<b>Proposed theme and scope of research for M.Phil./Ph.D.</b>						
CITATION ANALYSIS OF DOCTORAL THESES AWARDED BY THE ENERGY AND RESOURCES INSTITUTE (TERI): A BIBLIOMETRIC STUDY						
<b>Major writings in the field in which you would like to pursue your M.Phil./Ph.D.</b>						
<b>MAJOR WRITINGS</b> Citation analysis is an indirect method to assess the information/sources used by various categories of users. Citation analysis is a worthwhile area of research and refers to references in one text to another text, with information on where that text can be found. Citation analysis is useful for understanding subject relationships, authorship pattern, impact, publication trends, and so on. With citation analysis one can evaluate and interpret citations received by articles, authors, institutions, and other indications of scientific activity. Citation analysis is a major area of bibliometric research, which uses various methods of citation analysis to establish relationships between authors or their work. This research activity will help in examining the research output in the field of The Energy and Resources Institute (TERI). This study will help researchers to know the research trends in these fields energy, environment and sustainable development. Researchers will also come to know about the growth of literature, authorship pattern, most productive authors and journal, fundamental laws of bibliometrics. Through the literature survey it has been noticed that none of the study has been undertaken on the selected topic therefore the proposed research is worthy for consideration of PhD research.						
<b>Primary sources/field work, methodology, hypothesis/research, questions and issues in the proposed field of interest.</b>						
<b>CITATION ANALYSIS OF DOCTORAL THESES AWARDED BY THE ENERGY AND RESOURCES INSTITUTE (TERI): A BIBLIOMETRIC STUDY</b>  SYNOPSIS SUBMITTED TO THE UNIVRSITY OF DELHI FOR THE ADMISSION IN DOCTOR OF PHILOSOPHY IN LIBRARY AND INFORMATION SCIENCE By						

## 1.1 INTRODUCTION

Citation analysis is an indirect method to assess the information/sources used by various categories of users. Citation analysis is a worthwhile area of research and refers to references in one text to another text, with information on where that text can be found. Citation analysis is useful for understanding subject relationships, authorship pattern, impact, publication trends, and so on. With citation analysis one can evaluate and interpret citations received by articles, authors, institutions, and other indications of scientific activity. Citation analysis is a major area of bibliometric research, which uses various methods of citation analysis to establish relationships between authors or their work.(490-91)

## 1.2.STATEMENT OF THE PROBLEM

This research activity will help in examining the research output in the field of The Energy and Resources Institute (TERI). This study will help researchers to know the research trends in these fields energy, environment and sustainable development. Researchers will also come to know about the growth of literature, authorship pattern, most productive authors and journal, fundamental laws of bibliometrics. Through the literature survey it has been noticed that none of the study has been undertaken on the selected topic therefore the proposed research is worthy for consideration of PhD research.

## 1.3 REVIEW OF RELATED LITERATURE

Bandyopadhyay ([http://search.proquest.com/indexinglinkhandler/sng/au/Bandyopadhyay,+A+K/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Bandyopadhyay,+A+K/$N?accountid=10461)) and Nandi reported results of a citation analysis study of nine doctoral dissertations in political science submitted to the Burdwan University (West Bengal) from 1991-1995. They discussed the bibliographic forms of literature used and presents a ranked list of periodicals and normalized ranking of periodicals with corrected citation numbers according to Sengupta's formula. They concluded that the most favoured form (56.2 per cent) of literature is the book, followed by periodicals (20.2 per cent). Out of the total, 29 periodicals are used to satisfy 80 per cent of periodical requirements and 7 periodicals satisfy 80 per cent of such requirements. The most highly ranked periodical was Economic and Political Weekly, covering over 20 per cent of periodical requirements.(192-200)

Deshpande, M., and D. Rajyalakshmi. "Citation Study of Dissertations in Library and Information Science." *Annals of Library Science and Documentation* 44.2 (1997): 41-53. Print.

