolescent literature
- Understanding the process of meaning making
- Literary interpretation and appreciation
- Assessing response to literature

Unit 2- Understanding Diversity

- socio – cultural diversity
- Diversity in classroom – multilingual, multicultural
- Diversity in content of literature

Unit 3 –Adolescent literature in Hindi

- Popular trends in adolescent literature
- Reading and interpreting adolescent literature
- Issues of representation - class, gender, cultural differences, identity etc.
- Differences in interpreting children’s literary texts – constructing multiple subjectivities and identities

Understanding Inclusion: Emerging Trends and Challenges

Course outline and reading

- A brief history of Discrimination and Exclusion: Exploring Hierarchy, Status and power System
- History and Experiences of Diverse Groups: Negotiating Attitudes, Dispelling biases, Challenging Stereotypes
- Assimilation or Inclusion: Social response & responsibility
- Intersecting Inequalities: Developing a context for collective action and individual mobility
- Ability/inability Paradox: Repositioning the Question of Competence
- Understanding Stereotypes and Inequalities in Education: The Philosophical, Sociological Historical and Political foundations of Inclusion
- Concept and processes of social and educational opportunities: Interrelationship among students, their families, the communities and school
- Methodological debates and Challenges with specific reference to research in Inclusion
