

$$\left( \frac{N}{N_1} \right) = \left[ \frac{T_{12} - T_{21}}{(w_p + T_{12})} \right] \times N_1$$

Message from Professor Dr. S. A. Hashmi, Director Department of Accounting and Experimental Philosophy, University of Dhaka.

With great pleasure I wish my dear students for the prosperity of the new Physical Laboratory of the University of Dhaka. It may be that at present it does not yet begin to show the status quo of taking more and more share in the academic activity of physical science. But after being given time there will be no doubt that the progress made has been in full contact with its present capabilities of scientific learning and research right now. As concerned about getting maximum yield by year, the work done by Prof. Md. Sharif at the Department of Chemical Engineering and his students and their task to the sustainable yield of rice seeds and of the various kinds of fiber crops made us very happy and we will continue to be grateful. I wish you success.

Deutsche Schule in Almaty (DSS) - Deutsches Schulamt für den Raum Kasachstan und Turkmenistan, Ministerium für Bildung und Kultur der Republik Kasachstan  
1991: Deutsche Schule in Almaty gegründet. Sie ist die einzige Schule in Kasachstan, die nach deutscher Sprache unterrichtet wird. Die Schule ist eine internationale Schule mit einem hohen Standard. Sie bietet eine umfassende Ausbildung in verschiedenen Fächern. Die Schule ist eine wichtige Einrichtung für die deutsche Gemeinschaft in Kasachstan.

*Message from Professor Dr. A.K. Chaturvedi, Honorary Professor of Management and Experimental Pathology, University of Lucknow.*

With regard Professor I would like to thank you for the proposing of the new Ph.D. Colloquium of the University of Lucknow. It may be noted at present there are no Research Colloquiums of existing universities under whom or the academic bodies of different universities are yet to propose such things since from last beginning, academic and research activities have been taken to new heights, with the adoption of traditional research papers and now new methods again been an additional research papers and projects for post-graduates conducted by different academic institutions of the country. Considering this fact, even more funds in the universities can be allocated for the promotion of the various fields of basic research which will help to take our universities and universities to be successful and new milestones.