Deshpande ([http://search.proquest.com/indexinglinkhandler/sng/au/Deshpande,+M/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Deshpande,+M/$N?accountid=10461)) and Rajyalakshmi ([http://search.proquest.com/indexinglinkhandler/sng/au/Rajyalakshmi,+D/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Rajyalakshmi,+D/$N?accountid=10461)) studied 65 dissertations in library and information science, submitted to Nagpur University during the period 1990 to 1994 revealed that the majority of the works are in the field of literature survey and trends in various aspects of library and information science. Citation analyses have been carried out to find the types of cited source materials, subject distribution, authorship pattern and chronological distribution of cited references. The ranked list of periodicals indicates that the *Annals of Library Science and Documentation* is the most cited.(41-53)

Zainab ([http://search.proquest.com/indexinglinkhandler/sng/au/Zainab,+A+N/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Zainab,+A+N/$N?accountid=10461)) and Goi ([http://search.proquest.com/indexinglinkhandler/sng/au/Goi,+S+S/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Goi,+S+S/$N?accountid=10461)) reported results of a citation analysis of 5610 citations from 104 master's degrees and doctoral dissertations submitted to Malaya University between 1984 and 1994 in the humanities (religion and philosophy, history, language and literature). The aim was to examine the use of information sources by postgraduate research students as reflected by the references they cite. Presents the results in terms average number of references and types of literature; core authors; identifiable authorship patterns; whether the spread of periodical titles follows Bradford's Law of Scatter; most frequently cited monograph titles; age span of the literature used; language and geographical distribution of materials; and whether documents used fall within similar discipline areas or extend over other disciplines.(19-36)

Devarajan ([http://search.proquest.com/indexinglinkhandler/sng/au/Devarajan,+G/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Devarajan,+G/$N?accountid=10461)) and Vijayalekshmy ([http://search.proquest.com/indexinglinkhandler/sng/au/Vijayalekshmy,+V/\\$N?accountid=10461](http://search.proquest.com/indexinglinkhandler/sng/au/Vijayalekshmy,+V/$N?accountid=10461)) focused on the dissertations prepared in partial fulfilment of the course leading to M.Phil Degree in applied economics conducted in the Centre for Developments Studies Trivandrum. This course is affiliated to, and the degree is awarded by, the Jawaharlal Nehru University, Delhi. They examined the use pattern of source materials based on citations in dissertations.(N.P.)

Gohain and Mahesh study based on 10,983 citations, appended in the 30 PhD theses of chemical sciences submitted to Tezpur University, Assam for the award of doctoral degree during the period 2008-2012. The main purpose of this study was to investigate authorship pattern of the citations, type and form of literature cited, and compiled a rank list of core journals in chemical sciences. The study revealed that journals were the most preferred sources of information used by the researchers in the field of chemical sciences accounting for 78.83% of total citations, followed by books

with 15.57% citations. Authorship pattern for journal citations shows that most of the citations were contributed by more three authors that mean the collaborative research is prevailing in chemical sciences. The findings of the study revealed that out of the total number of 8,658 journal citation, 39.89% are by more than three authors, followed by two authors with 22.28%. (1-13)

Mubeen reported that results of a citation analysis of 22 PhD theses in chemistry submitted to Mangalore University, India, since its inception, to study the information use pattern of researchers. The study identified 60 core periodicals, out of a total 418, referred to by researchers. The application of Bradford's Law of Scatter reveals an exponential trend and the Bradford multiplier is seen to observe a geometric series pattern.(48-58)

Singh and Bebi presented citation analysis of PhD theses submitted in the discipline of sociology of the University of Delhi during 1995-2010. The study is based on the 5766 citations taken out from 25 PhD theses of sociology. The study presents analysis of several parameters like authorship pattern, forms of literature, country-wise scattering of citations, distribution of Indian and foreign citations and a ranked list of top 30 cited sociology journals. The study finds that highest number of citations was single authored (83.94 %), and 67.23 % citations were from books and only 22.20 % citations were from journals. The country-wise scattering of citations reveals that 2536 (45.52 %) citations were from India and it was followed by USA and UK.(N.P.)

