Summer Programs

The department organizes a "Summer Program for BSc students" periodically. This was a culmination of a dialogue process between BSc students and the faculty, where students strived to utilize the summer time for broadening their subject base, by way of internships or any relevant interactive exposure. Thus came about this summer program idea. The previous program was a 4 weeks holistic experience for the students. It had 36 lecture sessions of 1 hour 15 minutes each, followed by discussions. It also had 10 hands-on sessions of three hours each, which included electronic circuitry, computer programming, software and mathematical skills. There were 4 Laboratory demos. and two movie sessions. The students were encouraged for writing small scientific reports. Moreover, they were given time in the documentation center for popular reading, analysis and presentation. Interesting and thought provoking presentations were given by the students on various aspects of Physics like principle of least action, arrow of time, laser for moving and so on. Prof. D. Kanjilal, Director Inter University Accelerator Center (IUAC) presided over the valedictory function and