Banateppanvar, Biradar, and Kannappanavar determined the materials cited in doctoral theses of botany, submitted to the Kuvempu University during the years 2000-2006, with the aim of improving the existing collection development of the library. The study employed descriptive research design. Theses submitted for the award of Doctoral degree from 2000 to 2006 to the Department of Botany, Kuvempu University were examined. The population of the study was all the theses submitted during the periods under study. Data were extracted from title page and references given at the end of each chapter. Extracted data were analysed using statistics. Findings - The study reveals that journals are the most preferred sources of information used by the researchers in the field of botany, accounting for 74.77 per cent of total citations, although citations from books, proceedings, theses, reports and patents are also found. It is also observed those researchers are not taking much advantage of internet resources. The journal Plant Cell, Tissue and Organ Culture (USA) was ranked the first, with 158 citations, accounting for 7.57 per cent of the total journal citations. Further, Bradford's law of scattering was applied. It is observed that major citations come from journal literature. In addition, more cited materials were contributed by multi authors and degree of collaboration is 0.75. They presented a sense of the importance of botany research, and as such informs that community, as well as researchers involved in citation analysis. The outcome of the study is an original research work with citation analysis of doctoral theses in botany. It highlights the information materials available and used by researchers of the Botany Department for their research work and those which need to be added for a healthy collection.(12-21)

#### **1.4.OBJECTIVES OF THE STUDY**

The main purpose of the study will be the citation analysis of doctoral theses awarded by The Energy and Resources Institute (TERI).

##### **The objectives of the study are to:**

- (i) Examine the co-authorship pattern;
- (ii) Analyze the chronological distribution of citations;
- (iii) Study the applicability of Bradford's law;
- (iv) Study the applicability of Lotka's law;
- (v) Study the applicability of Zipf's law;
- (vi) Analyze the half-life of citations;
- (vii) Study the principal form of literature used by the researchers;
- (viii) Study the country wise scattering of citations;
- (ix) Study the distribution of citations according to city of publication;
- (x) Identify the leading publishers;
- (xi) Determine the age of distribution of literature used by researchers;
- (xii) Prepare a list of core journals in energy, environment and sustainable development;
- (xiii) Study the authorship pattern of cited references; and
- (xiv) Know the ratio of cited Indian author citations to foreign author citations used by researchers.

#### **1.5. FORMULATION OF HYPOTHESIS (TENTATIVE)**

Keeping in view the objectives and scope of the study the following hypothesis has been framed:

- (i) Indian authors mostly use foreign literature;
- (ii) Citation pattern indicates the preference of journals by authors;
- (iii) Bradford's law of scattering is applicable to the present study;

- (iv) Lotka's law is applicable to the present study;and  
 (v) Zipf's law is applicable to the present study.

### 1.6. SCOPE OF THE STUDY

The study is intended to analyze the citations appended to doctoral theses awarded by The Energy and Resources Institute (TERI).

### 1.7. RESEARCH METHODOLOGY

The data will be collected from the references available on the doctoral theses awarded by The Energy and Resources Institute (TERI). After collecting data, it will be fed into the computer using MS-Excel and SPSS. Then the collected data will be analyzed in depth by using statistical techniques to calculate various factors according to the set objectives of the study. Pattern given in MLA cited style: Handbook for writer of research papers, 7<sup>th</sup> edition will be used for citations and other bibliographic work.

### 1.8. CHAPTERISATION (TENTATIVE)

Chapter 1: Introduction

Chapter 2: Review of Related Literature

Chapter 3: Citation Analysis: An Overview

Chapter 4: Energy, Environment and Sustainable Development: An Overview

Chapter 5: Data Analysis and Interpretation

Chapter 6: Findings, Test of Hypotheses, Suggestions, Areas of Further Research and Conclusion.

### Primary sources/field work, methodology, hypothesis/research, questions and issues in the proposed field of interest.

#### Introduction:

The main aim of any library and documentation centre is to satisfy the information needs of users within limited resources. For judicious selection librarian usually adopts various acceptable techniques or tools. Scientometrics study is one such universally acceptable tool or technique. It helps in determining the major forms of reading materials such as periodicals, textbooks, manuals, handbooks etc. Scientometrics or bibliometric studies have been conducted in almost all disciplines. Historically, bibliometrics was the result from statistical studies of bibliographies. Allan Pritchard used the term bibliometrics for the first time in 1969, where he exploited computer techniques to update scientific bibliographies. In the present context, bibliometrics is a type of research method used in the library and information science for measuring the production and dissemination of different branches of human knowledge, particularly scientific knowledge. So, bibliometric analysis has now become a well-established subject of information research for the librarians and other information professionals. It utilizes quantitative analysis and statistics to describe patterns of publication within a given field of literature. Such studies have been in practice since the beginning of 20th century.

Microbiologists study the tiny life forms. The major groups of microbes are bacteria, viruses, fungi, algae, and protozoa. Microbiology is not a single subject. It has many areas of specialization. However, it is a science based on the use of pure cultures looking at one sort of organism at a time. Many of the techniques developed by microbiologists are now used in molecular and cell biology to provide the basis for studying higher organisms. Immunology is study of all aspects of the immune system including its structure and functional disorders of the immune system, blood banking, immunization, and organ transplantation. A number of universities and colleges are offering courses at BSc and MSc level in microbiology as well as facilities for doctoral research. Besides universities and colleges, a number of research institutes are engaged in R&D work in this area. Immunology as a subject of study is also concentrated in medical colleges and few universities and is also taught as a part of medical degrees. A number of research institutes, which are part of CSIR, ICMR, DBT, and DST also focus their R&D work in this area.

**Scope:**

With the increasing importance of evaluative bibliometrics in the world of scholarship, the issue of authorship pattern, citation behavior and determination of influencing factors is becoming particularly relevant and topical. The study will examine India's performance based on its publication output in Immunology and Microbiology during the last five years, based on several parameters, including the country's annual average growth rate, global publications share and rank, institutional profile of select top institutions, international collaboration profile and major collaborative partners, patterns of communication in national and international journals, and characteristics of their most productive authors. The study will use 5 years of publications data in immunology and microbiology drawn from Scopus international multidisciplinary bibliographical database.

**Objectives:**

The main objective of the study is to examine scientometrically the total articles published in the field of Immunology and Microbiology during the last five years. The specific objectives of the study were: -

- To study the Indian research output, its growth, rank and global publications share and citation impact;
- To study the patterns of international collaboration and identification of major collaborators;
- To determine scientific productivity of India in terms of Authorship pattern, Collaboration Pattern and type of contribution;
- To study the publications productivity and impact of leading institutions and authors of India and;
- To develop a rank list of journals on the subject;
- To analyze the citation pattern to measure the effectiveness of the articles in the top Indian & International journal;
- To study the Keyword Distribution.

**Hypothesis**

A sample study will be carried out to frame the hypothesis and research design. On the basis of sample study carried out for the MLISc Project Report, the following hypotheses were developed in the present study so far:

- India has the largest number of collaborations with the United States in the subject area understudy.
- The majority of the contributions are in the form of Articles, followed by Reviews.
- The Indian universities and colleges, conducting doctoral research, have higher contribution than research Institutes and government-funded labs.
- Female contributors are lesser than men contributors.
- Keywords distribution shows the interdisciplinary nature of the area under consideration.
- The Authorship contribution would follow the Lotka's Law.
- Keywords distribution would be according to Zipf's law.

**Methodology**

- The study will use Scopus database to extract relevant data on Immunology and Microbiology research in India and other most productive countries for the past five years (2013-17).
- An advanced search strategy involving on Immunology and Microbiology research as the keyword will be used to search and download data.
- In this analysis, all types of items will be included that are covered in the databases.
- In addition, the study will use citations data for measuring quality and visibility of Indian research output.
- Further to interpret the data collected and present it in the form of graphs and figure MS Excel or similar software will be used.

**Past Research Experience, Publications**

1. MLISC Project Report on " Indian Contribution in Immunology and Microbiology 2012-2016: A Scientometric Study" under the supervision of Dr. Shailendra Kumar (Jan 2017- June 2017), University of Delhi.
2. M.Sc. Dissertation Thesis on "MLST of Group B streptococcus" under the supervision of Atul Johri (Jan 2014- June 2014), Jawaharlal Nehru University.

**Additional Information**

Conducted literature reviews and compiled bibliographies during project reports as part of BLISc and MLISc degree program in Delhi University

## Primary sources/field work, methodology, hypothesis/research, questions and issues in the proposed field of interest.

### 1.1 INTRODUCTION

Information is very important in today's academic scenario for upliftment and building of a nation. Information seeking behavior encompasses information seeking as well as the totality of other unintentional behaviors as well as purposive behaviors that do not involve seeking. In the case of academicians, researchers and students, information seeking is even more important as they seek information to fill the gap in the knowledge domain of the people working in that particular field and for the overall growth and development that field. As Wilson describes Information seeking as a term which describes the ways individuals seek, evaluate, select, and use information. In the course of seeking new information, the individual may interact with different people, analog tools, and computer-based information systems. This study revolves around the information usage, pattern and seeking behavior of faculty and research scholars working in Central Universities of Delhi.

### 1.2 PURPOSE OF THE STUDY

The purpose of the study is to answer the following questions:

- What are the information needs and information-seeking behavior of the teaching and research community?
- What sources and channels are used, how and why are they used?
- What kinds of informal methods are used of acquiring information are used?
- What is the users' response towards new technological advancement in seeking process?
- What study places are preferred by the faculty members?
- What are the factors that influence or shape their information needs and information-seeking behaviour?
- What barriers do they encounter with regard to their information needs and information searching behaviour?
- How do users meet their information needs?
- How are these information needs presently being satisfied by the library?

### 1.3 SCOPE OF THE STUDY

The scope of the study is limited to the various inter-disciplinary research conducting departments of the following Central Universities in Delhi:

1. University of Delhi
2. Jawaharlal Nehru University
3. Indira Gandhi National Open University
4. Jamia Millia Islamia
5. South Asian University

### 1.4 METHODOLOGY

Questionnaire Method will be used for the collection of data from the research scholars and faculty members of various departments of the above selected Central Universities. The data will be processed through IBM SPSS software to get the results and accompanying graphs/pie-charts etc.

## Past Research Experience, Publications

1. Carried out the **M.Li.Sc. Dissertation Project** on "Marketing of Library and Information Products and Services in Selected Medical Libraries in Delhi : A Case Study" under the supervision of Dr. R.K.Bhatt, Associate Professor, University of Delhi.
2. **Six months masters' dissertation** in Institute of Genomics and Integrative Biology (IGIB), CSIR, under the supervision of Dr. Archana Singh and Dr. Binuja Verma on "Analysis of Filaggrin gene variation in different disease phenotypes" from 1<sup>st</sup> January 2014 to 30<sup>th</sup> June 2014. The project was divided into two main objectives. One was to perform the standardization of the filaggrin gene by experiment in the laboratory which could then further be send for sequencing if time permitted and other included data mining of the gene using R-programming as well as manually in various genomic and phenomic databases, for instances, OMIM, GWAS, ENCODE, PHENGENI, and thus compiled the results and reported the interpretations.
3. **One month summer internship** at Plant Pathology, Virology Department, Indian Agriculture Research Institute, Pusa, Delhi from 19<sup>th</sup> June 2013 to 20<sup>th</sup> July 2013 under the guidance of emeritus scientist Dr. Malathi. We studied the dimerisation and Dolichos yellow mosaic virus of DNA A and DNA B.

## Additional Information

Attended the following conferences/seminars/workshops: 1. International Conference on Digital Libraries (ICDL) 2016, "Smart Future: Knowledge trends that will change the world", December 13-16, 2016, New Delhi, India at India Habitat Center, Lodhi Road, Delhi- 110003. 2. "The Environment: Challenges and Opportunities of E-Resources Discussion" organized by United Nations Information Center for India and Bhutan National Social Science Documentation Center (ICSSR) and Delhi Library Association on 16th September 2016 at UN Information Center for India and Bhutan, Lodhi Estate, Delhi. 3. 18th International Symposium on Electronic Theses and Dissertations (ETD) "Evolving genre of ETD for Knowledge Discovery", November 4-6, 2015, New Delhi, India, at Jawaharlal Nehru University, Delhi-110067. 4. "Cyber Security Workshop for LIS and IT Professionals", August 31, 2015 at DELNET, New Delhi. 5. 7th Annual Convention of ABAP and International Conference on "Plant Biotechnology, Molecular Medicine and Human", October 18-20, 2013 at Department of Genetics, University of Delhi, South Delhi, New Delhi-110021. Academic Achievements: 1. Secured second position in class with first division in Bachelors of Library and Information Science 2. Was among top four students during Masters in Plant Biotechnology 3. Secured first division in Bachelors of Biochemistry (Honors) 4. Felicitated with a trophy and a certificate by Punjabi Academy of Government of Delhi for securing 88% in Punjabi language in grade 10th CBSE Board Examination

USE OF QR CODE IN THE LIBRARY

#### Major writings in the field in which you would like to pursue your M.Phil./Ph.D.

#### USE OF QR CODE IN THE LIBRARY

##### INTRODUCTION

The growth of information and communication technology has brought sweeping change. As a hub of information communication, the libraries will benefit from adopting new technology. It is expedient for the libraries this latest technology developments in their respective areas. Student orientation programs play a vital role in communication between the libraries and its students. The field of librarianship is changing with the development of professional marketing, ever-changing technologies, and innovative outreach services QR codes efficient and attractive way. The videos give short, professional, informative messages that assist users. Deploying QR codes to assist users in a variety of ways throughout the library encourages the user to engage with the library. By developing a new outreach program called roving reference, librarians are meeting their patrons in their environment. This project is an outcome of the study for observation of QR code use in libraries, and how to use in libraries a QR code. A proverb attributed to Confucius says, —Tell me and I will forget, show me and I may remember, involve me and I will understand. We remember little of what we hear and little more of what we see. We remember more when we hear, see, and participate. Because of this, QR codes can be a powerful tool for teaching, learning, and information retrieval. Another proverb says that a picture is worth a thousand words. Information that is presented using audio, video and text is effective and interesting for viewers and conveys its message more effectively.

##### NEED OF QR CODE

In this 21st century where almost everything is going digital and communication takes place on the internet over the network, the multimedia program plays a massive role. It brings together a whole load of information in the form of pictures, text and sound in one simple package. The purpose of the study is to investigate and observation this Technology presentation to orient new and visiting students and faculty. It is time-consuming to explain to every student and library member about the history of the QR code technology, services, etc. In order to reduce the burden on the library staff. The main purpose of this programme is to provide detail information about the QR code use in library and information to students who need the information. This programme gives the user a complete detail about the Library and Information Science.

##### WHAT IS QR CODE?

QR (Quick Response) codes are the two-dimensional barcode were invented in 1994 by the Toyota Motors subsidiary Denso Wave to track vehicles and parts during the manufacturing process. The QR code consists of black modules (square dots) arranged in a square grid on a white background. The information encoded may be made up of data (numeric, alphanumeric, byte/binary, Kanji) or, through supported extensions, virtually any type of data. A QR code is read by an imaging device, such as a camera, in a mobile phone and there a number of different barcode scanner applications such as Red Laser, Barcode Scanner and QR Scanner that can read and decode data from a QR code. The QR code, similar to a barcode, is an example of an information matrix. However, a significant difference in the two is that a barcode only holds information nicely in the horizontal direction up to 30 numeric characters and a QR can do so vertically as well. The data encoded can include numbers, alphanumeric characters symbols, and text symbols such as kanji (Japanese language symbols) as well as control codes.

### QR CODE USE IN LIBRARY

In order for libraries to stay relevant, librarians must implement the technologies that users routinely employ in their daily lives. In addition to knowing about the latest developments, we must decide which are likely to be widely adopted. Today's QR codes seem very similar and Librarians are finding uses for QR codes in their libraries.

In the five stacks levels where there are no service desks, small signs posted at the ends of the aisles use QR codes to direct users to the Libraries' customised World Cat site or to the library chat service. Brief instructions explain how to download a QR Code reader app. Shortened URLs appear next to the codes for users who prefer to type the URL into a browser. On the library's ground floor, four freestanding scanners are available for any patron to walk up and use for free. Most people find the scanners to be easier and faster to use than a copier, but some patrons are not sure how to begin using them. Signs on the scanners have QR codes directing users to an instructional video on the Libraries' YouTube channel. Table tent signs placed in public computing areas advertise mobile library services to students with a code pointing to the Libraries' mobile website.

### OBJECTIVE

Setting a clear objective will aid guide the campaign development and effectively design creative use of QR codes.

- To attract and make wide awareness among library users towards library resources.
- To promote a use of open source technology.
- To provide quick library information services to the academic user's
- To promote mobile technology-based services and promote mobile learning.
- To increase users satisfaction toward library services.
- To save the time of the user.
- To provide quick CAS services.
- To provide quick ready reference services at the time of need.
- Free and open sources technology.
- High storage capacity of data
- Small space required for print.
- Reading capability of QR Code from any direction.
- Capability to restore partially data or content of damaged QR codes.
- Structure appending feature.

### CONCLUSION

I wanted to highlight some really important issues about library service development, marketing and communication issues, using the perspectives of turning academic libraries from collection orientated to connection orientated places into and I want to explore more and do a research on QR code use in the library in M.Phil. study.
